

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

UNITED STATES OF AMERICA,

-against-

JULIUS ROSENBERG, ETHEL ROSENBERG,
et al,

O-134-245

Defendants.

TO THE HONORABLE JUDGES OF SAID COURT:

The petition of JULIUS ROSENBERG and ETHEL ROSENBERG, by EMANUEL H. DILCH, their attorney, respectfully represents:

FIRST: The petitioners are unjustly, unlawfully and illegally detained and imprisoned by Wilfred L. Denno, Warden of Sing Sing Prison, Ossining, New York, a New York State penal institution, acting as the agent for and under the direction of the Attorney General of the United States or his authorized representative to whose custody they were committed, under and by virtue of separate judgments entered and commitments issued by the United States District Court for the Southern District of New York, dated and filed April 5, 1951 against each of the petitioners.
^{1/}

SECOND: The indictment, against the petitioners (a superseding indictment following two previous ones) was returned in this Court on January 31, 1951 on charges, in a single count, that they conspired with others, from June 6,

1/ For the convenience of the Court and of all parties to this proceeding, the printed copy of the record, filed with the Supreme Court of the United States on the petitioners' petition to that Court, as hereafter stated, is made part of the moving papers herein, and marked as to Volume I, Exhibit "A" and as to Volume II, Exhibit "B". References to this record will be made herein as "R". All of the other exhibits hereinafter referred to are also annexed hereto and made a part thereof.

1944 and until June 16, 1950, to transmit to the Union of Soviet Socialist Republics "documents, writings, sketches, notes and information relating to the national defense of the United States of America" with "intent or reason to believe that they would be used to the advantage of" that foreign nation, in violation of Section 34, Title 50 of the United States Code (now 18 U.S.C.A. 794). (R. 2-4, 5, 6)

THIRD: Their trial, together with the co-defendant, MORTON SOBELL, before a Court and Jury in this Court, commenced on March 6, 1951 and continued until March 29, 1951, when the jury returned separate verdicts of guilty against each of them. (R. 35-1579)

FOURTH: On April 5, 1951 they were sentenced to death by electrocution by Hon. Irving I. Kaufman, the trial judge; and, as aforementioned, the judgments and commitments were made and filed in the Office of the Clerk of this Court on said April 5, 1951. (R. 1612-20; 27, 28)

FIFTH: Pursuant to the authority vested in him by the provisions of Section 4082, of Title 18 of the United States Code, the Attorney General or his authorized representative, caused and ordered the transfer of the petitioner, ETHEL ROSENBERG on or about April 11, 1951, and of petitioner, JULIUS ROSENBERG on or about May 15, 1951 to the Sing Sing Prison at Ossining, New York, where they have remained and now are presently detained to await execution, since no "available, suitable and appropriate institutions" were maintained by the Federal Government within the Southern District of New York which had facilities to carry out the execution of the sentence of death of the petitioners in the manner prescribed by the judgment of conviction.

SIXTH: Thereafter the petitioners duly appealed to the United States Court of Appeals for the Second Circuit from the aforesaid judgments of conviction, which were stayed pending final determination of the appeal. On February 25, 1952, the United States Court of Appeals for the Second Circuit, affirmed the judgments of conviction of the petitioners. Its opinion is reported in 195 F.(2d) 562.

SEVENTH: Thereafter the petitioners duly petitioned the said United States Court of Appeals for the Second Circuit for a rehearing of their appeal. On April 8, 1952, the said Court denied the said petition. Its opinion is also reported in 195 F.(2d) 563.

EIGHTH: Thereafter the petitioners duly petitioned to the Supreme Court of the United States for a writ of certiorari to review the aforesaid decisions of the United States Court of Appeals for the Second Circuit. On October 13, 1952 the United States Supreme Court made and entered an order denying the said petition. No written opinion was rendered. Black, J., dissenting, noted his desire to grant the writ.

NINTH: Thereafter and on or about October 15, 1952, the Supreme Court of the United States, on the application of petitioners, made an order staying the issuance of its order of October 13, 1952 until its determination of a petition for a rehearing to be duly made before that Court by the petitioners.

TENTH: Thereafter and on October 28, 1952 the petitioners duly filed their petition with the Supreme Court of the United States for a rehearing and reversal of its order of October 13, 1952.

ELEVENTH: On November 17, 1952, the United States

Supreme Court made and entered an order denying petitioners' petition for a rehearing. Black, J., dissenting, noted his desire to grant the petitioners' prayer for relief. Frankfurter, J., wrote a memorandum opinion, not yet officially reported.

TWELFTH: Petitioners make this application praying that their sentence be vacated and set aside and that they be discharged from detention and imprisonment under the provisions of Sec. 2255, Title 28 of the United States Code on the ground that their conviction was unjustly, unlawfully and illegally procured in violation of the Constitution and laws of the United States and that the sentencing court was without jurisdiction to impose the sentence, so as to render the judgment subject to collateral attack.

THIRTEENTH: The grounds which petitioners urge in support of this application are as follows:

1. Pre-trial and trial publicity, bearing on the issues of the petitioners' case, adversely reflected upon their innocence, pre-conditioned the public mind in the Southern District of New York to an acceptance of their guilt, and created a trial atmosphere of prejudice and hostility toward them, through:

(a) Newspaper publicity developed by the independent initiative and private enterprise of the newspapers and other mass media of communication circulated within the Southern District of New York;

(b) Information, indicating the guilt of the petitioners "fed to" the press and other mass media of communication circulated within the City of New York by the Federal Bureau of Investigation, the Department of Justice, the office of the United

States Attorney for the Southern District of New York, and other officials of Government, and reported widely by the said media of publicity;

(a) The indictment of one, William Perl, procured by the prosecuting authorities in the Southern District of New York in the course of the trial and before the verdict of the petitioners, having the effect of prejudicing the minds of the jurors sitting in the petitioners' cause against the petitioners.

2. The prosecuting authorities knowingly used false testimony to bring about petitioners' conviction.

3. The sentencing court was without jurisdiction to impose the sentence; in that the material allegedly transferred and communicated, the gravamen of the offense, was arbitrarily and capriciously classified as "secret", when in fact it was lawfully, widely and publicly known, and its transmittal or communication, therefore, not violative of Section 32 (a) and 34 of Title 50 U.S.C.A.

GENERAL CLIMATE OF THE CASE

COURT ENTH: In October 10, 1952, subsequent to the trial proceedings in this case, the United States Court of Appeals, for the First Circuit, in Belaney v. United States Number 4652, not yet reported, enunciated legal principles, not clearly established at the time of the petitioners' trial, concerning the effect of adverse "pervasive pre-trial publicity". The Court held that where an "enveloping hostile atmosphere" may result in the creation of a "public preconception of guilt", a defendant, tried under such conditions,

is deprived of his rights under the Sixth Amendment to the Constitution of the United States.

With respect to "this modern phenomenon of 'trial by newspaper'", where "pre-trial publicity of damaging material, tending to indicate the guilt of the defendant, is dug up by the initiative and private enterprise of newspapers", the Court stated: "The Supreme Court has not spoken its last word". It held directly that where such material is "fed to the press by prosecuting officials of the Department of Justice" the courts must, in the interests of "the administration of criminal justice in the federal courts" go beyond even "those minimal historic safeguards...which are summarized as 'due process of law'" to insure that "civilized standards of procedure and evidence" are established and maintained.

The petitioners here represent that a tremendous and almost unprecedented volume of pre-trial and trial newspaper publicity stimulated by the prosecuting officials as well as independently generated, hostile to them, had deeply ingrained in the public of the Southern District of New York, a profound conception of their guilt. No jury chosen from among this section of the population could have escaped that influence in arriving at its verdict.

To the preconception of the petitioners' culpability of the crime with which they were charged was added anger, hatred and resentment against them because their cause was falsely depicted to have been of a magnitude and character as to put in jeopardy the national security of the United States and the very survival of each of its citizens.

The remarks of the trial Court on sequence reflected this type of attitude toward the petitioners which prevailed from the time of their arrests through their trial, when he

stated: "I consider you far more worse than murder... You have changed the course of history to the disadvantage of our country... Julius Rosenberg was the prime mover in this conspiracy... that you being... etc., aided and abetted the cause... she was a full fledged partner in this crime."

(R.-1-14-1/14)

But within a week after the imposition of sentence upon the petitioners, a highly authoritative government report rated Nichols, Kay and Greenglass (along with British, radio Pontecorvo) as the only important atomic espionage agents; and subordinated the petitioners to a minor place. Report on Soviet Atomic Espionage Joint Comm. on Atomic Energy, 82nd Cong., 1st Sess. (U.S. Gov't Printing Office, 1951) pp. 5-7. Accord: The Shameful Years, House Comm. on Un-American Activities (U.S. Gov't Printing Office, 1952).

Nevertheless, the exaggerations and distortions, documented below, of the nature of the petitioners' alleged crime, prevailed in the pre-trial and trial period and created a climate of hostility which transformed the trial into a proceeding bearing the superficial trappings of due process, but devoid of the indispensable content of fairness or reasoned deliberation.

The case of the petitioners is unique in this respect: the publicity which prejudiced them consisted not alone of aspersions on their innocence, but was the accumulation of propaganda, varied in its aspects, commencing months before their arrests and continuing to and including their trial. As it became specifically directed toward them by the prosecuting officials and the mass media of communication, the petitioners were engulfed in a wave of common anger,

and public opinion hardened into a certainty of their individual guilt.

Only the history of the contemporaneous period explains the effectiveness and force of the lines of publicity which fastened the guilt of the petitioners in the public mind.

The years from the close of World War II to the date of the arrest and trial of the petitioners, and to the present, were marked by a growing strain and tension in the relations between the United States and the Soviet Union. The tempo of the deterioration of the international situation, by the time of the arrest of the petitioners and their trial, quickened by the outbreak of the Korean conflict, had reached the stage of "enmity", popularly referred to as the "cold war".

Exploiting ideological identity of Communists here and abroad, domestic Communists had been presented to the public as suspect in their loyalty to our Government.

The deep fear of the consequences to the American people of the development of the "cold war" into a shooting war, was mitigated, from Hiroshima to 1949, by reliance on the illusion that the United States maintained a monopoly on the atom-bomb--the most frightful and devastating weapon yet developed by men. The sense of security of the people of the United States that they would be safe in any war with the Soviet Union because of their sole possession of this super weapon was shattered when, in September 1949, the President of the United States announced that the Soviet Union had exploded an atomic bomb.

When Dr. Klaus Fuchs, the British atomic scientist--Dr. J. Robert Oppenheimer's opposite number at the Los Alamos atom-bomb project--was arrested in England, in February,

1950, the American people were given to understand that the Soviet Union achieved mastery of the atomic weapon, when it did, only by virtue of the espionage activities of Fuchs and his cohorts, in transmitting to the Soviet Union the innermost "secrets" of American atomic bomb production. The circumstances that President Truman had publicly disclosed that he had ordered American production of the hydrogen bomb three days prior to Fuchs' arrest, and the charge that Fuchs had also delivered hydrogen bomb data to the Soviet Union compounded the shock. N.Y. Times, Feb. 1, 1950, p. 1 (Ex. II-A-1); N.Y. Daily Mirror, Feb. 1, 1950 p. 1 (Ex. II-B-1); N.Y. Post, Feb. 1, 1950, p. 1 (Ex. II-C-1).

The entire metropolitan press and national magazines circulated in this community, featured statements by J. Edgar Hoover, Director of the Federal Bureau of Investigation, Senator Brian Cushing, Chairman of the Congressional Committee on Atomic Energy, individual members, the United States Atomic Energy Commission, and General Leslie R. Groves, wartime head of the over-all atomic Manhattan Engineering Project, that Fuchs had had access to our most vital and closely guarded "secrets" of the atomic and hydrogen bombs and that his transmission of this information to the Soviet Union, in all probability, was the factor which enabled the Soviet Union to bring off a atomic explosion years before the United States Government had expected it. See, e.g., N.Y. Times, Feb. 4, 1950, p. 2 (Ex. II-A-2); ibid, Feb. 12, 1950, p. 105 (Rev. of wk.) (Ex. II-A-13); N.Y. Herald Tribune, Feb. 4, 1950 p. 1 (Ex. II-E-1); ibid, Feb. 5, 1950, p. 1 (Ex. II-E-2); ibid, Feb. 7, 1950, p. 1, PI (Ex. II-E-4); N.Y. Daily News, Feb. 4, 1950, p. 1, 2 (Ex. II-E-1); ibid, Feb. 5, 1950, pp. 2, 5 (Ex. II-E-2); ibid, Feb. 5, 1950, p. 38 (Ex. II-E-8);

N.Y. Daily Mirror, Feb. 4, 1950, pp. 1, 2 (Ex. II-E-3); N.Y. Journal American, Feb. 3, 1950, pp. 1, 4, 5 (Ex. II-E-2); ibid., Feb. 4, 1950, pp. 1, 2, 8 (Ex. II-E-3, 4); ibid., Feb. 5, 1950, p. 15 (Ex. II-E-7, 8); ibid., Feb. 10, 1950, pp. 1, 15, 16 (Ex. II-E-15-20); N.Y. World Telegram and Sun, Feb. 4, 1950, p. 1 (Ex. II-E-2); N.Y. Post, Feb. 10, 1950, pp. 1, 2, 47 (Ex. II-E-2); Time Magazine, Feb. 13, 1950, p. 24 (Ex. II-E-1); N.Y. Daily Mirror, Mar. 12, 1950, p. 3 (Ex. II-E-2); N.Y. Journal American, Mar. 11, 1950, p. 2 (Ex. II-E-1); N.Y. Post, Mar. 12, 1950, p. 3 (Ex. II-E-1).

The U.S. Federal Bureau of Investigation, reportedly instrumental in the arrest of Fuchs, in tandem with the British prosecutor of Fuchs and the presiding ^{Judge} at his ^{advanced his view that} trial and sentence, that the motivation for Fuchs' espionage activities on behalf of the Soviet Union was his filial attachment to the principles of Communism. It was widely exploited in the metropolitan press as "an object lesson in the nature of modern Communism". N.Y. Times, Feb. 5, 1950, pp. 2, 3-3 (Ex. II-E-4, 5); ibid., Feb. 6, 1950, p. 3 (Ex. II-E-7); ibid., Feb. 11, 1950, pp. 1, 2 (Ex. II-E-12); N.Y. Daily Mirror, Feb. 7, 1950, p. 1 (Ex. II-E-1); ibid., Feb. 11, 1950, pp. 1, 3 (Ex. II-E-9); ibid., Feb. 12, 1950, pp. 1, 3 (Ex. II-E-14); N.Y. Daily Mirror, Feb. 12, 1950, p. 12 (Ex. II-E-7); ibid., Feb. 13, 1950, p. 27 (Ex. II-E-8); N.Y. Daily Mirror, Feb. 13, 1950, p. 2 (Ex. II-E-2); ibid., Feb. 14, 1950, p. 3 (Ex. II-E-15); N.Y. Journal American, Feb. 13, 1950, p. 1, 3 (Ex. II-E-16); N.Y. Journal American, Feb. 14, 1950, p. 1, 4 (Ex. II-E-17); ibid., Feb. 15, 1950, p. 1, 7, 18 (Ex. II-E-18); ibid., Feb. 16, 1950, p. 1, 15 (Ex. II-

In official treatment of the Stora case, dramatized
in its reporting, every try was made to mix the political problems which
had developed in the years following World War II. There
emerged, thereafter, as objects of suspicion and inspired fear:
(1) the fear that espionage on behalf of the Soviet Union
had and would increase; (2) the fear that native Communists,
acting as spies for the Soviet Union, would subvert our se-
curity; and (3) the fear of the consequences of the much of
U.S. atomic material, in terms of individual and mass annihil-
ation.

These objects became matters of widespread publicity
from the time of the arrest of such as and including the arrest
and trial of the petitioners. From the Stora case there
developed a chain of atomic espionage cases in which, properly

fact of his escape was related to the officials, and, at their request, he was sent back to the case and once again assigned to the Warden's office. In this assignment he was instructed, from the warden, to keep him separated from other cases, to not let him be interrogated, prior to trial, by the defense attorneys, and to remain completely silent. After this, he was allowed to speak to the Warden alone, and, if necessary, to his attorney, or to his wife, but he was not allowed to speak to anyone else. He was told that his confessions were known because he had identified himself. The public officials had less information than he had and this was the only effective evidence concerning his identity. His further arrests were not taken into account.

N.Y. Daily News, Mar. 7, 1950, p. 12 (Ex. TIT-C-3); ibid., March 9, 1950, p. 1 (Ex. TIT-C-4); N.Y. Daily Mirror, Mar. 7, 1950, p. 4 (Ex. TIT-D-1); N.Y. Journal American, Mar. 3, 1950, (Ex. TIT-E-3); N.Y. World Telegram & Sun, Mar. 1, 1950, p. 2 (Ex. TIT-E-4); ibid., Mar. 20, 1950, p. 4 (Ex. TIT-E-7); N.Y. Post, Mar. 1, 1950, p. 1 (Ex. TIT-C-1); ibid., Mar. 2, 1950, p. 14 (Ex. TIT-C-2).

On May 24, 1950, Harry Gold, an American, was arrested on the charge of conspiring to commit espionage on behalf of the Soviet Union by transmitting to agents of that country information relating to the national defense of the United States.

This first American arrest, on a crime carrying the death penalty, produced a hysteria which became more frenzied with the reports of frantic Federal agents of investigation frantically trying to apprehend the "Soviet agents" before they "fled" the country. These reports were officially inspired as was the added revelation that the authorities were guarding all ports, harbors, stations and airfields to prevent their escape. When this is counterposed against the information, easily discoverable, and subsequently introduced at the trial of the petitioners, that Anatoli A. Yakovlev (a co-conspirator of Gold and co-defendant of the petitioners) and his family had left the country after openly taking Class A passage on the S.S. America in 1946 (Ex. 985-6), it becomes clear that the hysteria was artificially induced, and, in every story thereafter necessarily, in which the petitioners were mentioned, Yakovlev's name was introduced, to the prejudice of the petitioners, as a co-conspirator who had "fled" the country. (See documentation cited in the succeeding paragraphs.)

The official pronouncements, reported by the metropolitan press linked Gold to Fuchs. It also joined Gold with the alleged American espionage agents, Elizabeth Bentley, who testified at, and Jacob Golos, named in suspicion connection with Rosenberg, at the trial of the petitioners (R. 996-1023). N.Y. Times, May 24, 1950, p. 1 (Ex. V-A-5); ibid, May 25, 1950, p. 1 (Ex. V-A-6); N.Y. Herald Tribune, May 25, 1950, p. 1 (Ex. V-B-5); ibid, May 25, 1950, (Ex. V-B-7); ibid, May 31, 1950, (Ex. V-B-8); N.Y. Daily Mirror, May 24, 1950, p. 3 (Ex. V-B-7); ibid, May 25, pp. 1,3 (Ex. V-B-8); N.Y. Journal American, May 24, 1950, pp. 1,16,19 (Ex. V-B-1, 2, 3); N.Y. World Telegram & Sun, May 24, 1950, pp. 1,5 (Ex. V-B-4, 7); N.Y. Post, May 24, 1950, pp. 1,2 (Ex. V-C-1); ibid, May 25, 1950, pp. 1,2,3 (Ex. V-C-2).

At the same time officials and the newspapers persisted in reporting that Fuchs, in co-operation with S.B.I. agents in London, was implicating other Americans as his espionage contacts. Speculative estimates on the number of people he would have named from 10 to 100. N.Y. Herald Tribune, May 26, 1950, (Ex. V-B-6); N.Y. Daily News, May 24, 1950, pp. 1, 3, 50 (Ex. V-C-3, 4, 5); ibid, May 25, 1950, pp. 2,50 (Ex. V-C-6); N.Y. Daily Mirror, May 25, 1950, pp. 1,3,53 (Ex. V-D-8); ibid, May 25, 1950, p. 6 (Ex. V-D-9); N.Y. Journal American, May 24, 1950, pp. 1,16,18,19,24 (Ex. V-C-1, 2, 3, 4); ibid, May 25, 1950, pp. 1, 15 (Ex. V-C-5, 6); N.Y. World Telegram and Sun, May 5, 1950, p. 10 (Ex. V-C-2); ibid, May 25, 1950, pp. 1,2 (Ex. V-F-8); ibid, May 29, 1950, p. 4 (Ex. V-F-10); ibid, May 31, 1950, p. 34 (Ex. V-F-11); N.Y. Post, May 24, 1950, pp. 1,2,54,55 (Ex. V-C-1).

All the proceedings in the Gold case following his arrest, as well as his testimony against other of his alleged confederates at their trial, received unusually prominent treatment in the press in this district and kept alive in the public mind through the entire period terminating with the trial of the petitioners, the misdeeds of Gold and Fuchs. As with Fuchs, reports of official "tips" that Gold was "talking" about others allegedly connected with him in Soviet espionage, served to associate future suspects with his criminal activities. This background facilitated the forming of a prejudicial nexus between Rosenberg and Gold, although Gold, when he subsequently testified at the petitioners' trial never claimed that he met or knew the Rosenbergs. (Ex. 798-S48). N. Y. Times, June 2, 1950, p. 11 (Ex. VI-A-1); ibid, June 10, 1950 pp. 1, 3 (Ex. VI-A-5); ibid, June 13, 1950, p. 14 (Ex. VI-A-6); N.Y. Herald Tribune, June 1, 1950 pp. 1, 13 (Ex. VI-B-1); ibid, June 2, 1950, p. 4 (Ex. VI-B-2); ibid, June 10, 1950 (Ex. VI-B-4); ibid, June 13, 1950 (Ex. VI-B-5); N.Y. Daily News, June 1, 1950, p. 6 (Ex. XV-E-9);

On June 15, 1950, Alfred Dean Slack, a chemist, was arrested on charges of espionage and was connected directly to Gold and Fuchs. These latter were, by now, commonly characterized as the Fuchs-Gold "Atom-Spy" ring. Although the charge against Slack was that he had illegally transferred information concerning "DX" (a high explosive) to Gold, he was nevertheless indicted with the "Atom-Spy" ring. His arrest and subsequent plea of guilty in September, 1950 and his sentence in that month likewise were given front page attention. N.Y. Times, June 16, 1950, pp. 1, 4 (Ex. VI-A-12); N.Y. Herald Tribune, June 16, 1950, pp. 1, 11 (Ex. VI-B-6); ibid, June 12, 1950 (Ex. VI-B-9); N.Y. Daily News, June 16, 1950, pp. 2, 42 (Ex. VI-C-3); N.Y. Daily Mirror, June 16, 1950, pp. 1, 3 (Ex. VI-D-3); N.Y. Post, June 16, 1950, pp. 1, 3 (Ex. VI-E-4,5); N.Y. Times, Sept. 19, 1950, p. 20 (Ex. IX-A-4); ibid, Sept. 23, 1950, p. 2-E (Ex. IX-A-8).

Again, as in the instances of Fuchs and Gold, "sources close to the Justice Department" announced to the press that there would follow many more arrests. See: e.g., N.Y. Daily News, June 16, 1950, pp. 2, 44 (Ex. VI-C-3).

On June 16, 1950, immediately in the wake of Slack's arrest, David Greenglass, the main prosecution witness in the trial against these practitioners, was apprehended, arrested, and on the following day arraigned.

Sensational stories occupying top space in the metropolitan newspapers accompanied his seizure and the Government's

charges against him. Greenglass was tied in by official announcement and widespread independent newspaper reporting and comment with Fuchs, Gold and Slack and was labelled as one of the members of the Fuchs-Gold "Atomic espionage" ring. The Slack indictment, however, associated him only with Gold. Each step in the prosecution against Greenglass, was accorded constant and inordinately grim treatment for many months thereafter. As with the others, predictions were made by the investigative and prosecuting authorities of the Government, together with their prominent persons in public life, that he was "talking" and that further arrests would result as a consequence of his confessions.

July 17, 1950, the petitioner, Julius Rosenberg, was arrested and released late that night before a United States District Court trial. Following the arrest set by the preceding arraignment mentioned above, he was linked with Karpis, Gold, Slack and Greatglass in an "Atom-spy" conspiracy. Again, as in the previous arrests, the officials and the press noted that more arrests would result. In relation to its coverage of the proceedings of the petitioner, Julius Rosenberg, which followed his arrest, the press notoriously recoupled, either independently or as a report of official and uncovert, the stories and history of the much proceedings, the Gold proceeding, the Slack proceedings, the Greatglass proceedings and held the petitioner, Julius Rosenberg, to be part of the Fuchs-Gold-Sleek-Greatglass atomic espionage conspiracy, and criminally responsible for its operations. The arrest of the petitioner, Julius Rosenberg, was heralded in all of the metropolitan press and was acknowledged as most important news by columnists, feature story writers and other commentators. N. Y. Times, July 18, 1950, p. 1 (Ex. VII-A-3); ibid, July 19, 1950, p. 20 (Ex. VII-A-4); ibid, July 20, 1950, pp. 9, 18 (Ex. VII-A-5,6); ibid, July 23, 1950, pp. 25, 102 (Rev. of Ex.) (Ex. VII-A-8); N. Y. Herald Tribune, July 19, 1950, pp. 1, 15 (Ex. VII-B-1); ibid, July 19, 1950 (Ex. VII-B-2); N. Y. Daily News, July 16, 1950, pp. 1,3,24 (Ex. VII-C-1); ibid, July 19, 1950, p. 5 (Ex. VX-A-1); N. Y. Daily News, Mar. 1, 1951, p. 21 (Ex. XV-C-1).

Within two weeks after the arrest of the petitioner, Julius Rosenberg, there were arrested in this City, Abraham Rothman and Miriam Moskowitz, charged with conspiracy to obstruct justice, in that they induced Gold to testify falsely before a Grand Jury concerning his espionage activity. Despite the form of charge, these two were depicted in the press as part of the Fuchs-Gold "Atom-Spy" ring. They were linked by the United States officials and by the press to Fuchs, Gold, Slack, Bentley, and Golos and to Greenglass and the petitioner, Rosenberg, although no connection was so made at petitioners' trial.

The pattern of prediction of further arrests accompanied the press reception of the Brothman-Joskowitz arrests. N. Y. Times, July 30, 1950, p. 1 (Ex. VII-A-14); ibid, July 31, 1950, p. 8 (Ex. VII-A-15); N. Y. Herald Tribune, July 30, 1950, op. 1, 21 (Ex. VII-B-7); ibid, July 31, 1950, (Ex. VII-B-8); N. Y. Daily News, July 30, 1950, pp. 1, 2, 48 (Ex. VII-C-5); ibid, July 31, 1950 p. 8 (Ex. VII-C-6); N. Y. Daily Mirror, July 30, 1950, p. 2 (Ex. VII-D-8); ibid, July 31, 1950, p. 2 (Ex. VII-D-9); N.Y. Journal American, July 30, 1950, p. 1 (Ex. VII-E-9); ibid, July 31, 1950, p. 3 (Ex. VII-E-10); N.Y. Times, Aug. 1, 1950, p. 18, (Ex. VIII-A-1); ibid, Aug. 3, 1950, p. 10 (Ex. VIII-A-2); ibid, Aug. 9, 1950, p. 10 (Ex. VIII-A-7); N. Y. Herald Tribune, Aug. 3, 1950 (Ex. VIII-B-2); ibid, Aug. 9, 1950, (Ex. VIII-B-3); N.Y. Daily News, Aug. 1, 1950, p. 6 (Ex. VIII-C-1); N.Y. Daily Mirror, Aug. 1, 1950, p. 6 (Ex. VIII-D-1); N.Y. Journal American, Aug. 2, 1950, p. 26 (Ex. VIII-E-1); ibid, Aug. 8, 1950, p. 3 (Ex. VIII-E-2); Time Magazine, Aug. 7, 1950, pp. 11, 15 (Ex. VIII-H-1); Newsweek, Aug. 7, 1950, p. 20 (Ex. VIII-H-1);

The trial of Brothman and Joskowitz occurred in November, 1950. During this month the press was blacketed with reports of the trial, giving special emphasis to the testimony of Gold and Fentley, who were witnesses for the prosecution against these two and both of whom appeared as witnesses in the trial of the petitioners. In the accounts, the press never neglected to recall the entire chain of circumstances and arrests, beginning with Fuks, continuing to and including all of the persons apprehended on "atom-spy" charges prior to the trial. The trial formally for a conspiracy to obstruct justice was transformed, in conformity with the testimony there adduced into another trial for espionage, maintaining the importance of Soviet spying. N.Y. Times, Nov. 15, 1950, p. 17 (Ex. XI-A-1); ibid, Nov. 14, 1950, p. 1

p. 30 (Ex. XI-3-1); ibid., Nov. 13, 1950, p. 7 (Ex. XI-6-2);
ibid., Nov. 15, 1950, p. 3 (Ex. XI-6-3); ibid., Nov. 16, 1950,
p. 3 (Ex. XI-6-4); ibid., Nov. 20, 1950, p. 7 (Ex. XI-6-5);
ibid., Nov. 21, 1950, p. 4 (Ex. XI-6-6); ibid., Nov. 22, 1950
p. 4 (Ex. XI-6-7); ibid., Nov. 26, 1950, p. 48 (Ex. XI-6-8);
ibid., Nov. 28, 1950, p. 3 (Ex. XI-6-9).

In the meantime and one or about August 11, 1950, within two weeks after the Rothman and Moskowitz arrests, the petitioner, Ethel Rosenberg, was arrested, arraigned, and, as with her husband, the petitioner, Julius Rosenberg, was held in \$100,000.00 bail. The propaganda line of publicity was true to form--the petitioner, Ethel Rosenberg, was linked not only to her husband and her brother, David Greenglass, who were indicted with her but also with Fuhrman, Gold, Black, Rothman and Moskowitz, who were not. There was a prognostication, again, of further arrests by the prosecuting officials and the entire press. Her arrest provoked a spate of publicity. N. Y. Times, Aug. 12, 1950, pp. 1,30 (Ex. VIII-A-11); N.Y. Herald Tribune, Aug. 12, 1950, p. 5 (Ex. VIII-B-5); N. Y. Daily News, Aug. 12, 1950, p. 2 (Ex. VIII-C-2); ibid., Aug. 13, 1950, p. 16 (Ex. VIII-C-3); N.Y. Daily Mirror, Aug. 12, 1950, pp. 2, 6 (Ex. VIII-D-8); N.Y. Journal American, Aug. 11, 1950, p. 1 (Ex. VIII-E-5); ibid., Aug. 12, 1950, p. 2 (Ex. VIII-E-6); ibid., Aug. 13, 1950, p. 4 (Ex. VIII-E-7).

The press coverage of her case thereafter merged with that of her husband, the petitioner, Julius Rosenberg. (See documentation supra, concerning Julius Rosenberg.)

Within a week of the arrest of the petitioner, Ethel Rosenberg, Morton Sobell, a co-defendant, was arrested.

In Germany, Inc., all evidence was derived from
enemies who had been captured and a. &
in an effort to keep a secret flight to the United States
from being discovered, the code flight material was to
be falsified and concealed or omitted largely as a con-
sequence, too difficult to detect a cover, it was proposed
to "blackmail" with information which was never good testimony.
Gottschall's secret flight information, was a result of his
fisted hand prints, as an identification mark, inscribed by
the so-called "Atlantic Weatherman" pilot, without whom the
evident truth that was an attempt on the part of the inves-
tigation to link him with the activities of the various Atlantic
air flights, could not have been made. However, Gottschall
was exonerated with the ability to, effect, in the light of
the new facts, which re-enforced the contention of the
police, of the petitioners with Fuchs and Cole.

Gottschall's general proceedings from New York
City to answer a criminal complaint in the Southern
District of New York and the question - Osgood Hall upon
arrestment were played upon by the newspapers, indepen-
dently, until his supposedly editor, were herald with the pet-
itioners'. N. Y. Times, Aug. 19, 1950, p. 1, 3 (x. VIII-
4-19); ibid, Aug. 20, 1950, p. 23 (ex. VIII-A-20); ibid,

p. 2 (Ex.VIII-G-2); Ibid, Aug. 20, 1950, p.12 (Ex.VIII-G-5); Newsweek Aug.26, 1950, p. 30 (Ex. VIII-H).

The 1950 and early 1951 period was punctuated with accusations against many persons, invariably, although rarely, charged with espionage activities. In September, 1950, one, Oscar Gold, a former business associate of Gold, was indicted for perjury, in a Grand Jury investigation concerning espionage. N.Y. Times, Sept.29,1950, p.17 (Ex.XI-A-17); N.Y. Daily Mirror, Oct.28,1950, p. 2 (Ex.XI-B-4); N.Y.Journal American, Sept.26,1950,p. 1 (Ex.XI-E-5); N.Y.World Telegraph and Sun, Sept.29,1950, p. 3 (Ex.XI-F-3). In August, one, Blum, a young engineer was indicted for theft of plutonium from Los Alamos, where he had formerly been employed. N.Y. Times, Aug.25,1950, p. 1(Ex.VIII-A-23).

D. G., in general, was a point of interest among atomic scientists by Congressional committee hearings centering on the alleged Communist political association of a group of our leading scientists at the Berkeley, California experimental laboratory. The situation became so wild that the press and officials, like Senator McCarthy, brought into question the loyalty of every American atomic scientist, including such noted distinguished contributors to the development of nuclear physics as Drs. Arthur Compton, Hutchins.

No specimen indications were ever returned by the FBI, others as Steve Nelson, Sidney Goldberg (Scientist A), Clarence E. Hickok and Arthur Compton, among others, but the claim was corroborated by countless critics of the program against the Government because it had failed to do so.

VII-B-1); N.Y.Times, Oct. 21, 1950, p. 6 (Ex. VIII-C-2); N.Y. World Telegram and Sun, Dec.5, 1950, p.11 (Ex. VIII-C-1).

Throughout the entire year 1950 the author and his wife, including the total of five petitioners in 1951, were represented by the same attorney, Mr. John J. O'Farrell, Esq., of the firm of O'Farrell & O'Farrell, 100 Nassau Street, New York City, Director of the Internal Revenue Service, New York City. On many occasions the Administration for National War Mobilization and Reconversion has exceeded the authority granted it by Congress in carrying out its functions. The author's opinion, however, is that such actions can exceed the authority granted it by Congress only if they are specifically authorized by statute.

the right to self defense in case of attack, and
cited the killing of the two men in India, who
had been accused of being communists, as justification
for bombing the so-called Red spy, Karpis. In the meantime,
the S.S. left New York, according to the statement of
P. Quinn W. T. P.D., quoted ... An hour after his dis-
appearance, his relatives and friends were "getting scared" but
he was unharmed. N.Y. Times, Feb. 1, 1950, pp. 1, 13 (Ex. XII-A-6);

... probably fit the situation. The organiza-
tion can be tried and nothing done to help
or prepare it that was really an aid or served to convert the
public mind from regarding Communism as an "evil" or
political minority, into a conviction that they, Communists
abhere to Communism would lead to a state of lawless-
sabotage and engage in treasonable activities for the
rebuff of the Soviet Union. Like the other documents
on this subject are found in the statements of Senator

Hoyer: "most the larger fruit native C. in Little Rock. Illinois
travelers lies in the fact that they replace us...on hold-
ing grounds for Palestine left political and economic".

Daily Mirror, March 3, 1950, p. 28 (Ex. III-B-1); also repre-
sentative Carl E. Lund, ex-leader of South Dakota, that:
"The reason we have the sabotage is because there are so
many Communists in this country...They are after the Hydro-
electric secrets just as Actives as they tried for and
succeeded in getting the A-bomb know-how..." U.S. Daily
Mirror, Feb. 12, 1950 p. 2 (Ex. VI-B-17); see e.g. United News
& World Report, Feb. 17, 1950 (Ex. VI-B-1); N.Y. Times, June

12 (Ex. XI-E-);

The motive of Communist ideology was attributed to every atomic bomb espionage suspect, whether or not he was thereafter convicted of espionage or another crime, or even where no arrest, indictment or conviction followed the suspicion of act or intent espionaging. The precedent was set with Fuchs (see documentation *supra*). When it came to Gold, his motivation was represented to be his desire to "aid a country whose aims he liked". N.Y. Times, May 24, 1950, pp. 1,21 (Ex. V-A-5); Ibid, May 25, 1950, p.
E-1 (Rev.of Ex.) (Ex. V-A-7); N.Y. Herald Tribune, May 24,

pp. 1, 3, 50 (Ex. V-C-3,4,5); Ibid, May 25, 1950, pp. 2,50
(Ex. V-C-6); N.Y. Daily Mirror, May 24, 1950, pp. 1,3,39
(Ex. V-C-7); N.Y.Journal American, May 24, 1950, pp. 1,
14, 16, 19, 24 (Ex. V-C-8); Ibid, May 25, 1950, pp. 1, 15
(Ex. V-C-9); N.Y. World Telegram and Sun, May 24, 1950, p. 1
(Ex. V-C-6); Ibid, May 25, 1950, p. 1 (Ex. V-C-8); N.Y.
Post, May 24, 1950, pp. 1,54, 55 (Ex. V-C-1); Ibid, May 25,
1950, p. 2 (Ex. V-C-2); N.Y. Journal American, May 21, 1950

p. 4 (Ex. XI-E-12); N.Y. Times Dec. 10, 1950, p. 1, 19 (Ex. XII-A-1); N.Y. Herald Tribune, Dec. 10, 1950, p. 1, 19 (Ex. XII-B-6); N.Y. Daily News, Dec. 10, 1950, p. 2 (Ex. XII-C-1); N.Y. Daily Mirror, Dec. 10, 1950, p. 4 (Ex. XII-D-1); N.Y. Journal American, Dec. 10, 1950, p. 1 (Ex. XII-E-5); N.Y. World Telegram and Sun, Dec. 10, 1950, p. 1 (Ex. XII-F-1); N.Y. Post, Dec. 7, 1950, p. 5 (Ex. XII-G-1);

Greenglass' arrest was greeted by the announcement of the FBI and the U.S. Attorney for this District that he had been a member of the Young Communist League, and that he explained his actions by saying: "I felt it was gross negligence on the part of the United States not to give Russia the information about the atom-bomb because she was an ally." It is interesting that his triple testimony did not include this reason. N.Y. Times, June 19, 1950, p. 1, 6 (Ex. VI-A-13); N.Y. Herald Tribune, June 19, 1950, p. 1, 6 (Ex. VI-B-7); N.Y. Daily News, June 19, 1950, p. 1, 3 (Ex. VI-C-6); N.Y. Daily Mirror, June 19, 1950, p. 1, 3 (Ex. VI-D-4); N.Y. Journal American, June 19, 1950, p. 1, 3 (Ex. VI-E-4,5); N.Y. Post, June 19, 1950, p. 1 (Ex. VI-F-5).

The newspapers reiterated this theme during both the Greenlass proceedings. N.Y. Times, June 20, 1950, p. 2 (Ex. VI-A-15); N.Y. Daily Mirror, June 20, 1950, p. 10, 11 (Ex. VI-I-1); ibid, July 13, 1950, p. 17 (Ex. VI-J-1); ibid, Oct. 19, 1950, p. 5 (Ex. VI-K-2); N.Y. Journal American, June 20, 1950, p. 4 (Ex. VI-L-4).

One of the high lights of the Greenlass hearings was the testimony of Kenneth T. C. Macmillan in which he claimed that Rosenman and Koskowitz were members of the Communist Party and were informed of its existence through the apparatus of that organization. N.Y. Times, Nov. 15, 1950, p. 17 (Ex. XI-A-1); ibid, Nov. 22, 1950, p. 1 (Ex. XI-B-9); N.Y. Daily Mirror, Nov. 15, 1950, p. 1 (Ex. XI-C-1); N.Y. Journal American, Nov. 15, 1950, p. 1 (Ex. XI-D-1).

(U. S. -1); N. Y. Post, July 29, 1950, p. 26; N.Y., Nov. 25, 1950,
p. 1 (Ex. 20-2-1); N.Y. Post, Nov. 25, 1950, p. 7 (Ex.

20-2-2).

Opposition to publication of "warning" that
atomic warfare is possible, regardless of the largest
discrepancy in advertising, in each instance, to national ex-
traction of the headlines. For instance, in that instant,
the U. S. Ambassador described the "burning spirit"
of the petitioners as "the desire of the
various groups who were both natives of Russia..."
and a family name of Dzhankovsky, A. V. Green, Nat. Rep.,
1950, p. 1, 21 (Ex. 20-2). Similarly, in the massless
scare, they took pains to point out irrelevantly that
Green's father was Russian born and his other collateral
brother, Ethel Greenberg, one of the petitioners, is the sister of Green-
blau, and the intended stigma carried over.

Again in this background, there loomed a picture
of the vast extermination of the population by imminent
atomic attack. No situation ever existed in history to
so arouse the instincts of self preservation and to provoke
public alarm. The fact of this mass fear was enmeshed
with the prosecution of those accused of having been in-
strumental, via espionage, in allegedly aiding the Soviet
Union to develop the atomic bomb. The inevitable result
could only be to direct against them intense and violent
hostility.

The highest authorities, governmental, military
and scientific, made dramatic statements to implant in
the public mind that New York City and the nation was in
grave danger of an atomic bomb attack. For instance,
the N. Y. Daily News on July 11, 1950, pp. 3, 28 scare
headlined:

"RUSH AN 'ATOM BOMB OR N.Y.'"

the same qualities possessed by a particular weapon system or the balance between them. After much thought, it became apparent that the best guarantee of atomic safety is to have the largest number of weapons located outside the Soviet Union.

In the New York Sun, July 1, 1950, Mr. Harry

Truman, the U.S. President, stated:

"It is important, however, to realize that the United States has not been able to keep pace with the Soviet Union in atomic development. We must, therefore, continue to work at a rapid rate, and we must also make every effort to insure that our atomic energy program will be conducted in accordance with the principles of international law."

The United States has made great strides

in atomic development and is now able to supply atomic bombs to its allies in the Americas, Europe, and Africa. Our ports and harbors are now safe from attack. However, the Americans have built out their defenses so well that they have already been able to allow their allies to do likewise.

Very newspaper stories concerning the atomic bomb in the U.S. daily paper of July 2, 1950, p. 2 (A.V.I.D.-7), which was continued:

"Soviet Atom Bomb: 'We're Behind You, Comrades!'"

To combat the panic, the myth of American atomic monopoly was abandoned, and a defense position advanced: that the Soviet Union had achieved superiority in atomic development and stock pile. Following the killing of the pro-Soviet so-called "the population of the ten-million-ton area was sufficient."

"U.S. Russia Still Equal in Atom Power
Despite Vast Arms Race, S. J. W. / R.R. (RD)
Washington, D.C." N.Y. Daily News, July 1,
1950, p. 3.

"SOON IT WILL BE R-DIC AT THE SKILL,
BRITAIN SAID", N.Y. Daily Mirror,
Aug. 7, 1950, editorial page (Ex.
VIII-D-5);

"SOON IT WILL BE R-DIC AT THE SKILL,
S P T HE BRITISH RE-BUTS", N.Y.
World Telegram and Sun, Feb. 6, 1950,
p. 11 (Ex. II-F-4);

"SOON IT WILL BE R-DIC AT THE SKILL,
60-BOMB (U.S.)", N.Y. Journal American,
Sept. 24, 1950, p. 10 (Ex. IX-E-3);

"SOON IT WILL BE R-DIC AT THE SKILL", front page
editorial, N.Y. Journal American, June
14, 1950, p. 1 (Ex. VI-E-2);

There was coupled the warning that there was
no true defense to an atom bomb attack, e.g.:

"NO DOWN DEFENSE AGAINST IT", N.Y. Times
Feb. 10, 1950, p. 1 (Ex. II-A-10,11);

"SOON IT WILL BE R-DIC AT THE SKILL", N.Y.
Journal American, Feb. 12, 1950, pp. 1,17
(Ex. II-E-20,26).

Tragedy and horror stories and pictures were
presented to de illustrate the disastrous and devastating
effects of an atomic weapon. The population of this city
was treated to the following stories:

"SOON IT WILL BE R-DIC AT THE SKILL", N.Y.
Times, Sept. 11, 1950, pp. 1,16
(Ex. IX-E-2,3);

"SOON IT WILL BE R-DIC AT THE SKILL", N.Y.
Times, Oct. 15, 1950, p. 22 (Ex. X-A-1);

"SOON IT WILL BE R-DIC AT THE SKILL", N.Y.
Daily News, "The Hell Bomb can cover the world in
lethal dust which could remain radioactive
active for as long as 5,000 years and
wipe all human life off the face of
the earth", N.Y. Daily News, Feb. 7, 1950,
p. 9

"SOON IT WILL BE R-DIC AT THE SKILL", N.Y.
Daily Mirror, Feb. 12, 1950, p. 2
(Ex. II-E-17);

"Within 10 seconds after it is dropped on N.Y. or any other city an atom bomb would kill almost every living thing within a half-mile radius of the blast and spread horrible destruction for miles more," serial story, N.Y. Daily Mirror, Aug. 10, 1950, p. 8 (Ex. 7III-D-7).

"A P. H. 100-MILE CLOUD DEFEATS Y ALL NYL, N.Y. Jo Paul American, Feb. 1, 1950, p. 15 (Ex. 7III-E-8).

"If the Hydrogen bomb is developed to its maximum efficiency, there will be no place to hide." N.Y. Journal American, Feb. 8, 1950, p. 1 (Ex. 7III-E-12).

"At \$3,000 billion, the cost of an H-20 is 'worth it', N.Y. Journal American, Mar. 21, 1950, p. 1 (Ex. 7III-E-13).

"H-20 IS WORTH IT, N.Y. Jo Paul American, Mar. 1, 1950, p. 6 (Ex. 7III-E-14).

"A poly will have to burn 20 seconds before detonating. A big black cloud full of radioactive particles will get you even if you happen to be breathing up near the bottom of an atom-bombed landscape," Consideration, N.Y. Journal American, March 6, 1950, p. 1 (Ex. 7III-E-15).

Not only were the horrors of death and injury from blast, radiation, and fire depicted, but the people were told, as well, that even their children offspring might be irreparably affected. Nuclear warfare was such a horrifying spectacle displayed for public consumption; the adults themselves offer the most eloquent testimony of the terrible impact it has produced upon their children as well. To impress the public with the gravity and dangers of the situation it was decided that top officials, scientists, and journalists, in the eyes of the countrymen, the public was educated to utilize for immediate action. "Keep your family strong by the keeping of every parent by the side of his or their children in air-raid drills in the schools. Children should be made aware of the danger's initial set of evidence. They are advised to construct their college fortifications, and air-wardens took posts on the roofs as part of a network of early aircraft detection.

The Soviets at one time seem to necessarily
believe that capitalism cannot be precluded
from existing areas of the world to be considered
to have been responsible for originating about this threat of
capitalism and mass manipulation. R. A. Times, Feb. 9, 1950,
p. 1, 2 & 3 (Ex. IV-A-2); Ibid, Feb. 10, 1950, p. 1 (Ex. II-A-10;

Exhibit I indicates the constant volume of publicity, given totally approximately 30,000 column inches of news space, by the metropolitan press, uninterrupted for a fourteen month period from February, 1950 to the end of March, 1951, to the volatile subjects which bore upon the case of the petitioners--espionage on behalf of the Soviet Union, the expectation that native Communists would act as spies for the Soviet Union, and the effect of the

breach of the United States atomic monopoly. The quality of the press treatment of this subject can best be characterized as "front page news", farce magnified, embellished pictorially, and can most effectively be comprehended by an examination of all the exhibits so surcd under Exhibits II to XV. The coverage of radio and television, not specifically documented here, adds immensely to this development of the climate.

The cumulative effect of this reportage, quantitatively and qualitatively, together with the independent coverage of the charges against, and trial of, the petitioners (shown below) inexorably preconditioned the public mind to acceptance of the guilt of the petitioners.

THE PLEA AND THE PLEADING CASE

FIFTEENTH: The petitioners were charged with and tried for being members of a conspiracy to transmit atomic bomb information to the Soviet Union, with intent to advantage that nation. At the trial the prosecution introduced evidence, accepted by the Court, that the petitioners were members of the Communist Party of the United States and preferred "Russian Socialism" over "American Capitalism," as relevant on the question of motive and intent (R. 1558, 1494-55).

It is evident, therefore, that the three lines of propaganda which had preceded the petitioners' case for a period of fourteen months touched upon the essential elements of the accusation which the Jury was called upon to determine.

In addition to this propaganda, further credence was lent to the Government charges against the petitioners by the fact that previous to the petitioners'

trial, those whom the Government heralded, indiscriminately, as their confederates -- Fuchs, Gold, Greenglass and Slack -- confessed their guilt. Brothman and Moskowitz, similarly named, had already been convicted at a trial which had featured their alleged espionage connection with Gold and Bentley.

The Government-forced nexus between the petitioners and these others also served to foist upon the petitioners the heinousness assigned to the crimes of these confessed and convicted. The world had already been told by Fuchs' sentencing judge that his crime "is only thinly differentiated from high treason." N.Y. Times, March 2, 1950, p. 1 (Ex. III-A-1). Gold had confessed his "deep and horrible remorse." N.Y. Journal American, December 9, 1950, p. 1 (Ex. XII-B-4). And District Judge Irving Kaufman's widely reported remarks on the sentence of Brothman and Moskowitz, termed their alleged crime "beyond . . . comprehension that anyone would commit." N.Y. Times, November 29, 1950, p. 25 (Ex XI-A-7).

The gravity of the crimes of those prior accused, which thus necessarily adhered to the petitioners, was qualitatively heightened by constant references to them as "traitors" and the continuous iteration, as to the Americans, that their crimes subjected them to the death penalty. e.g.: N.Y. Daily News, October 19, 1950, p. 3 (Ex. X-C-2); N.Y. Daily Mirror, May 25, 1950, p. 1, 3 (Ex. V-D-8); ibid, July 21, 1950, p. 2 (Ex. VII-D-6); ibid, October 19, 1950, p. 5 (Ex. X-C-2); N.Y. Journal American, June 9, 1950, p. 1 (Ex. VI-E-1); ibid, July 20, 1950, p. 1 (Ex. VII-E-5); N.Y. Times, June 17, 1950, p. 1 (Ex. VI-A-13); ibid, July 21, 1950, p. 6 (Ex. VII-A-7); N.Y. Daily News, June 17, 1950, p. 1 (Ex. VI-C-4); N.Y. Journal

American, October 18, 1950, p. 1 (Ex. X-E-2); ibid, March 7, 1951, p. 6 (Ex. KV-E-2); N.Y. World Telegram and Sun, October 18, 1950, p. 43 (Ex. X-P-3); N.Y. Post, August 17, 1950, p. 4 (Ex. VIII-C-3); ibid, August 25, 1950, p. 23 (Ex. VIII-C-5); ibid, August 25, 1950, p. 56 (Ex. VIII-C-6); ibid, November 24, 1950, p. 48 (Ex. XI-C-8); N.Y. Herald Tribune, June 24, 1950 (Ex. I-E-10); N.Y. Daily News, June 17, 1950, p. 1 (Ex. VI-C-4); ibid, July 19, 1950, p. 6 (Ex. VII-C-2); N.Y. Journal American, June 21, 1950, p. 31 (Ex. VI-E-8); ibid, June 23, 1950, p. 4 (Ex. VI-E-9); ibid, December 10, 1950, p. 1 (Ex. XII-C-5); N.Y. Post, December 7, 1950, p. 5 (Ex. XII-C-1).

Puchs, Gold and Greenblatt had also acknowledged either their Communist or former Communist affiliations or sympathy for the plight or objectives of the peoples of the Soviet Union. Brothman and Kozowitz, who neither "confessed," nor testified at their trial, were nevertheless subjected to pretrial charges of their Communist affiliations, and these were made matters of proof by the prosecution through the witness Bentley.

p. 22 (Ex. XI-F-5); N.Y. Post, November 22, 1950, p. 4 (Ex. XI-G-7); ibid, November 24, 1950, p. 4f (Ex. XI-G-8); ibid, November 28, 1950, p. 3 (Ex. XI-G-3).

The press campaign as it was specifically applied to the petitioners was inspired, almost entirely, by the prosecuting arm of the Government, by material "fed to" the newspapers.

Long before the petitioners were brought to trial in the early part of March, 1951 and commencing with their respective arrests, the Government had already tried their case in the newspapers, through the issuance of ex parte announcements on each of the essential issues which later arose in the trial. The initial blow was a joint announcement by Hoover and J. Howard McGrath, then Attorney General. The subsequent releases emanated from Saypol and his assistants.

These announcements transcended the actual charges contained in the indictment, egregiously magnified the seriousness of the alleged crime and conveyed the official conviction of the petitioners' guilt of the crime charged. To give merely two instances:--Though the indictment did not charge the petitioners with "intent to injure" the United States, the prosecutive and investigative agents of the Government made this public pre-trial accusation; though neither Dr. Klaus Fuchs nor Alfred Dean Slack nor Brothman and Moskowitz were named as defendants or co-conspirators in the indictment against the petitioners (and it cannot be contended that these were the "other unknown" co-conspirators, as stated in the indictment), these officials made this accusation as part of their pre-trial public presentation.

On the date of the arrest of the petitioner, Julius Rosenberg, the Hoover statement, published in every metropolitan newspaper, said that Julius Rosenberg was

"another important link in the Soviet espionage apparatus that includes Dr. Klaus Fuchs...Harry Gold...Alfred Dean Slack...and David Greenglass..." N.Y. Times, July 18, 1950, p. 1 (Ex. VII-A-3). See also: N.Y. Herald Tribune, July 18, 1950, p. 1 (Ex. VII-B-1); ibid, July 19, 1950 (Ex. VII-B-2); N.Y. Daily News, July 18, 1950, p. 1 (Ex. VII-C-1); N.Y. Daily Mirror, July 18, 1950, pp. 1, 2 (Ex. VII-D-2-4); N.Y. Journal American, July 18, 1950, p. 1 (Ex. VII-E-3); N.Y. Post, July 18, 1950, p. 2 (Ex. VII-G-1). The N.Y. Daily News for July 18, 1950 stated that "Hoover's announcement of the Rosenbergs' arrest declared that the suspect was part of the ring that included Fuchs, British nuclear physicist and three other Americans, Gold, David Greenglass...and Alfred Dean Slack."

His statement was also quoted by the N.Y. Times of July 18, 1950 to the effect: "that the gravity of Rosenberg's offense was accentuated by the fact that he--an American born citizen aggressively sought means to secretly conspire with the Soviet Government to the detriment of his own country."

As reported by the N.Y. Times, among other newspapers, on July 20, 1950, p. 18 (Ex. VII-A-6) "authoritative sources" were quoted as saying that "Rosenberg had contacts with other persons besides his brother-in-law, David Greenglass." Saypol, then a few days later, stated: "Rosenberg is involved in a situation which has intensive ramifications." N.Y. Daily Mirror, August 1, 1950, p. 4 (Ex. VIII-D-1).

On and after the arrest of the co-defendant, Morton Sobell, statements again were attributed to Saypol, and never denied by him, that Sobell was a "close personal friend of Julius Rosenberg;" that Rosenberg "recruited

MVSD

Sobell as a member of the ring;" and "told Sobell to leave the country." No such evidence was ever produced at the trial. Indeed, it is undisputed that Rosenberg was already in custody before Sobell allegedly fled the country.

N.Y. Times, August 19, 1950, p. 1 (Ex. VIII-A-19); ibid, August 24, 1950, p. 20 (Ex. VIII-A-25); N.Y. Herald Tribune, August 20, 1950, p. 16 (Ex. VIII-P-9); N.Y. Post, August 18, 1950, p. 2 (Ex. VIII-G-4).

Above all, by means of revealing, in detail, all of the prosecution evidence to be presented in Court, the officials of the United States Government, responsible for the prosecution of the case against the petitioners, induced the public to accept their estimate of the guilt of the petitioners. The trial itself became a mere formality, to give judicial confirmation to evidence already imbedded in the memory of the jury.

On the day of the arrest of the petitioner, Julius Rosenberg, Mr. Hoover's announcement stated that their investigation revealed, according to the N.Y. Times of July 18, 1950, pp. 1, 8 (Ex. VII-A-3):

"Mr. Hoover related that Rosenberg recruited Greenglass to make secret technical information available both to Gold and Rosenberg in 1945."

"Mr. Hoover said that Rosenberg gave Greenglass specific information on the type of atomic data the Russians desired."

"According to Mr. Hoover, Rosenberg early in 1945 gave, Greenglass, while the latter was on furlough in New York, one half of an irregularly cut Hello box top. The other half of the top was given by Rosenberg to Harry Gold in Albuquerque, N.M. This was done so Gold could identify himself to Greenglass.

"When Gold and Greenglass met in June of 1945 Greenglass was paid \$500 by Gold, who got it from his Soviet superior, Anatoli A. Yakovlev, vice consul of the Soviet Consulate in New York."

"Greenglass, Mr. Hoover said, turned over to Gold secret information he had secured from the atomic bomb project at Los Alamos, where Greenglass was stationed as a soldier.

"After Dr. Fuchs and Gold were arrested in February and May, respectively, Greenglass was warned by Rosenberg to leave the country. The F.B.I. said that he instructed Greenglass to obtain a passport to Mexico. He was then told to make his way to Switzerland and report to the Czechoslovakian embassy there."

"However, Greenglass was arrested shortly after he got these instructions from Rosenberg."

Similar accounts of the Hoover statement were reported in all other newspapers for that date cited in the paragraphs immediately prior to this one.

In statements issued to the press at or after the various proceedings which followed the arrest of the petitioner, Julius Rosenberg, and the subsequent arrest of the petitioner, Ethel Rosenberg, further revelations of evidence were made by the prosecuting attorney, Saypol. On the proceedings for pleading to the indictment against the petitioners, Saypol was quoted as having given the following information:

"Mr. Saypol said that the Rosenbergs were active in recruiting espionage agents for the Soviet Government. He added that after Gold's arrest, Rosenberg tried to persuade the Greenglasses to flee to Russia. The Rosenbergs were preparing to leave themselves when Rosenberg was arrested."

He added:

"The conspiracy in the main centered around a plot to obtain secretive and classified data and information concerning the atom bomb project at Los Alamos...the objective was to turn over to the agents of the Russian Government the information obtained."

N. Y. Times, August 18, 1950, p. 7 (Ex. VIII-A-18); N.Y. Herald Tribune, August 18, 1950, (Ex. VIII-B-7); N.Y. Daily News, August 18, 1950, p. 23 (Ex. VIII-C-4).

N.Y. Daily Mirror, August 18, 1950, p. 2 (Ex. VIII-D-10);
N.Y. Journal American, August 17, 1950, p. 3 (Ex. VIII-E-9).

On the arrest of the co-defendant, Morton Sobell Saypol announced in New York "that Sobell had many dealings with Rosenberg in the conspiracy to supply Russia with atomic secrets." N.Y. Times, August 19, 1950, p. 1 (Ex. III-A-19); N.Y. Herald Tribune, August 19, 1950, p. 1 (Ex. III-B-8); ibid, August 20, 1950, p. 16 (Ex. VIII-B-9); N.Y. Daily News, August 19, 1950, p. 2 (Ex. VIII-C-5); N.Y. Daily Mirror, August 19, 1950, p. 2 (Ex. VIII-D-11); N.Y. Journal American, August 19, 1950, p. 1 (Ex. VIII-E-12); N.Y. Post, August 18, 1950, p. 2 (Ex. VIII-G-4); ibid, August 20, 1950, p. 23 (Ex. VIII-G-5).

Likewise, the authorities infected the public attitude by their pre-trial characterizations of the petitioners as Communists and their motivation and intent to be grounded on ideological considerations. Hoover's public statement was carried in the metropolitan press in the following way:

"The FBI investigation revealed, Mr. Hoover said, that Rosenberg made himself available to Soviet espionage agents so he could do the work he was slated for and so he might do something to help Russia." N.Y. Times, July 18, 1950, p. 1 (Ex. VII-A-3).

"...The FBI disclosed that its agents had been trailing Rosenberg for several years. According to the FBI he had worked as an engineering inspector for the Army Signal Corps during the war but was dismissed in 1945 on suspicion that he was a Communist Party member...The FBI began to watch him. It became especially suspicious of him when he broke all open connections with the Communist Party in 1948 even cancelling his subscription to the Daily Worker." Ibid, July 23, 1950 (Rev. of Wk.) p. 2E (Ex. VII-A-8).

"The FBI announcement said he (Rosenberg) was removed as associate engineering inspector by the Secretary of War in Feb. 1945 on the recommendation of his Commanding Officer on the basis of information indicating Communist Party membership...The FBI Director added that the inquiry to date indicated that Rosenberg made himself

available to Soviet Agents (so he could do the work he felt he was slated for) and "do something to directly help Russia." N.Y. Herald Tribune, July 18, 1950, p. 1 (Ex. VII-E-1); ibid, July 19, 1950 (Ex. VII-E-2).

"The FBI quoted Rosenberg as saying 'I wanted to do something to directly help Russia'." N.Y. Daily News, July 18, 1950, pp. 1, 24 (Ex. VII-C-1).

"Rosenberg's red affiliation was known as far back as Feb. 9, 1945, Hoover said, when he was discharged as an engineering inspector from the Army Signal Corps on information indicating he was a member of the Communist Party." N.Y. Journal American, July 18, 1950, pp. 1, 8 (Ex. VII-E-3, 4).

"Rosenberg at that time was an associate engineering inspector for the Army Signal Corps. He was fired by the War Secretary in 1945 on information that he was a card-carrying Communist." N.Y. Post, July 18, 1950, pp. 2, 14 (Ex. VII-G-1).

On the basis of the Government's announcements the press took up the hue and cry against the petitioners, independently embellished the stories, and featured independent commentaries and editorials with respect to Soviet spying. They connected the petitioners with the "Fuchs-Gold" espionage ring, and pounced upon their alleged Communist affiliations and beliefs, and inflated the F.B.I. appraisal of the injury inflicted on our country by reason of the alleged espionage activities of the petitioners.

This is apparent in all of the newspaper articles and commentaries to which we have referred above. And as the eve of the trial of the petitioners approached, the press was still permeated with vivid accounts and graphic pictorials of the effects of atomic attack upon the New York city population (See e.g.: Exhibits XIII-A to XV-A).

Thus, the prosecuting and investigative officials of the Department of Justice "caused and stimulated . . . massive pre-trial publicity." All of this evidence pointed to the "guilt of the offenses charged in the indictment." Some of the damaging evidence could never have been properly introduced at the trial of the petitioners, because it related to matters outside the scope of the

charge.

This pre-trial publicity was prosecution without defense. In effect, it was not only testimony without cross-examination, but a special public sponsorship by the F.B.I. -- weighted by its prestige and reputation for infallibility -- of the credibility of the prosecution witnesses. It was a presentation of evidence untempered, unchallenged or minimized by evidence offered by the accused. It was, in short, the kind of circumstances, which the court in the Elaney case, stated was conducive to public "preconceptions as to probable guilt," which must vitiate the conviction.

THE PERL INDICTMENT

SIXTEENTH: The unfair tactics of the Government, which preceded the trial, in influencing the community, were climaxed with a coup in the very midst of the trial proceedings, in the form of the indictment of one, William Perl.

The trial of the petitioners commenced on March 6, 1951 and terminated when the jury returned a verdict of guilty on March 29, 1951.

On March 15, 1951, a sensational story broke in the entire metropolitan press of New York City concerning the indictment, returned in the U.S. District Court of the Southern District of New York against Perl, for the crime of perjury.

Four counts were reported to be contained in the indictment. The first count related to false testimony Perl allegedly gave before the Grand Jury with respect to material matter as to his knowledge of the co-defendant Morton Sobell. The second count made similar charges with respect to matter as to his knowledge of Helene Ellitcher, wife of Max Ellitcher. Mrs. Ellitcher had been listed as a proposed Government witness (R. 51-2). Ellitcher had already

completed his testimony as a Government witness in the trial, on March 9 (R. 197-388). The third count made similar charges with respect to matter as to his knowledge of the petitioner, Julius Rosenberg. The fourth count made similar charges with respect to matter as to his knowledge of Ann and Michael Sidorovich (wife and husband). This latter couple had likewise been listed on the Government's roll of witnesses (R. 51-2).

The falsity of the testimony was alleged to be Perl's sworn denial of his knowledge of any of these persons on his appearances before the Grand Jury on August 18, 1950 (first three counts) and on September 11, 1950 (fourth count), in the course of its inquiry into "Soviet espionage."

The metropolitan press bannered the Perl indictment. It was the front page story of the day. The New York Times headlined its story: "COLUMBIA TEACHER ARRESTED, LINKED TO 2 ON TRIAL AS SPIES." The sub-head read: "Physicist called perjurer in denying that he knew Rosenberg or Sobell." (Ex. XV-A-9). The New York Daily News' front page read: "EAD NEW YORK PROF IN SPY PROBE." The story itself appeared on page 2 under the caption "Columbia instructor nabbed by FBI as atom-plot perjurer." (Ex. XV-C-10). The New York Daily Mirror blared: "COLUMBIA PROFESSOR SEIZED BY FBI," accompanied by adjoining pictures of William Perl and petitioners in handcuffs. The companion story was headed: "College Scientist arrested as liar in atom spy case" (Ex. XV-D-7). The New York World Telegram and Sun likewise featured its story with: "COLUMBIA PROF HELD IN TRIAL AS SPY LINK," with the sub-head "U.S. says he had been urged to go abroad" (Ex. XV-P-8); the N.Y. Herald Tribune headlined its story: "COLUMBIA INSTRUCTOR ARRESTED FOR PERJURY IN ATOM SPY CASE," followed by sub-title "FBI

seizes William Perl; 4 count indictment based on denial he knew Rosenberg, "Sobell." Alongside the story was a large picture of Perl. (Ex. XV-B-8). On Page 4 of the N.Y. Post of this day was a full length picture of Perl with the caption "Columbia University scientist held in \$20,000 bail on a perjury charge." (Ex. XV-C-8). The N.Y. Journal American, p. 1, introduced its story: "COLUMBIA INSTRUCTOR ARRESTED ON PERJURY CHARGE IN ATOM SPY" (Ex. XV-B-10).

The N.Y. Daily News story connected Perl with Gold, one of the prosecution witnesses in the trial against the petitioners and the "spy ring on trial." It continued: "He was charged with denying before the Grand Jury last August and September that he knew Julius Rosenberg . . . and Morton Sobell, now on trial on espionage charges . . . the FBI said he was a classmate of Rosenberg and Sobell at City College . . ." There followed, in the same account, a resume of the testimony that had theretofore been given on the trial of the petitioners.

The N.Y. Daily Mirror story stated, among other things, that "a young Columbia University scientist, described by the U.S. Attorney's Office as one of the nation's top specialists in aerodynamics and jet propulsion was arrested by the FBI last night on a four-count perjury indictment linking him with the current atomic espionage case . . . Dr. William Perl, 32, of Russian, Polish extraction (sic) was taken into custody . . . Perl was indicted Tuesday by the Federal Grand Jury investigating the atom spy ring, charged with denying acquaintance with his former CCNY schoolmates, Julius Rosenberg, and Morton Sobell, defendants in the espionage case being tried in Federal court here . . . Perl, in his testimony before the Grand Jury on August 18 and September 11, 1950, also denied

knowing Michael and Ann Sidorovich of Cleveland, Ohio and Max and Helene Flitcher of . . . Flushing. The Sidorovich's, according to trial testimony of former army sergeant David Greenglass and his wife Ruth were supposed to act as couriers between Cleveland and New York, a job subsequently given to Harry Gold, also a defendant . . . Perl, Rosenberg, Sobell and Flitcher, all attended SONY. . . In Washington, FBI director J. Edgar Hoover said Perl had been under investigation since shortly after the arrest of Harry Gold in May, 1950. The arrest of Gold, Rosenberg, his wife, Ethel, and Sobell followed the capture of Dr. Klaus Fuchs in England . . . Asked whether Perl is believed to have turned aeronautic secrets over to the spy ring members, U.S. Attorney Seppol commented "all I can say is that he was indicted in connection with the probe of a Soviet atomic spy ring some of whose members are now on trial." There followed a recapitulation of the testimony of Ruth Greenglass which had been given on the trial of the petitioners on March 14, 1951, the day before. It must be recalled that her testimony had not been completed and the record shows that she was in the midst of cross examination when the news of the indictment became public (R. 756).

The N.Y. World Telegram and Sun story stressed: "William Perl, jet propulsion scientist and physics instructor at Columbia University today pled innocent to a 4 count perjury indictment in connection with current atomic espionage trial." It added he was charged "with having lied when he told a Federal Grand Jury he did not know Julius Rosenberg and Morton Sobell."

The N.Y. Herald Tribune story had this comment: "William Perl, 32, an instructor in physics at Columbia University was arrested here last night by agents of the

Federal Bureau of Investigation on a sealed indictment charging him with perjury in connection with a spy ring transmitting atomic secrets to Russia...our count indictment accuses him of lying when he denied he knew Julius Rosenberg, Ethel Rosenberg and Morton Sobell, 2 of the 3 in a trial now entering its eighth day at the U.S. courthouse here, in which they were accused of a war-time conspiracy to steal atomic secrets for Russia...Mr. Perl was a classmate of both Rosenberg and Sobell at City College...the other two counts accused him of denying that he knew Mr. and Mrs. Michael Sidorovich and Mrs. Helene Fletcher who have already appeared as witnesses for the government in the current espionage trial. The record shows that these three people were never called, by the Government to testify. All four of the alleged perjuries were said to have been committed before the Grand Jury August 10 and September 11." The remainder of this story spilled over into an account of the testimony that had been offered in the trial of three petitioners the day before.

The N.Y. Post story was headlined "PERL IS HELD AS LIED IN A SPY TRAIL ALONE", and sub-headed: "Willie Perl...was held today...on a perjury indictment growing out of the atomic spy trial". The story indicated that Perl was about to flee the country and introduces one, Vivian Rosenthal, who "has been listed by the government as one of the witnesses to be called in the espionage conspiracy trial of Julius Rosenberg, his wife, Ethel, and Morton Sobell...Perl is accused...of lying...by denying that he knew Rosenberg, Sobell and all other persons who have been questioned in the espionage case... Foley [an Assistant U.S. Attorney] asserted: "Perl...is afraid...has admitted in my presence that he lied to the grand jury...".

Despite his denial that he knew Rosenberg and Sobell on trial for their lives with Mrs. Rosenberg. "The P.D. said that Perl was his classmate...".

The N.Y. Journal American quotes U.S. Attorney Saypol as stating that Perl "was part of the whole Hitler spy investigation and was given money by Vivian Glassner to flee the country." It recites further that the perjury was based upon Perl's statement to the Grand Jury that he did not know Sobell, the Rosenbergs or the Glitzers. "The D.A. continued to explain that Perl was a college classmate of Sobell, Rosenberg and Ethel." "The dark wavy haired Perl has been urged by the Government for the past month to be a prosecution witness in the current spy case...It was learned he became more and more obstinate though his name was on the list of prospective Federal witnesses handed over to the defense, and flatly refused to testify." The story refers to the parents of Perl as a "Russian" father and a "Polish" mother.

Perl's alleged perjury was committed six months before he was indicted. If Asst. U.S. Attorney Foley is to be believed Perl had admitted to the authorities that he had lied.

The inquiry naturally arises as to the reason the Government waited six months before causing an indictment to be returned against Perl and why the indictment was unsealed in the course of the petitioners' trial. There is no indication that Perl told the Government or any agent of the Government anything other than what he told the Grand Jury on his appearances before that body in August and September of the previous year.

The docket in the Perl case (C-135-43) shows that

the indictment against Perl was returned on March 13, 1951 and filed and ordered sealed by Judge Colgate, who was then sitting in the Criminal Court which usually disposes of such matters.

Nevertheless, the sealed indictment was not ordered opened until the following day. It was then opened and a bench warrant issued, not by Judge Colgate, but by Judge Irving Kaufman, the presiding judge in the petitioners' trial.

This deviation from normal procedure must be related to the circumstances that David Greenglass, the Government's key witness against the petitioners, had been on the stand testifying for the Government on March 13, and March 14, 1951, the day of, and the day following, the return of the sealed indictment. His examination was concluded on March 14, 1951. Ruth Greenglass, also a key prosecution witness had completed her direct testimony and was in the midst of her cross examination by the close of the court day of March 14. Perl was apprehended the night of March 14 and arraigned March 15.

The timing of the release of the indictment becomes significant when one considers the statement made to the press by prosecuting attorney, Saypol, when Perl's indictment was made public. He said:

"Mr. Saypol said that Perl had been listed by the Government as a prosecution witness in the current espionage trial. His special role on the stand, Mr. Saypol added was to corroborate certain statements made by David Greenglass and the latter's wife, who are key Government witnesses at the trial."

Further insight into the timing of the indictment and clarification of Saypol's position are found in the parallel lines of the statements concerning the perjuries of William Perl issued to the press, and the testimony of David Greenglass on the witness stand at the petitioners' trial.

for M

Greenglass (and his wife) had testified that Rosenberg stated to them that Arn Sidorovich was an espionage courier (R. 443-50, 686-90). It will be recalled that the press stressed the count in Perl's indictment that he had lied concerning his knowledge of the Sidorovites, and coupled this with his alleged perjury with respect to his knowledge of the traitor Julius Rosenberg.

David Greenglass testified further that Rosenberg had admitted to him that he had espionage contacts in Cleveland where Perl apparently resided and where, concededly, the Sidorovites lived (R. 514-17). The Government's claim that Perl lied would lend support to this testimony of the Green-
glasses.

Moreover the subject of Perl and the Sidorovites became important in the cross examination of Julius Rosenberg when he took the stand in his own defense. Saypol queried him sharply about his knowledge of Perl, which in the face of the indictment that had then been returned - March 15, was prejudicial on its face (R. 1159-60). (Saypol apparently understood this, since, after the formalities, it was the first question he posed on cross.)

But Saypol went further in his cross examination and inquired whether Rosenberg gave Vivian Glassman \$2,000 to give to an alleged confederate in Cleveland (R. 1193-1198). It will be remembered that the newspaper accounts stated that the purpose of the alleged Vivian Glassman trip was to give money to Perl. This was, per se, a poisonous injection into the trial which could only prejudice the petitioners in the minds of the jury.

That this coup of the prosecution is causing the indictment of Perl, when it did, cannot be discounted off as a

routine criminal proceeding was made apparent only by events which occurred--and became known to the petitioners--subsequent to the termination of their trial.

The docket in the Perl case records that Perl has not yet been brought to trial although he has been present for a speedy trial. At the time of Perl's arraignment, on March 15, 1951, John W. Foley, Assistant U.S. Attorney, also a counsel of record for the Government in the trial of the petitioners, stated to the Court:

"The Government is ready to proceed on April 2nd. However, counsel for the defendant has advised me that he is going to be engaged through the 8th of April and he would not be ready for trial until the 16th or 17th of April. The Government has no objection to the date defense counsel suggests."

The Government, however, has avoided a trial. According to Perl's uncontradicted statements in affidavits submitted in support of motions to compel a speedy trial, the Government refused to proceed on a trial date set for June 16, 1951, and, again on October 4, 1951, to which date the trial had been adjourned, when the case was marked off the calendar.

The U.S. Attorney's office, as noted above, had declared, at the arraignment of Perl which occurred during the pendency of the petitioners' trial, that it was "ready to proceed on April 2," (1951), but has since objected to going to trial even a year later--in June 1952.

In an affidavit submitted on May 26, 1951, by Robert Martin, Assistant U.S. Attorney, we find the following language:

"The reason that the case has not been brought to trial to date is because, among other reasons, which may not properly be declared at this time, the U.S. Attorney believes it desirable to have all aspects of the Rosenberg and Sorell prosecution completed before commencing prosecution in the related cases."

He further states in a supplementary affidavit on
June 1, 1952:

"The offense charged in the indictment of this case is one of the most serious import. The defendant is a physicist and a leading specialist in espionage. He has done work in fields of top military secrecy. He is charged with perjury in that he denied knowing, before a Grand Jury investigating espionage, persons who have subsequently been convicted of espionage as espionage on behalf of the Soviet Union. The prosecution in the espionage case, that against Julius Rosenberg has not been completed and is presently awaiting possible application for review by the Supreme Court. The U.S. has deemed it unwise to proceed further and reveal proof in this perjury case until the Rosenberg case and related matters have been concluded."

This constitutes a surprising change in the Government's attitude, for on March 30, 1950, in arguing against the motion for a Bill of Particulars, the U.S. Attorney Foley had stated:

"If this were an unusually difficult case, if it was a complicated factual situation, if it required great pains in preparing for trial, then I could understand the defense counsel's predicament. I would not agree with their contention, however. But this is such a simple case, your Honor, I do not see why any unusual allowance should be made in a Bill of Particulars."

The only reasonable conclusions that can be drawn from this concatenation of events are either: (1) the Government acted in bad faith in causing an indictment to be returned against Perl and timed its release to prejudice the petitioners before the jury at their trial, or (2) that the evidence that might have been elicited on Perl's trial would have tended to exculpate the petitioners in their case.

The Court has before it the question as to whether or not these actions in the Perl indictment represents a fraud upon the Court. But whether or not there was mala fides, there was imposition on the administration of justice, by the timing of the Perl Indictment, under the circumstances above described.

Its effect was highly prejudicial and could only have further inflamed the jury against the petitioners, and deprived them of that fair trial guaranteed to them under the Fifth and Sixth Amendments to the Constitution of the United States.

II

SIXTH AMENDMENT: The case against the petitioners was built upon perjured testimony. The prosecution, as will be pointed out below, must have known that the testimony was false.

The incidents recited below, singly and together, give indication that the entire prosecution was initiated with fraud. In combination with the extra-judicial tactics of the Government to prejudice the petitioners in a trial by newspaper, and the letter discussed in Point III below, it is made readily apparent that the petitioners--who stand to forfeit their lives--were the subjects of a monstrous miscarriage of justice.

THE CASE OF DAVID GREENGLASS

COMMITTEE: David Greenglass was apprehended in the early afternoon of June 15, 1950 (R. 567).

He testified that, in the evening of June 15 and the early hours of June 16, he revealed to the authorities truthful information concerning his illegal activities at Los Alamos and elsewhere.

During questioning by the Court, Greenglass testified as follows:

- Q. Well, did you conscientiously withhold any facts that night?
- A. No, I did not conscientiously withhold those facts.
- Q. And did you conscientiously tell substantially what you have told in court these past few days?
- A. That I did, and in other statements, because I couldn't remember at once.
- Q. Well, when you left that evening, was there any understanding that you would make a subsequent statement?
- A. I suppose there was.

Q. I don't want to know whether you suppose.

A. Yes, there was an understanding to that effect. I said to them 'that is to the best of my knowledge at this time'." (R. 577-78).

Immediately, after his apprehension, Greenglass arranged to retain the firm of O. John Rogge, Esq., as his attorneys (R. 596), and the following day paid Rogge a retainer of \$4,000 to represent him (R. 732, 754). Greenglass was allowed to testify further, under cross-examination, as follows:

"Q. Didn't you tell your lawyer to fight this case for you?

A. I did not." (R. 596).

"Greenglass' answers to the above questions were false and perjurious and known to be such by the prosecution.

It was only during the proceedings on Greenglass' sentence, which took place after the case against the petitioners had been fully closed and sentence against them had been pronounced, that this testimony was belied.

At that time, Saypol, the United States Attorney, in active and chief charge of the prosecution, addressed the court as follows:

"When David Greenglass was arrested after the first indictment in the State of New Mexico, I remember well how at his arraignment before the Commissioner in this District Mr. Rogge protested his innocence. Mr. Ruth Greenglass, his wife, gave the subsequent recantation of those protestations, their representation and the disclosure of the facts by both of them..." (R. 1623).

The facts comport with Saypol's comments. It is significant, however, that in view of the trial till Saypol made any attempts to correct the falsity.

Greenglass was the key Government witness against the petitioners. A sharp issue was presented to the jury. Its determination was necessarily based upon an evaluation of the credibility of the testimony of Greenglass as against the

the credibility of the testimony of the petitioners, which testimony was in direct conflict on the basic issues of the case. Not only would his failure to "confess" immediately have impaired Greenglass' credibility, but it would have enabled the defense to inspect the first statements that Greenglass allegedly gave to the authorities on his apprehension, that may have further exposed this witness.

On the afternoon of June 16, Greenglass was arraigned and Mr. Roosse, appearing as his counsel, demanded law bail (R. 594). The United States Attorney opposed the application and Greenglass was then locked in the West Street detention house and placed in solitary confinement (R. 596-97).

In the meantime and on the morning of June 17, the petitioner Julius Rosenberg was requested by the P.C.T. representatives to be interviewed at the Federal Building (R. 1137). Upon compliance with the request, this petitioner was questioned for a number of hours, but was not detained (R. 1137-41). He left the building, unchallenged and unrestrained (R. 1141).

On June 18, two days later, Greenglass' wife, Ruth Greenglass, the second most important Government witness, consulted with Roosse (R. 732). About a day later, Greenglass was removed from his confined quarters and restored to the usual privileges of prisoners (R. 598-99).

Mrs. Greenglass continued in regular consultation with Roosse (R. 772-80). In the middle of July, she "willingly" cooperated this lawyer to attend a pre-arranged conference at the office of the United States Attorney, Greenglass being brought in to attend (R. 742-43). There were present at this conference Faigel, his chief assistant, Zere, and agents of the F.B.I. It is interesting to note that in contrast to other witnesses, Mrs. Greenglass' first interview took place in the

office of the United States Attorney rather than in the office of the F.B.I. (R. 742). Both David and Ruth Greenglass were vague about the subjects of discussion at this meeting (R. 701-2, 743), but in the wake of the conference three events ensued. Mrs. Greenglass, with her lawyer, returned the next day to talk with F.B.I. agents and the day following signed a prepared statement (R. 743). The petitioner Julius Rosenberg was arrested within a few days thereafter. Greenglass was transferred from the Federal House of Detention at Post Street to the Combs (R. 593-59). From that time Greenglass became a frequent visitor at the Federal Building and signed "six" or "seven" statements and, in addition made many unwritten statements (R. 704). Mrs. Greenglass remained and continues to remain a free woman (R. 740).

When Rogge, on Greenglass' sentence, made his plea for leniency, he declared:

"...now with this background what I do want to emphasize is that David did cooperate with the Government and almost from the outset" (R. 1628).

He further stated that he represented at least six people who were active for the prosecution in this case -- the Greenglasses, Max Elchler (the first witness against the petitioners at the trial) and Elchler's wife (who was named on the Government's list of witnesses but not called), Louis Abel and Dorothy Abel, his wife (who were Government witnesses), and Helen Pagano (Mr. Rogge's secretary, who was likewise a Government witness) (R. 1629).

"Upon information and belief, Greenglass told Rogge, immediately after his apprehension and on a number of occasions thereafter, that he desired to defend himself against the charges. He also told Rogge and Ruth Greenglass, his wife,

immediately upon his apprehension and within a few days thereafter that he had deliberately told the F.B.I. conflicting stories at the time he was questioned upon his apprehension on the evening of June 15 and the early hours of June 16, 1950.

Were Roche or his associates to be subpoenaed it were the records of Roche's office and the office of the U.S. Attorney, to be produced in Court under a subpoena duces tecum, it will be disclosed that Rocheplace did not "cooperate" to the authorities at the time of his apprehension or within a few days thereafter and that, far from cooperating with the authorities he intended to withhold "cooperation" until he had effected a satisfactory deal for himself and his wife.

The suppression of the truth on the part of Greenglass at the petitioners' trial with the consent and acquiescence of the prosecuting officials constituted a fraud upon this Court and resulted in a conviction which is violative of petitioners' rights under the Fifth and Sixth Amendments to the Constitution of the United States.

CLAIMANT'S STATEMENT OF FACTS

EXHIBIT 2: Government's exhibits 2, 6, 7, and 8 were introduced in evidence on the basis of Greenglass' testimony.

Exhibit 2 was a purported replica of a sketch which Greenglass allegedly delivered to the petitioner, Julius Rosenberg in January, 1945. It purportedly represented a lens mold made at the Los Alamos project (a. k. a.).

Exhibits 6 and 7 were replicas of sketches of a lens mold in schematic view that were later purportedly developed at the Los Alamos project.

Exhibit 8 was a purported replica of a sketch of a cross-section of the "Nagasaki-type atomic bomb, a sketch of

which was allegedly delivered by Greenglass to the petitioner, Julius Rosenberg in, September, 1945 (R. 493-46).

These exhibits were made by Greenglass after his apprehension; Exhibit 2, immediately after his arrest; Exhibits 6, 7, and 8, prior to the petitioners' trial for trial purposes (R. 439-41, 440-41, 463).

Greenglass swore that these exhibits were prepared by him from memory alone and that he was not aided in preparing them by any person or by any reading matter furnished to him by the authorities or any other person. On cross-examination, his testimony was:

"Q. And when you drew the sketches--one of them I believe in June, 1950 and the other a day or two before you testified--and I think they are reflected and marked Government's Exhibits 2, 6 and 7--did you rely solely on your memory in making them?"

A. "I did."

"Q. Now, when was the last day that you worked on the Los Alamos project?"

A. "1945, February."

"Q. What month?"
A. "February."

"Q. That was about four and a half years ago."
A. "That's right."

"Q. And you relied solely on your memory?"
A. "I did." (T. 609)

"Q. Now, were you given any reference books or text books while you were in jail since your arrest, relating to any scientific subject?"

A. "No. I didn't--nobody gave me any."

"Q. Did you read any scientific books while you have been in jail?"

A. "Just science-fiction." (T. 410)

And again, in answer to the Court, he stated:

"The Court: ...let me ask you: These sketches that are in evidence, are they the product of your own mind?" (T. 410) "I mean, were you helped by anybody outside in drawing these sketches?"
The witness: "nobody else, just myself."

The Court: Did anybody tell you to change any line here or change any line there?

The witness: Nobody told me anything like that." (R. 411)

This testimony was perjurious and must have been known to the authorities to be false.

Since all of these exhibits were prepared by Greenglass after he was already in the custody of the United States Government, he could not have been killed or drafted by any person or reference books without the knowledge of the prosecuting authorities, or their agents.

Greenglass is a high school graduate, with no higher educational degree to his credit. He failed in the eight courses he took in a single semester at a polytechnical institution. His remaining adult education was confined to attendance for a year and one-half at a school of design. He never acquired a degree in science and engineering; nor has he ever taken any courses in calculus or advanced calculus, thermodynamics, nuclear or atomic physics, or quantum mechanics. He was a machinist by vocation in civilian life for a short time prior to his induction into the Army. During his army career he was assigned to work as a machinist. (I. #10-15).

Renowned scientists have read the testimony given by Greenglass, and considered it in light of: (a) the time lapse between the alleged production of the sketches in 1946 and their alleged reproduction almost six years later; and (b) his educational and vocational background and scientific knowledge, have attested as follows:

The affidavit of Dr. J. A. DODGE, Q.C., duly sworn to before a Consul of the United States in London, England on November 6th, 1952, annexed copy, states as follows and certified "Exhibit C", states that, "After due examination described, in his opinion, it would have been "impossible" for

Greenglass to have manufactured Exhibits 2, 6, 7 and 8 "relying solely on memory and without any outside aid".

The affidavit of THOMAS GREENGLASS, duly sworn to before a Consul of the United States at Manchester, England, on November 10, 1952, annexed hereto, made a part hereof and marked "Exhibit 7", states that, in the circumstances above described, in his opinion it is "incredible" that Greenglass "could reproduce, in any detail" Exhibits 2, 6 and 7, after a lapse of five or six years and "relying solely on his unaided memory"; and that it was "inconceivable" that Greenglass could reproduce Exhibit 8 "without the aid or assistance of any power or written matter or slip from any technical scientific source".

The affidavit of JACKIE S. KAPYNSKI, duly sworn to before a Vice-Consul of the United States, in Paris, France, on November 7, 1952, annexed hereto, made a part hereof and marked "Exhibit 8", states that, in the circumstances above described, in his opinion, it is "highly improbable" that Greenglass "could have reproduced in any detail" Exhibits 2, 6 and 7, after a lapse of five years "relying solely on his unaided memory"; and that it is "inconceivable" that Greenglass could have reproduced Exhibit 8, "relying solely on his unaided memory".

Upon information and belief, Greenglass was in consultation with the co-conspirator Gold and others while the two were lodged under the roof of the same institution or institutions either at the Federal House of Detention at 425 West Street, Borough of Manhattan or at the "Punks" at Centre Street, Borough of Manhattan. Some employees of these latter two institutions will, if subpoenaed, testify that books were brought in to places within these prison walls or in the Federal

building, Foley Square, New York City, for access to and reading by, Greenblatt, and, that he consulted with Gold and other persons for the purpose of enabling him to prepare exhibits 2, 6, 7 and 8.

These exhibits went to the attorneys of the case and the core of Greenblatt's testimony. As can well be understood, they constituted to the lay mind of the jury, most valuable evidence. The suppression board finds the truth, that a hearing on this petition will fully reveal, that these exhibits were literally "manufactured" for trial, is a most profound libel upon the court and a measure of the magnitude of the extent to which the evidence on which the petitioners were convicted was a result of fabrication.

SCHNEIDER TESTIMONY

TESTIMONY: The last witness for the Government, produced in rebuttal, was one, Ben Schneider. This witness' name did not appear on the Government's list of witnesses and the failure to give the petitioners advance notice, as required by statute, was excused on the ground that he was not known to the authorities until one day before the day he gave his testimony.

Schneider testified on March 27, 1950. He testified that he was first approached by F.B.I. agents the morning before and shown photographs of the petitioners, that he recognized them from those photographs, although on cross he admitted that he had seen but not recognized pictures of the petitioners which had appeared in the newspapers from the time of their arrest to the time he was approached by the F.B.I. He claimed the newspaper pictures were unrecognizable to him because they showed only a "front view", and the F.B.I. agents

had shown him "a front view and side view" (R. 1432).

On his direct examination Schneider testified in response to a question by the District Attorney, in part, as follows:

"Q. Did you then deliver it to Mr. Rosenberg?

A. Yes (R. 1429)."

This question referred to the witness' delivery to Rosenberg of passport photos allegedly taken by the petitioners and their two children in May or June, 1950, at the witness' photography shop at 99 Park Row, Manhattan, New York City.

Then the prosecutor asked the following questions and received the following answers from the witness:

"Q. Did he pay you?

A. That's right, Sir.

Q. And is that the last time you saw him before today?

A. That's right." (R. 1429) (emphasis ours)

Upon information and belief this testimony was perjurious. The ground of information and the source of belief are a book published after the trial of the petitioners, in 1952, by Oliver Pilat, entitled "The Atom Spies" (G. P. Putnam Sons, New York). On page 287 of this work the author states:

"Julius and his lawyer scoffed at the idea that the Rosenbergs ever had any notion of leaving the country. While Julius was still on the stand, an FBI agent brought into the courtroom a photographer from a shop hardly a block away who recalled somebody resembling the description of Rosenberg, with two wild kids, coming in for passport photos. He wanted a look at Rosenberg to be sure, and when he took the look, he nodded. He was the next witness, a devastating one. He described the wild behavior of the Rosenberg boys, then recalled that Rosenberg had boasted that his wife had just inherited a large sum from a relative in France, and that the family was planning a trip to Europe to collect the inheritance." (emphasis ours).

The petitioner Julius Rosenberg was on the stand on March 26. It is apparent that Schneider did see the Rosenbergs

for purposes of identification the day prior to his own testimony. It is a fair inference that the prosecuting officials aided him to come into the courtroom, in contravention of the trial Court's order excluding all witnesses from the court-room, except in the course of their testimony.

The prosecution authorities, therefore, knew that Schneider lied when he said that he had not seen the petitioner Julius Rosenberg from the time of the taking of the alleged photographs, in May or June, 1950, to the time he took the stand on March 28, 1951 and identified the petitioners in open court. On a hearing on this petition, the petitioners will be enabled to produce evidence of this knowing fraud upon the Court.

Schneider's testimony was a dramatic climax to the trial and introduced harmful and damaging evidence against the petitioners. It served to corroborate Greenglass' otherwise uncorroborated story, that the petitioners were intending to flee the country and that they were making preparations to accomplish that purpose by taking passport photos (R. 529). And it served to relate more directly to these petitioners evidence concerning the alleged "flight" of the co-defendant, Morton Sobell (R. 919-935).

Were it known to the jury that this "aid" to Schneider's recollection was necessary to accomplish his identification of the petitioners, it might have attached no credence to the testimony of this otherwise patently suspect witness.

The conviction of the petitioners was steeped in fraud aided and abetted by the prosecuting officials. It was an imposition on the court, the jury, the entire administration of criminal justice. This official condonation of false testimony must nullify the conviction which was obtained upon it.

III

THE "SECRET" OF THE ATOMIC BOMB
ALLEGED TO HAVE BEEN TRANSMITTED

THIRTY-FIRST: United States v. Heine, 151 F. 2d 813, 815 (C.C.A. 2nd, 1945) cert. den. 328 U.S. 833, construed the Espionage Act to read that, unless the information alleged to be the subject of transmittal--or conspiracy to transmit--to a foreign nation is "secret", no crime is committed under that law. "Secret" information, as defined by the Heine case and Gorin v. United States, 312 U.S. 19 (1941), has the meaning accorded to the more common usage: "classified" information.

The testimony at the trial of the witnesses Walter S. Koski and John A. Derry attested that the information, in the instant case, allegedly transmitted to the Soviet Union, and the subject of the alleged conspiracy to transmit, was "secret", classified matter (R. 466-86; 903-917).

The petitioners represent, as set forth below, that the United States Government or one or more of its agents, arbitrarily and capriciously classified the aforesaid material as "secret"; and that, in fact, it was not "secret", but widely known and published throughout the world - and, especially in the Soviet Union, the alleged beneficiary of the transmittal.

I. GENERAL STATEMENT ON THE SECRET OF THE ATOM BOMB

There were three principal military secrets of the atomic bomb.

The first of these was whether the existing technology in any country or group of countries could produce the needed materials in the quantity and of the purity required for the detonation process.

The second secret was whether such a bomb, if assembled, would actually explode, and explode with the violence •

which had been theoretically predicted.

The third secret was the rate of production of atomic bombs. Clearly, if only one or two could be produced every ten years, this weapon would be of minor military importance. On the other hand, if production of large numbers were possible in a reasonable period of time, the bomb would become an important factor in current military theory.

Any other so-called secrets were minor, subsidiary in character, or no secrets at all. For example, the necessary theoretical physics for the production of the bomb was never a secret. It was internationally known by 1940. H. D. Smyth in his well-known report on "Atomic Energy for Military Purposes", Princeton Univ. Press 1945, documents this point quite fully in his introductory chapter. After detailing the developments of theory which led to the decision to make atomic bombs, he states in paragraph 1.60:

"Looking backward on the year 1940, we see that all the prerequisites to a serious attack on the problem of producing atomic bombs and controlling atomic power were at hand. It had been proved that mass and energy were equivalent. It had been proved that the neutrons initiating fission of uranium reproduced themselves in the process and that therefore a multiplying chain reaction might occur with explosive force. To be sure, no one knew whether the required conditions could be achieved, but many scientists had clear ideas as to the problems involved and the direction in which solutions might be sought."

Of the three really important secrets, the first two were simultaneously revealed to the world when the Hiroshima bomb was exploded. The responsible authorities of the Manhattan Project quite clearly recognized that a very large part of the entire project was not a real secret by issuing the Smyth Report, and by the relatively prompt declassification of project material now being published by the McGraw-Hill Publishing Company of New York as a National Nuclear Energy Series. Some fifty volumes have already been published, or will be published soon.

The Smyth Report outlined all the basic steps involved in bomb production. It related, for example, the successful processes for the separation, in large quantity, of the critical isotope, uranium 235. It described many problems -- and their solutions -- associated with the pile; it told of the proper moderators to use for slowing down neutrons. It spoke in detail of the production of Plutonium 239, another explosive element. A section of the report was devoted to the principle of detonation of the bomb. The book included photographs of plants which had been built, and thus revealed the magnitude of the required facilities. In sum, it was a full, although qualitative, description of the most important technological problems which had been encountered, and of the methods of solution worked out in this country. It was published in 1945, shortly after the Hiroshima bomb was dropped, because what it related was not a secret.

The third major secret -- whether the bomb is a curiosity or a potentially important weapon -- has been revealed by the large number of bombs exploded for experimental purposes. Quite obviously, if the bomb production rate were one a year, any government would hesitate about detonating any considerable fraction of its stock-pile for experimental purposes.

This petition will demonstrate the following: it will first indicate the general problem of atomic bomb production in order to show the overall process and the inter-relations of its many parts. It will demonstrate that the details of the detonation mechanism are but a minuscule part of the whole gigantic operation. It will also show that the details of any particular detonating element need not be known to produce the bomb because there are many alternative paths.

It will then prove that the secret of the detonating mechanism -- allegedly the secret transmitted by David Greenglass to the U.S.S.R. -- is no secret at all.

At the time of the trial, it was held by the Government and its witness, Walter S. Koski, that the theory of "implosion" utilized for the purpose of assembling the critical mass of fissionable metal was invented and developed at the Los Alamos Project. The falsity of this statement will be shown by direct reference to the scientific and patent literature available prior to the initiation of the Manhattan Project.

II. GENERAL PROBLEM OF ATOM BOMB PRODUCTION

A. THE RELATIONSHIP OF THE DETONATING MECHANISM TO THE OVERALL PROCESS.

There are four major steps in the production of an atom bomb. These include: a) the preparation of the many pure compounds, metals and elements required at the start; b) the use of the starting materials for the preparation of the fissionable isotopes Uranium 235 and Plutonium 239; c) the conversion of these isotopes into pure metallic form operating now with small subcritical batches of material; and d) arranging the pure fissionable metal in a device so that at the appropriate time a mass in excess of the critical mass can be assembled with great speed and thus detonated.

To understand the magnitude of the effort and the multitude of paths by which one may proceed in developing an atom bomb, a brief review of processes at each level will be presented.

To make bombs a sizable quantity of pure Plutonium 239 or pure Uranium 235 is needed. This quantity must be as many times larger in its magnitude than the critical mass as are the number of bombs to be produced. The metal must be extremely pure. A bomb can be made from this very pure metal

utilizing at least three different methods: a) that of firing two subcritical masses together; b) that of compressing the critical mass from a sponge form to the very dense form of the metal; and c) that of suddenly placing a neutron reflector around a mass of metal not presently in the critical conditions. All three of these methods have been variously discussed as possibilities and we can see that in this final phase there are these three methods for achieving detonation. No doubt each was tried in a great variety of combinations.

Going to the step which precedes detonation, we come to the preparation of the pure fissionable metal. This step requires the preparation of metal in very small subcritical batches. It is evident that this is necessary, else otherwise a self-sustaining nuclear reaction would begin. The methods of preparing pure metals are many and are varied. To list only a few that are commonly used by chemists, there are the reduction methods of the halogen compounds of these metals by more active metals like sodium, potassium, calcium, magnesium, aluminum and so forth. There are also reduction methods utilizing an electrical current with which the metal is plated out on an electrode. All of these and others were no doubt tried.

The step which precedes the final preparation of the pure metal is obviously its synthesis. There are two general methods for effecting the synthesis of fissionable metals. The first of these is a direct separation of Uranium 235 from naturally occurring uranium. The second method is that of synthesizing an element like Plutonium 239 by a nuclear transformation of Uranium 238 into it, i.e., the method of synthesis in the pile. The first of these, that of concentrating the least abundant isotope of uranium, may be effected in a great many ways, all of which have been investi-

gated in this country and discussed in the Smyth Report. Among the methods discussed in that report were: a) Gaseous diffusion; b) Electro-magnetical separation; c) Centrifugation; d) Chemical exchange methods; e) Thermal diffusion methods. Each of these requires a huge plant and many subsidiary factories to make the necessary parts. Each one conservatively estimated would be more than a hundred million dollar industry.

Among the methods for producing plutonium in a pile one may use uranium with any one of a number of different moderators so that we would have the possibility of: a) a helium moderated pile; b) a heavy water moderated pile; c) a beryllium moderated pile; d) a graphite moderated pile. There are also the possibilities of operating breeder type piles which involve much less moderation of the neutrons to achieve their effect. In any event, there are at the stage of fissionable element synthesis nearly a dozen ways to proceed. Again each of these requires a gigantic plant and many subsidiary industries. The construction of each such plant is in the 250 million dollar class of expenditure. The step which precedes the element synthesis stage is the one in which the pure raw materials needed for this work are made. There are many different kinds of compounds needed in an atomic energy program and in many cases whole new industries must be created for the production of individual compounds. Of these we may list the preparation of pure uranium compounds such as uranyl nitrate, the uranium oxides, uranium hexafluoride, the preparation of pure uranium metal itself in tonnage quantities, the preparation of tonnage quantities of the rare isotope of hydrogen, i.e., deuterium, the preparation of extremely pure graphites of high specific gravity, the preparation of aluminum tubing and jacketing materials for the uranium slugs, all of which must be of the highest

chemical purity, the preparation of pure beryllium compounds, the preparation of tonnage quantities of many of the fission fragment chemicals. Most of these substances required the development of completely new plant processes in this country in order to have these ready as needed by the atomic energy program.

Now from the mere recital of these many different processes it may be seen that there are a vast multitude of ways by which one may arrive at the final production of the bomb. The policy of the United States during the war was to depend on no one process so that at none of the four critical stages could a bottleneck develop. Thus, at every stage a group of parallel efforts along different lines was made. Hence it can be seen that any single process, any single detail of any process, such as one particular method for atom bomb assembly, represents the most minute part of the whole program. The small effort involved in any particular method of atom bomb assembly, represents the most minute part of the whole program. The small effort involved in any particular method of atom bomb assembly is indicated by the much smaller staff assembled to work on the final phases of atom bomb construction. (In this connection see the Rabinowitch quotation below.)

It is evident, therefore, that for any country to produce atom bombs a highly developed technology is as essential as is a highly competent corps of theoreticians. This means that in a particular nation there must exist not only people with scientific, engineering and mechanical skills, but also the physical plant in different areas of manufacture, transportation, power, communication and other fields. By way of example, the following, among others, are essential:

- (a) A highly developed electrical industry, whether based on coal or hydro-electric power;
- (b) A highly developed and productive metallurgical industry, capable equally of making relatively large amounts of pure new metals like uranium, as well as conventional steel and other alloys required for construction and other phases of bomb manufacture;
- (c) A highly developed chemical industry, because of the necessity of making extremely pure materials in large quantity - whether carbon, heavy water, or fluorine.
- (d) A well-developed mechanical electronic and instrumental industry, in order to make the large numbers of precise controlling mechanisms which are obviously required for those parts of bomb manufacture (including isotope separation) which must be run automatically.
- (e) A large and efficient construction industry. One need only to look at the pictures of the Oak Ridge and Hanford plants which are reproduced in the Smyth Report (page 138) to realize that the bomb cannot be built in a mud hut.
- (f) A well-developed transportation industry. This is obviously necessary in order to schedule the orderly shipment and receipt of the tonnage quantities of raw, semi-finished and finished products and materials associated with bomb manufacture.

The vastness of the scientific, engineering and manufacturing effort which went into the making of the bomb must be realized for a true picture of what is involved.

The estimate has been made that some two billion dollars -- perhaps one per cent of our national income at the time -- was expended before the first bomb was exploded. It was an effort which required the cooperative efforts of several hundred thousand people with diverse skills. (Thus, the

population of Hanford, Washington, at the pile site, is given as 40,000 in 1944, Smyth Report, Page 146.) In short, in order to make atomic bombs, a nation must have a well-developed technology in all fields of engineering and manufacture, as well as a large corps of well-trained scientists, engineers and skilled workers.

This point is well made in the Smyth Report, in Chapter 13, Section 3 (page 224):

"Before the surrender of Germany there was always a chance that German scientists and engineers might be developing atomic bombs which would be sufficiently effective to alter the course of the war. There was, therefore, no choice but to work on them in this country. Initially many scientists could and did hope that some principle would emerge which would prove that atomic bombs were inherently impossible. This hope has faded gradually; fortunately in the same period the magnitude of the necessary industrial effort has been demonstrated so that the fear of German success weakened before the end came. By the same token, most of us are certain that the Japanese cannot develop and use this weapon effectively." (Our emphasis)

This statement is interesting and pertinent for several reasons. In the first place, the fear of German success most obviously did not abate because Germany did not have the necessary industrial plant. Merely to make the statement is to demonstrate its ridiculousness. The fear of German success decreased because Germany was in no position at the time to devote the necessary industrial plant (which she had) to making the bomb. The same can be said of the U.S.S.R. -- i.e., that almost all manufacturing facilities were devoted to the more immediate problems of getting out implements of warfare already tested in the field. It is primarily for this reason that the U.S.S.R. did not develop the bomb during the war -- because the large scale manufacturing effort could not then be made. It will be recalled that this was at a time when much of her industry was destroyed, a large part of her industrial areas overrun by the invader, and a frightening percentage of her people killed or under occupation.

With the end of the war, a reassessment of the desirability of making atomic fuels and explosives could be made. This reassessment must have been spurred by the disclosure of the one real secret involved in the bomb -- it could be successfully made and successfully exploded. The Smyth Report says that the hope that it could not be made faded gradually. This means that it was not known for some time that it could be successfully exploded. In the absence of the knowledge that the quest could be successful, any nation would hesitate before launching upon the scale of expenditure that is so necessary. However, once a bomb has been made, even though the many tons of blueprints associated with it was not available, the knowledge that success has been obtained must of necessity enter into calculations of whether to proceed or not. In addition, knowledge that the end was successful also means that more time can be spent in developing many alternatives paths to that end.

As a consequence, it is clear that there were an enormous number of combinations of methods by which success could be achieved. In time of peace it would be possible to decide which were the more efficient. In time of war and of hastily made decisions it was only necessary that a process work; efficiency was secondary.

It is also clear that in such an industry no one process was of overriding importance -- no one technical detail critical even though at the time individuals might have thought so.

In this vast array of processes any single method for the assembly of the fissile materials was just another detail -- just another of the many thousand details of the whole operation. To illustrate the validity of this assertion, suppose that failure was encountered at any of the stages where the pure isotopes were being prepared. Then no

matter how wonderfully ingenious the device for assembling the metal, it would have been quite useless.

On the other hand, suppose that any country of moderate technological ability were given the necessary amounts of the pure fissionable metals. How long would it take them to produce a detonation? It seems likely that only a few months would be needed. Quoting from a pertinent article in the Bulletin of the Atomic Scientists by Professor E. Rabinowitch (May 1951 issue, p. 139) on this very point we find:

"According to the Senate testimony of Admiral Parsons, the principles of these mechanisms were clearly established within a very short time after the beginning of this work. Considering that this research was, to a large extent, in internal ballistics, a field in which Russia has had a more extensive experience than the United States and in which it possessed a considerable number of first-class specialists, it is unreasonable to assume that even the necessity of solving these secrets on their own would have delayed the Soviet progress, if at all, by more than a few months. Perhaps they would have arrived at a solution different from those developed at Los Alamos; but whether their mechanism would have been (or, in fact, is) less or more efficient than ours, we do not know (unless this information has been provided by an American agent in the Soviet atomic project)."

"It has often been pointed out that the bottlenecks in the development of the atomic bomb project during the War have not been in the establishment of basic facts or the blueprinting of technical solutions, but in the actual construction of the large production plants. There is no reason to assume that the same was not true of the Soviet progress as well. This means that the speed of this progress probably was determined by factors on which spying had but little, if any, influence, - except possibly, by inducing their earlier initiation."

Thus it seems quite evident that the detail of the atom bomb is trivial technically and most inconsequential as a secret.

B. THE PRODUCTION OF ATOM BOMBS IN THE U.S.S.R.

From what has gone before it is obvious that any nation which seeks to produce atom bombs must have not only an extensive corps of junior and senior scientists but in addition it must have a highly developed technology and industrial apparatus. When it sets up such a two billion dollar industry with its 200,000 employees, that industry is controlled by the framework of the social organization of the country as well as by the kinds of goods manufactured and the methods of manufacture available to it. In such a context no one detail of an American process, obtained through espionage or otherwise, can have even the little importance that it had in the industry where it was developed. What is good American manufacturing practice may in Soviet hands be otherwise and vice-versa.

The purpose of this section is to show that the U.S.S.R. did in fact have the necessary scientists and technology for doing the job and that the principal reason that it could not make atom bombs during the course of the war was that all of its available manufacturing facilities were devoted to the more immediate necessity of producing well tested implements of war. It did not need any American "secrets" to produce a bomb.

That the U.S.S.R. has first rate scientists in this field may be demonstrated in several ways. One of these is to compare their discoveries in relation to our own. This is illustrated in the following table, which demonstrates, in the field of nuclear physics, simultaneity of discovery and development in the U.S.S.R. and in the U.S.A.

1) Theory of fission of the uranium nucleus:

N. Bohr and J. Wheeler - Physical Review, Volume 56, page 423 (1939) - from Denmark and the U.S.A., and

J. Frenkel, Journal of Physics, U.S.S.R., Volume I, page 125 (1929) - in the U.S.S.R.

2) Theory of the File

P. Fermi, and others in the U.S.A. - 1939 to 1940, reported in "Atomic Energy for Military Purposes", by H. D. Smyth, Princeton, 1945, and V. Gelfandovich and J. Khariton, Journal of Experimental and Theoretical Physics (USSR) Volume 9, page 1425 (1939) and Volume 10, page 29 (1940) in the USSR.

3) Theory of the Synchrotron

F. McMillan, Physical Review, Volume 68, Page 143 (1941) in the U.S.A., and

V. Veksler, Journal of Physics, USSR, Volume 9, page 153 (1945) in the USSR.

4) Operation of the Betatron

D. V. Kerst, Physical Review, Volume 60, page 47 (1941) for earlier work) and Physical Review, Volume 68, page 233 (1945) in the U.S.A., and

J. Terletsky, Journal of Experimental and Theoretical Physics (USSR) Volume 11, page 96 (1941) and Journal of Physics (USSR), Volume 9, page 159 (1945) in the USSR.

5) Resonance Method for Nuclear Magnetic Moments

Purcell, Torrey and Pound, Physical Review, Volume 69, page 37 (1946), and Bloch, Hanson and Packard, Physical Review, Volume 69, page 127 (1946) in the U.S.A., and

V. Savoisky, Journal of Physics (USSR), Volume 9, pp. 211, 245, 477 (1945) in the USSR.

The idea of a monopoly in fundamental knowledge and fundamental theory is a most improbable one. Any advantage in time in the realm of theory is so temporary as to be considered non-existent. In the past, in periods long before the development of communications brought the world together, fundamental knowledge was developed more or less simultaneously, and was widely shared. Today this process has markedly accelerated.

The point must now be made that in the USSR there are scientists whose researches in fundamental problems are

of first-rate importance. There is also a competent corps of junior scientists in various fields who have made contributions as well. This is illustrated in the following admittedly incomplete table of papers from Soviet physicists and chemists in the field of nuclear physics:

1. A particular mode of fission of the uranium nucleus. - Chlopin, Passvik - Chlopin and olker - Nature, 144, 595 (1939).
2. Electro-capillary theory of splitting of heavy nuclei by slow neutrons - Frenkel - J. Exp. Theor. Phys. USSR 9, 641 (1939).
3. On the splitting of heavy nuclei by slow neutrons - Frenkel - Phys. Rev. 55, 987 (1939).
4. On some features of the process of fission of heavy nuclei. Frenkel - J. Phys. USSR. 10, 533 (1946).
5. Registration of uranium fission fragments with removal of background due to alpha particles emitted by uranium. - Perfilov - Comptes Rendus URSS 47, 623 (1945).
6. Chemical nature of the radioactive fragments of thorium fission. Radioactive halogens. - Polessitsky, Orbeli and Nemewsky - Comptes, Rendus, URSS, 28, 15 (1940).
7. A new method of recording of particles of the type of uranium fragments by means of a photographic plate. - Perfilov - J. Phys USSR. 10, 1 (1946).
8. The first USSR cyclotron. - Eukavichnikov - Phys. Rev. 52, 1077 (1937).
9. Investigation of the phasing properties of the relativistic resonance accelerator. I. Synchotron. II. Cyclotron with varying frequency of dee voltage (phasotron) - Rabinovich - J. Phys. USSR. 10, 523 (1946).
10. A new method of acceleration of relativistic particles - Veksler - C.P. URSS. 43, 329 (1944).
11. A new method of acceleration of relativistic particle. - Veksler - J. Phys. USSR. 9, 153 (1945).
12. Concerning some new methods of acceleration of relativistic particles - Veksler - Phys. Rev. 69, 244 (1946).
13. Solid body model of heavy nuclei. - Frenkel - Phys. Z. Sowjetunion 9, 533 (1936).
14. On the spectroscopy of heavy nuclei. II. Rotation and magnetic excitation levels of heavy nuclei in conjunction with soft gamma rays - Frenkel - J. Phys. USSR 4, 493 (1941).
15. Collisions of deuterons with heavy nuclei - Lifschitz - Phys. 2, Sovjet. 13, 224 (1938).

16. Quadrupole and dipole gamma radiation of nuclei - Vigdal - J. Phys. USSR. 8, 331 (1944).

Related areas of work by Soviet scientists include the construction of large electrical installations, like a 4.5 million volt van de Graaf electrostatic generator in 1937,

and several cyclotrons. There is in addition the work of A. E. Brodsky, a member of a commission set up by the Soviet Government in 1937 to accelerate research on isotope separations. Brodsky has published work on the separation of heavy water, on a theory of isotope separation by thermal diffusion in cascade processes, and (in 1942) made an estimate of the power which might be required for the separation of uranium 235 from the other uranium isotopes by thermal diffusion of the hexafluoride. The references follow:

Brodsky and Skaare, Journal of Physicochemistry (USSR), Volume 13, page 51 (1939), and Acta Physicochemica, volume 10, page 729 (1939). Papers on the separation of heavy hydrogen and oxygen by Thermal diffusion.

A. E. Brodsky, Journal of Applied Chemistry (USSR) Volume 13, page 670 (1940). Paper on various methods of preparing heavy water.

A. E. Brodsky, Acta Physicochemica, Volume 17, page 224 (1942). Paper on estimated costs for the separation of uranium isotopes by thermal diffusion of uranium hexafluoride (the process used at Oak Ridge). It should be realized that this paper was published at a time when such material was handled as secret matter in the U.S.A.

Similar accounts can be drawn up for other fields—physical chemistry, organic chemistry, electrical, mechanical and civil engineering, applied and fundamental mathematics.

A conclusion which must be drawn from this account is that before the war there was a sufficient number of competent Soviet theoretical and experimental scientists so that independent development of the necessary nuclear theories could have been expected; so that simultaneous development was quite likely, and so that a serious lag behind other countries was so improbable as to be almost

impossible.

If we recognize these elementary facts that

- (a) The U.S.S.R. had the staff for bomb manufacture and that
 - (b) The U.S.S.R. had the plant or had the potentiality to build the plant required
- then it follows that they needed no help from us. The idea, commonly held, that without the activity of atomic spies, the Soviet Union would not now and, for many years to come, be able to make a bomb is seen to be one of wildest fancy. It is an idea held by none of leading American scientists who directed this great effort.

III. THE EXPLOSIVE LENS IN THE ATOMIC BOMB

Dr. Walter S. Koski, a Government witness, testified during the trial (R. 655-683) that a converging force wave was used to bring together the critical mass of the bomb with the required speed (R. 660). He applied the term "Implosion" to these converging waves (R. 673), and testified that these processes were not previously known. He said that "there was no information in text books or technical journals on this particular subject."

This testimony is incorrect. We shall show that:

- 1) The general idea was used in the Middle Ages;
- 2) An important variant was published in 1888;
- 3) A number of patents were issued on applications of the idea during the last forty years;
- 4) One particular device invented in 1941 or earlier is very much like the explosive lenses described in the trial, and
- 5) The theory and practice of convergent shock waves was widely understood in the U.S.S.R. before 1945,

A. THE HISTORY OF THE GENERAL IDEA OF A CONVERGENT SHOCK WAVE

In medieval times a military device was used which was known as the petard. This consisted of a bell-shaped container into which an explosive charge was inserted. The mouth of the bell was then placed against the wall of a fortification. When the charge was detonated, a powerful force wave emanating from the bell mouth would punch a hole in the fortifications. The unusually destructive action of the petard arose from the fact that the container held the explosive at the face of the fortification for a time interval. This interval was small, but was sufficient to give focusing and direction to the blast.

The device is described in the New English Dictionary, Clarendon Press, Oxford, England (1905 edition). The earliest reference given is in the year 1580.

A more advanced form of the petard as a missile was developed in the United States by Joseph H. Church and Wilfred E. Thibodeau approximately ten years ago. They later filed a patent application on April 23, 1911 which was subsequently granted a U. S. Patent 2,412,967. Their design was based on theoretical considerations about focused force waves which had been previously outlined in a German explosives journal (Zeitschrift fur das gesamte Schiess und Sprungstoffwesen, May 15, 1914, pages 163-167).

B. THE VARIANT OF MUNROE

The petard uses a container to focus the shock wave of the explosion. It is possible to mold the explosive itself into shapes which, upon detonation, directly produce focused shock waves. Such devices are called hollow charges, shaped charges, explosive lenses, and other similar names.

The basic principle of these shaped charges appears to have been known in Europe during the eighteenth century. In the United States it is known as the Munroe effect, taking its name from Professor C. E. Munroe, who discovered it when he was working at the U. S. Naval Torpedo Station and War College from 1886 to 1892.

The effect was publicly described by Munroe in articles written for Scribner's Magazine (Volume 3, pages 563-576 (1888) and in the Popular Science Monthly (Volume 56, pages 453-454 (1900).

C. PATENTS BASED ON THE MUNROE EFFECT

The Munroe effect is the basis of a number of devices described in the earlier patent literature:

German Patent # 12,119 (1881), where the principle of obtaining an increased penetrating effect by coning or recessing the face of a detonating charge is described.

British Patent # 28,030 (1911). The effect is employed in the explosive charge of a projectile fired from a gun.

U. S. Patent # 1,440,601 (1923) where the convergent force effect is rediscovered by J. R. Holran apparently without knowing of Munroe's work.

U. S. Patent # 1, 534,001 (1925) in which a focussed charge is used in the percussion fuse of a shell.

U. S. Patent # 1, 810,000 (1931) which describes and illustrates principles of the focused charge in relation to boosters for use in exploding shells, bombs, grenades, torpedoes, etc.

In addition, before 1943 there were filed and processed to varying degrees patents based on this principle which related to shells (U. S. 2,426,997, U. S. 2,413,680, and U. S. 2,579,323), to the boring of holes in pipes and casings (U. S. 2,399,211), the cutting of holes in plates (U. S. Re. 23,211), bazooka type projectiles for puncturing

armor (U. S. 2,427,989 and 2,441,388), and the use of convergent force waves for driving masses of metal at high velocity (British 613,613 and U. S. 2,407,264).

D. EXPERIMENT OF R. W. WOOD.

In a paper published in the Proceedings of the Royal Society (A 152, 249-261 (1936) this author reports the application of convergent force waves to the explosive compression of metal sheets or plates into spherical masses. He investigated the way this occurs following detonation of his shaped charge. He followed step by step the action of the force wave in causing the sheet of metal to flow into a spherical form. He devised simple experimental techniques for studying these rapid processes. All in all he anticipated and solved the problem of the explosive assembly of bomb metal. His work clearly provides the understanding that led Mahaupt to reduce this process to commercial practice.

E. THE MOHAUPT PATENT

It will be recalled that the principle of the Nagasaki bomb design was that of compacting a mass of metal of critical size at high velocity. The details for doing this were allegedly given by Greenglass to Harry Gold, and were believed to be of a secret nature. Even this development is anticipated in the patent literature in an application filed in 1941 by Henry Hans Mohaupt and assigned by him to a Swiss corporation in Fribourg, Switzerland. The company involved was the Societe Anonyme de Gestion et d'Exploitation de Brevets.

In this patent (U. S. 2,419,414) a shaped charge is used to compact metal into a precise rod shaped mass. The metal is initially in the form of a ring located at the interior wall of a cylindrical container. Because of the

focused shock wave of a shaped charge this ring collapses and is reassembled in the rod-shaped mass alluded to above. The metal is also liquified by this process, and accelerated to a velocity in excess of 16,000 feet per second.

It is obvious that a high level of understanding of shaped charge theory was utilized in this device. Further evidence of this understanding becomes apparent from inspection of the sketches of the projectile. It will be seen that the cross-sectional shape of the ring is triangular; there is use of a metal cone for the shaped charge and there is use of a hollow cylinder for a further focusing guide effect. These are all indications of the high level of understanding of this explosives export.

Except for the fact that the Haupt ring was made of steel rather than uranium 235 or plutonium 239 and that he started and ended with somewhat different shapes than may be required for the atomic bomb, the essential features of metal compaction are here outlined and are public knowledge more than three years before the atomic bomb work of the Los Alamos group.

P. DETONATION THEORY AND PRACTICE IN THE U.S.S.R.

In 1925 N. Ya Sukharevsky published two papers, entitled "Study of the Possibility of Increasing the Blasting Power of Explosive Materials by Means of Cumulative Shock Waves". These papers, which dealt with what is called the Charge Effect in the United States, were published in the January and February, 1925, issues of Tekhnicheskii Sbornik Krasnoe Armei, which is a popular Red Army ordnance journal. On page 16 of the January article are included diagrams of shaped charges in different forms. The effects resulting from detonation are indicated. It must be realized that these articles were published years before the vast technological development of the U.S.S.R.,

in the formative years of the Red Army.

Repeated references to shaped charges and their uses appear in the Soviet technical literature. Thus, in 1933 N. A. Sokolov in his text, "Course in the Theory of High Explosives", presented to students methods of calculation of the effects of cumulative charges.

In 1942, G. I. Pokrovsky (in "Directed Action of Charge") gave various practical situations, and indicated the expected increase in explosive force (see also Doklady, Volume 16, P. 106 (1945).)

Extensive work in this field for removal of surface rock has been carried out by the Institute of Mining Affairs of the Academy of Science of Moscow and by the Kirghiz Academy of Science.

Among the more recent text-books in which this subject is discussed are the following:

Dynamics of Explosive Waves, by P. Savich
(V. I. A. Moscow 1941)

Basic Calculations of Charges, by G. I. Pokrovsky
(Mining Institute, Academy of Science, Moscow).

Experimental Investigations of the Mechanical Action of Shock Waves from Explosions, by Sadovsky (Publishing House, Academy of Sciences, Moscow, 1945).

Basic Dynamics of Explosives, by O. E. Vlasov
(Publishing House, Academy of Science, Moscow, 1945).

Much of this practical work was in turn based upon many important developments of theory which occurred in the Soviet Union. To cite a few instances here:

One of the main methods for calculating shock wave interactions the so called Hodo-graph method, was invented by the Russian, S. N. Chaplygin (On Gas Jets, Scientific Annals, Univ. of Moscow, Phys-Math Division #21,

Moscow 1904).

The study of shock point interactions for supersonic flow which is very pertinent theory in this field of force waves has been extensively developed in the U.S.S.R. The theory which was worked out internationally developed in stages. First order perturbation theory was developed by Ackeret (Helvetica Phys. Acta (1928)). Second order perturbations were developed by the German Buseman, while the third and fourth order theory was developed by A. Donov, Izvestia Akad. Nauk, S.S.R. Ser. Math. 1939).

The great theoretical physicist L. Landau has done extensive work in the fields of solid state theory, general field theory, nuclear physic and on shock waves. His papers on spherical shock waves (Akad. Nauk S.S.R. Fizikal-ski Zhurnal 6, 229 (1942) and Akad Nauk S.S.R. Doklady, 44, 139 (1944) are considered outstanding in the United States.

From this brief literature survey it is clear that implosion theory and practice are not new in the U.S.S.R. However, the additional point must be made that there are scientists in the U.S.S.R. who have published outstanding papers in the fundamental chemistry, physics and mathematics of explosions and chain reactions. Thus, Professor C. N. Hinshelwood, F.R.S. of the University of Oxford, himself one of the outstanding authorities in the kinetics of reactions, has the following to say (Nature, Volume 156, page 283 (1945)):

"The Institute of Academician Semenov, recently transferred from Leningrad, houses a school of workers who, under the inspiration of their chief, have made one of the most characteristic of the Russian contributions to modern

Zeldovich (together with J. Khariton) developed the theory of the chain reaction accompanying fission, and made a calculation of the critical mass required. There is also presented the first published detailed account of the theory of the pile (Journal of Experimental and Theoretical Physics (U.S.S.R) Vol. 9, 1425 (1939) and Vol. 10, page 29 (1940). If an explosion expert is simultaneously working on the problem of the chain reaction in uranium as far back as 1940, it is reasonable to expect that several practical methods of achieving atom-bomb detonation will have occurred to him before 1945.

Finally, the mathematical theory which specifically relates to explosion waves must be considered. The specific name for the general branch of mathematics which applies to these processes is non-linear differential equations. The work of the Jukovsky Institute in Moscow has projected Soviet mathematics into a leading world position in this particular field.

IV. CONCLUSIONS

Based upon the preceding documentation the following conclusions may now be drawn:

- 1) Portions of the testimony of the Government Witness Walter S. Koski were not true. The theory of convergent force waves was not discovered and developed at Los Alamos but has been known for more than a century.
- 2) The essential idea allegedly transmitted by David Greenglass to the U.S.S.R. was the use of explosive lenses to rapidly compress the fissionable metal. This principle also had previously been reduced to practice, and was public knowledge, having been filed as a U. S. patent application in 1941. In addition, R. W. Wood had as early

physical chemistry, namely, the intensive study in all their aspects of the phenomena of flame, combustion and explosions. The work of Semenov on the theory of branching reaction chains and the interpretation of explosion limits, thermal and non-thermal explosions, degenerate explosions and so on, is too well known to need description. Some of the more recent work has included ingenious studies of the way in which chemical reactions may be initiated upon a solid surface and propagate themselves into the whole volume of the material.... It would be extremely difficult in a short account to mention individual workers; but perhaps I might remark how illuminating I found the contributions of Zeldovich on the fascinating but extremely difficult problem of the rate of propagation of flame through combustible mixtures. This subject is of the greatest practical importance and of considerable theoretical interest, and the recent contributions maintain the traditions of the Semenov school."

The physical chemist Zeldovich who is referred to by Hinshelwood is the author of several outstanding papers on detonation--viz. Journal of Experimental and Theoretical Physics, U.S.S.R., Volume 12, page 389 (1942) and, with Leipunsky, Journal of Experimental and Theoretical Physics, U.S.S.R., Volume 13, page 181 (1943). In the first paper, Zeldovich reported the study of pressure distribution accompanying a spherical shock wave in chain reactions. In the second paper the authors obtained by the initiation of a chain reaction producing a shock wave, temperatures more than seven times that of the surface of the sun. They described their apparatus in detail.

Parenthetically, it should be noted that the same

as 1936 demonstrated that spheres of metal may be made by the compression of sheets or plates of metal with convergent force waves.

3) The use of explosive lenses was a well-developed art in the U.S.S.R. prior to the date of the alleged act and the theory and practical details of this art were widely published in its technical journals.

4) The idea of the detonation of fissionable materials was widely discussed in Soviet scientific journals prior to any of the alleged acts.

5) The "secret" which David Greenglass allegedly transmitted to the U.S.S.R. was no secret at all to any explosive expert.

6) The ability of any country to produce an atomic bomb rests upon its ability to mobilize the hundreds of thousands of scientists, technicians and laborers and its ability to make available the vast industrial plant required. It does not rest on stealing the "secrets" of the United States.

7) The ability of the Government to classify as secret well-known scientific and technological matter has tended to create dangerous illusions of American discovery and monopoly of knowledge in the field of atomic energy.

In connection with the matter set forth herein above, the petitioners annex, make a part hereof, and mark "Exhibit F", the affidavit of John Desmond Bernal, duly sworn to before a Vice-Consul of the United States in London, England, on November 12, 1952.

TWENTY-SECOND: As a matter of law, by reason of the foregoing, no crime was committed and the Court was without jurisdiction to impose the sentence.

TWENTY-THIRD: The petitioners herein, from the time of their arrest to the present, have at all times insistently asserted their innocence of the crime charged. The evidence upon which they were convicted and sentenced to death--the testimony of accomplices bound together by thin strands of circumstantial evidence--was always suspect.

The matters set forth in this petition establish that the Government abused the processes of justice and unconscionably invaded the fixed rights of these petitioners to procure their conviction and, ultimately, the sentence forfeiting their lives. The entire proceeding is manifestly a product of fraud and untruth. It writes a dark page in the annals of American jurisprudence, and casts the shadow of Dreyfus over the heritage of American justice.

TWENTY-FOURTH: The petitioners are unjustly, unlawfully and illegally confined in violation of the Fifth and Sixth Amendments to the Constitution of the United States, and the Court was without jurisdiction to impose the aforesaid sentence upon them.

TWENTY-FIFTH: On or about November 21, 1952, Hon. Irving R. Kaufman, the sentencing Judge in this proceeding, made and entered an order directing the United States Marshal for the Southern District of New York to execute the sentence imposed by theforesaid judgment dated April 15, 1951, by executing the petitioners on a day during the week commencing January 12, 1953.

TWENTY-SIXTH: Unless the relief requested herein is granted, the petitioners will suffer irreparable and irrevocable harm.

TWENTY-SEVENTH: No previous application has been made for the relief herein requested.

WHEREFORE, the petitioners ask the judgment of this Court that an order be made and entered:

- 1) that the respective sentences of the petitioners be vacated and set aside and the petitioners discharged from detention and imprisonment; or
- 2) in the alternative, that a hearing upon this petition be granted to determine the issues and make findings of fact and conclusions of law with respect thereto; and upon such findings, to vacate and set aside the respective sentences of the petitioners, and discharge them from detention and imprisonment; and
- 3) that pending the determination of these proceedings, the United States of America or any agent or agency thereof be stayed from executing these petitioners, pursuant to the judgment dated April 5, 1951 and the order hereinabove referred to, made and entered herein November 21, 1952; and from proceeding in any manner or from taking any steps to or tending to the execution of the aforesaid judgment or order;

and for such other and further relief as to this Court may seem proper.

Emmanuel H. Bloch
EMANUEL H. BLOCH
Attorney for Petitioners

Dated: November 24, 1952

STATE OF NEW YORK)
COUNTY OF NEW YORK) SS.:

EMANUEL H. BLOCH, being duly sworn, according to law, deposes and says that he is the attorney for the petitioners above-named and that the facts set forth in the foregoing petition are true.

EMANUEL H. BLOCH

Sworn to and subscribed
before me this 24 day of
November, 1952.

Qualified Nassau County
Certified Notary, N.Y. Cl. & Reg. Off.
Commission Expires March 30, 1953

GREAT BRITAIN:)
ENGLAND:) S. S.
COUNTY OF LONDON:)

EXHIBIT C

JAMES GERALD CROWTHER of 2 Mytrel Court Johns Mews John Street W. C. 1. in the County of London England being duly sworn deposes and says:

1. That he is a scientific writer; that he gained an exhibition in Mathematics and Physics at Trinity College in the University of Cambridge; that he is at present engaged in revising a work on scientific discoveries; that he is the author of 16 books on the history of Science and the social relations of Science including in particular the works known as "Famous American Men of Science" "British Scientists of the Nineteenth Century" "British Scientists of the Twentieth Century" "The Social Relations of Science" and other works; that various of his books have been translated into French German Spanish Arabic Portugese and Chinese; that in the year 1928 he was appointed Scientific Correspondent of the newspaper "The Manchester Guardian"; that in the year 1937 at the invitation of the President of Harvard University in the United States of America - Doctor James B. Conant - he delivered at that University a series of six lectures on the History of Science in America; that towards the end of World War I - namely in 1918 - he took part in early British research into anti-aircraft gunnery for the Munitions Inventions Department of H.M. Government; that during and after World War 2 - namely from the year 1941 to the year 1946 - he was Director of the Scientific Department of the British Council which is an official body under the auspices of the British Government and answerable to the British Foreign Office; and that he is a British Subject by birth.

2. That for the purpose of his writings he said James Gerald Crowther has had occasion to interview many scientists - some of great eminence - for the purpose of ascertaining their recollection of certain scientific matters in which they were engaged at a distance of years; that he found sharp divergences of recollection as between one scientist and another and that his experience in this field of work has especially qualified him to form judgments as to the value and reliability of recollections in scientific matters of any particular individual in any particular circumstances.

3. That he has read a transcript of the testimony of David Greenglass as well as that of Walter Koski and John A. Derry in the case of the United States against Julius Rosenberg and Ethel Rosenberg and that he has noted therefrom the technical and scientific qualifications and background of the said David Greenglass.

4. That it is his opinion that it would have been impossible for the said David Greenglass to have reproduced in any detail in the years 1950 or 1951 replicas of lens molds sketches last seen by the said David Greenglass five years previously relying solely on memory and without any outside aid or assistance; that it is his opinion that it would have been impossible for the said David Greenglass to have reproduced in any detail in the years 1950 or 1951 replicas of a schematic drawing on an experiment or implosion effects utilizing high explosive lenses together with appropriate descriptive material last seen by the said David Greenglass five years previously relying solely on memory and without any outside aid or assistance; that it is his opinion that it would have been impossible for the said David Greenglass to have reproduced in the years 1950 or 1951 a reliable replica of a sketch of a cross section of the Nagasaki type of atom bomb together with twelve

pages of matter explaining the functions and workings of such bomb and its component parts the said sketch having been last seen by the said David Greenglass five years previously and the said David Greenglass relying for the reproduction solely on memory and without any outside aid or assistance.

5. That the said James Gerald Crowther having read the transcript of the said testimony of the said David Greenglass is of the opinion that the testimony so far as it relates to technical-matters-and-to the witness' recollection of technical matters taking place five years previously is valueless.

re: JULIUS ROSENBERG and ETHEL ROSENBERG

AFFIDAVIT By THOMAS REEVE KAISER sworn at
Manchester England on the Tenth day of
November 1952.

I THOMAS REEVE KAISER Research Fellow in the
University of Manchester England make Oath and
say as follows:

1. I hold the following qualifications:-
Bachelor of Science (First Class Honours);
Master of Science (First Class Honours) each
in the University of Melbourne.

: Doctor of Philosophy in the University of
Oxford.

Associate of the Institute of Physics
(Great Britain).

2. My experience is as follows:-

Since graduating in 1943 from the University
of Melbourne I have been engaged in full time
research in various fields of Physics. During
the recent war and until the middle of 1947 I
was employed by The C.S.I.R. Radiophysics
Laboratory, Sydney Australia. Initially my work
was in the field of Radar Counter Measures and
subsequent to 1944 I was in charge of research on
and development of Radar Aerials. I went to
Clarendon Laboratory Oxford University in 1947
and there worked in the Nuclear Physics group,
being particularly concerned with the theory and
practice of the acceleration of particles to
high energies. In October 1950 I was appointed
a Research Fellow at the Manchester University.

My contribution in the above fields of Physics include joint authorship of "A Text Book of Radar" (Chapman and Hall, 1948) and various papers dealing with theoretical and experimental aspects of Nuclear Physics and Radio Astronomy.

3. I have read the transcript of the testimony of David Greenglass, of Walter Koski and John A. Derry upon the trial of Julius Rosenberg and Ethel Rosenberg. The portions of such transcript read by me are now produced and shown to me marked TRK 1 TRK 2 and TRK 3 and annexed hereto.

4. I have been asked to provide answers to nine questions. In the following paragraphs I set out the said questions and my answer thereto.

5. Question 1. Could a person of Greenglass's background and experience have produced drawing solely from memory in 1944 and 1945 sketches of the lens molds he allegedly turned over to Rosenberg (and Gold)?

Answer 1. It is conceivable that in 1944 and 1945 the said David Greenglass could have reproduced from memory sketches of simple pieces of equipment which he had constructed, or was in the process of constructing, in his capacity as a machinist.

6. Question 2. Could a person of Greenglass's background and experience have produced in 1950 and 1951 replicas of the sketches of the lens mold he allegedly turned over to Rosenberg (and Gold) in 1944 and 1945 drawing solely from memory and without any outside aid or assistance or coaching?

Answer 2. It is improbable that the said David Greenglass could reproduce, in any detail, such sketches after a lapse of five or six years and relying solely on his unaided memory.

7. Question 3. Could you, as a trained scientist, drawing solely from memory, produce a replica of the sketch of the lens mold five or six years subsequent to having terminated work or other connection with such a problem?

Answer 3. I have considered this question in relation to my own researches. While I could without difficulty produce sketches outlining the principles involved in developments in which I participated some five or six years ago I could not do more than this without reference to notes made at the time. For example, without reference to such notes I could not make detailed drawings of specific equipments. I certainly could not, without reference to notes, make a replica of the sketches of any specific apparatus.

8. Question 4. Could a person of Greenglass's background and experience have produced in 1945 drawing solely from memory and without any aid or assistance from any person or technical or scientific source a schematic drawing of an experiment on implosion effects utilizing high explosive lenses, plus appropriate descriptive material (described by Greenglass as showing "a schematic view of the lens mold set up in an experiment")?

Answer 4. It is possible that any person working in or visiting a scientific laboratory could reproduce sketches and written material describing his impressions of the apparatus and experiments. Having had the experience of reading newspaper articles dealing with scientific work, written by non-scientific reporters after a visit to a laboratory, I am emphatic in saying that such material could only be accurate and of any value if the person concerned was scientifically trained in the appropriate field of science.

9. Question 5. Could a person of Greenglass's background and experience have produced in 1950 or 1951 replica of the sketches of the schematic drawing mentioned in "4" above which he allegedly turned over to Gold in 1945, drawn solely from memory and without any outside aid or assistance or coaching?

Answer 5. It is improbable that the said David Greenglass could reproduce in any detail such sketches after a lapse of five or six years and relying solely on his unaided memory.

10. Question 6. Could you, as a trained scientist, drawing solely from memory, produce the replica of a sketch of such a schematic drawing, five or six years subsequent to having terminated work or other connection with a technical problem of such complexity?

Answer 6. I make the same answer to this question as to Question 3.

11. Question 7. Could a person of Greenglass's background and experience have produced in 1945 a sketch of a cross-section of the Nagasaki type of atom bomb together with twelve pages of matter explaining the functions and workings of such a bomb and its component parts, drawing solely from memory and without the aid or assistance of any person or written matter or technical or scientific sources of coaching?

Answer 7. The material (drawings and written) referred to in this question and in Question 8 is considerably more extensive than that referred to in the earlier questions. It is inconceivable that a man in the position of the said David Greenglass, without specialist training and experience, could have accomplished this feat in 1945.

12. Question 8. Could a person of Greenglass's background and experience have produced in 1951 a replica of the sketch of a cross-section of the Nagasaki type of atom bomb together with twelve pages of matter explaining the functions and workings of such bomb and its component parts, drawing solely from memory and without the aid or assistance of any person or written matter or help from any technical or scientific sources of coaching?

Answer 8. I repeat my answer to the previous question and say that it is likewise inconceivable that the said David Greenglass could have reproduced the matter in question in 1951 without the aid or assistance of any person or written matter or help from any technical or scientific sources.

13. Question 9. Could you, as a trained scientist, produce a sketch of a cross-section of this type of atom bomb together with the appropriate explanatory matter, drawing solely from memory along five or six years subsequent to having terminated work or any connection with a technical problem of such complexity?

Answer 9. In answer to this question I repeat my answer to Question 3, extending my answer to Question 3 to apply to written matter as well as to drawings.

Sworn at Manchester in the County
of Lancaster, England, this tenth day
of November, 1952. T. R. Kaiser

Before me,

W. L. S. Egerton-Smith

Notary Public.

REPUBLIC OF FRANCE, CITY OF PARIS
EMBASSY OF THE UNITED STATES OF AMERICA

BEFORE ME

EXHIBIT E

of the United States of America, duly commissioned and qualified,
personally came

JACQUES S. HADAMARD
of 12, rue Emile Faguet - Paris (France)

who, being duly sworn, deposes and says:

I am a Ph.D. in sciences, Paris University.
I have been a professor of Mathematics at the College de France
(Paris University) from 1897 to 1935 and am still an honorary
professor thereof.
I have been a professor of Mathematics at the Ecole Polytechnique
of Paris from 1912 to 1935 and am still an honorary professor thereof.
I am a member of the French Academy of Sciences.
Great-Officer of the Legion of Honor.
Moreover I am LLD Yale 1901 - Member of the National Academy of
Sciences of Washington (D.C.) - Member of the American Academy of
Sciences, Boston (Mass.) - Member of the National Academy of
Political Science (U.S.A.) - I was also elected Honorary Chairman of
the International Congress of Mathematics of Boston in 1950.
I also belong to numerous other foreign scientific bodies, includ-
ing the Royal Society (London).

I resided in the United States from 1941 to 1944 and have visited
there many times before and after this period. I have always been
closely connected with scientific educational and research circles
and can judge of Greenglass' competency in scientific matters from
his educational record.

I have read the transcript photographically reproduced of the
testimony of David Greenglass, as well as that of Walter Koski and
John A. Derry.

In the light of the above transcript and of my knowledge of sci-
entific matters, I state as follows:

From what I know of Greenglass' background, it seems
to me highly improbable that he could have reproduced
in any detail replicas of lens molds sketches after a
lapse of five years, relying solely on his unaided me-
mory.

For the same reasons, it seems all the more improbable
to me that he could have reproduced, in detail, replicas
of schematic sketches of lens molds after a lapse of five
years, relying solely on his unaided memory.

It is inconceivable that Greenglass could have reproduced
replicas of a cross section of the Nagasaki type of bomb
plus explanatory matter after a lapse of five or six years,
relying solely on his unaided memory. It is more inconceiva-
ble still that Greenglass could have given lengthy and de-
tailed explanations not only on the component parts of the
bomb, but also on their functions and workings: all things
he could not have any idea of and which nobody is alleged

to have given him even an idea.

EXHIBIT F

(Great Britain:
(England:
(County and City of London

S.S.

JOHN DESMOND BERNAL of 21 Torrington Square London W.C.1.
England Professor of Physics BEING duly sworn deposes and
says as follows:

1. That he is Professor of Physics at Birkbeck College,
University of London and had experience of the theory and
practice of explosives in his capacity as Scientific Advisor
to the Ministry of Home Security, 1939-1942, and to
Combined Operations, 1942-1945.
2. That he has read the records contained in a transcript
of the evidence given by David Greenglass on the 9th and
12th of March, 1951 in the case of JULIUS ROSENBERG and
ETHEL ROSENBERG vs. the UNITED STATES OF AMERICA and, also,
of the evidence given on 12th March 1951 by Walter S. Koski
in the said case, and, in particular, with regard to the
exhibits (2), (6) and (7) presented in the said case.
3. That, in his opinion, as a scientist with special
knowledge of the physics of explosives, on the bases of
the description of the said exhibits contained in the said
records (i) notwithstanding the opinion of Walter S. Koski
in his evidence (ff. 673 and 679 of the said transcript)
the lenses which the said exhibits (2), (6) and (7) pur-
port to represent do not involve the use of a new and
original principle and (ii) notwithstanding the opinion
of the said Walter S. Koski in his evidence (f. 672 of the
said transcript) knowledge of the said lenses would not be
of substantial advantage to a foreign nation.
4. That he bases his opinion expressed in paragraph 3(i)
aforesaid on the following grounds -

The principle of the converging shock wave is not a new
one. It has been utilised in practice as the hollow
charge effect as far back as 1792. It was rediscovered
by Admiral Munroe of the United States Navy in 1888,
is known as the Munroe effect and was widely publicised
at that time and later, for example, by Munroe himself
in

- i. Scribner's Magazine, 1888, 3, 563-576.
- ii. Executive Document, No. 20, 53rd Congress, 1st
Session, 1894.
- iii. Popular Science Monthly, 1900, 55, 453-454.

It was also known in other countries. A patent -

Brit. Patent 28,030, 1911. Westfälisch-Anhaltische
Sprengstoff A.G. Improvements in explosive charges
or bodies.

was taken out in 1911 by Neumann and the effect was
described in standard books on explosives -

- iv. COLVER E. High explosives, 1916, pp. 490-493.
- v. STETTERACHER. A., Schiess and Sprengstoffe,
1st edition, 1919, pp. 36-37.
2nd edition, 1933, p. 51-52.
- vi. MARSHALL. A. Explosives. Vol. 3. 1932, p. 169-170.

It was extensively used by all belligerents in the last
war and was the basis of the tank destroying efficacy of
the well-known "bazooka".

The principle underlying all these applications is the physical principle that a wave of any type increases in amplitude when it converges and this means, in the case of an explosive shock wave, a corresponding increase in velocity and pressure. The theory of this effect in the particular case of a conical lined hollow charge has been published in the Journal of Applied Physics, Vol. 19, pp. 563-582, 1948. It is clear from the verbal descriptions given in evidence at the trial, see especially ff. 597, 614-620, 646-655, that the lenses, the moulds of which are alleged to have been made by David Greenglass, are essentially shaped charges employing this well-known principle of convergence. There is no indication of any new principle being involved.

5. That he bases his opinion expressed in paragraph 3(11) aforesaid on the following grounds -

(a) The particular importance of the devices, drawings of which are alleged to have been handed over by David Greenglass, resides, in his opinion, more in the principle involved, which as stated in paragraph 4 aforesaid he maintains is not new and original than in the particular shapes and relative dimensions of the charges. It is not disputed that experimental development work such as that carried out by the said Walter S. Koski was necessary to find the shape most adapted to the compaction of the fissile material, but such work could have been carried out by any explosives expert and it is reasonable to suppose that not only one but a number of solutions could be found for providing an adequate implosion. Further as is stated in the said Walter S. Koski's evidence (f. 600 of the said transcript) the efficacy of the lenses depended on "a combination of explosives having different velocities of detonation". This combination was made at an establishment remote from that at which David Greenglass worked and he nowhere claims to be aware of its nature. Without it any information on the mere shape of the lenses which he alleges to have transmitted would be of negligible value. It is, therefore, evident that any advantage to any foreign nation by the divulging of the design of any particular lens would be non-existent or very small as they already would have high explosive lenses of a suitable type or could readily develop them on the basis of existing knowledge.

(b) It might be argued that even if there were nothing essentially new in the design of the high explosive lenses and their implosive effect, it was still a matter of the utmost importance that the idea of using this principle for the rapid reduction of the volume of a piece or pieces of fissionable material to the critical volume be considered a secret of the highest order. To maintain this, it is necessary to assume a degree of technical incompetence on the part of a foreign nation which, if it existed, would have prevented them in any case from being able to utilise the information on atomic weapons. Already by 1939, the principles of nuclear fission, the neutron chain reaction and the concept of the critical volume were well known in scientific circles. Once the possibility of producing fissionable material in adequate quantity for the critical volume was realized, it was obvious that a bomb could be made if the critical volume could be produced sufficiently rapidly to prevent the blowing off of the material before the chain reaction could proceed far enough. Only a ballistic or an explosive compression could produce such a rapid reduction in volume. The use of a hollow charge for this purpose would be the first to occur to any

explosives expert if faced with the problem. Any real value to a foreign nation of information on the construction of a bomb or bombs model would therefore reside primarily in the absolute scale, for this would reveal the critical volume aimed at and it is not contended by the prosecution that David Greenglass ever obtained such information.

(c) Exhibits (2), (6) and (7), as produced in Court, are not claimed to be the actual sketches transmitted by David Greenglass to Julius Rosenberg or Harry Gold. They are drawings, admittedly made five years after the event, of sketches not copied but made from memory from actual models. While not maintaining that it is impossible to reproduce a drawing at such an interval of time it is difficult to understand how such drawings can be acceptable as reliable in view of the fact that in the interval between August 1945 and June 1950 when David Greenglass was arrested much publicity had been given to the atom bomb and the principles of its working, including the means of achieving a critical mass, and the recollection of what he had seen and learned may be considered to have influenced, even if unconsciously, David Greenglass's recollections. Further, in the interval between his arrest in June, 1950, and the time of the trial in March, 1951, he had been interrogated several times on the subject of his alleged espionage and it is difficult to see how his memory could not have been influenced by the questions put to him in that interval.

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

-----x
UNITED STATES OF AMERICA,

vs.

MORTON COBBLE,

Crim. 134/245

Defendant.

-----x
To the Honorable, the Judges of the United States District Court for the Southern District of New York;

The Petition of MORTON COBBLE respectfully shows:

1. That he is unjustly and illegally detained and imprisoned by the Attorney General of the United States by color of authority of the United States.
2. That petitioner was taken into custody at Laredo, Texas, on August 18, 1950 and has at all times since that date been held in custody of the Attorney General through his agents and employees; that after a purpurified trial commencing March 1, 1951, and concluding March 29, 1951, before I.P.Kaufman, U.S.P.J., your petitioner was convicted of a charge of conspiracy to violate the Espionage Act (former Title 50 Section 34, G.C.C.); that on April 5, 1951, he was sentenced to a term of imprisonment of thirty years, the maximum term provided by statute; that he is presently detained under color of said judgment and sentence, all or more fully set forth in the files and records of this case.
3. That your petitioner's aforesaid conviction was affirmed by the Court of Appeals for the Second Circuit on February 26, 1952, Judge Frank dissenting, petition for certiorari denied by the United States Supreme Court October 13, 1952, and petition for rehearing denied November 17, 1952.
4. Your petitioner now makes the claim that the sentence imposed on him was imposed in violation of the Constitution and laws of the United States, and that the sentencing court was without jurisdiction to impose the sentence, and that the sentence

imposed was the product of such a denial or infringement of the constitutional rights of the prisoner as to render the judgment vulnerable to collateral attack on the several grounds more particularly set forth in the accompanying affidavit of one of petitioner's attorneys, Howard N. Meyer, sworn to November 24, 1952, to wit:

a. That the processes of this court were abused during the pendency of this trial by the deliberate bringing about, by the prosecution, of the indictment and arrest of one William Perl, at a time calculated to produce grossly prejudicial newspaper publicity concerning both the event of the indictment and extra-judicial statements relating to it, all of which necessarily had the effect of unduly influencing the jurors sitting in petitioner's cause; the full character of the abuse, however, not having been discovered by or discoverable on behalf of petitioner until many months after petitioner's trial.

b. That by a constant course of conduct prior to petitioner's trial, the Attorney General, the U.S. Attorney and their Assistants, and the Director of the Federal Bureau of Investigation and his agents, together collectively referred to herein as the Prosecution, engendered an atmosphere hostile to this petitioner and pre-disposed the community from which the jurors were drawn to the belief that petitioner was an "atom spy" and a "member of the Klaus Fuchs spy ring" although at all times said agencies must have known that such characterizations were false, had no evidence to support them, produced none at the trial, and were seeking thereby wrongfully to insure petitioner's conviction.

c. That your petitioner and his co-defendants were so reviled and maligned and the subject of such constant and spectacular hostile newspaper and radio publicity in advance of trial, as a result of conduct of the Prosecution in openly and covertly feeding prejudicial material to the press, that it was impossible for them to receive a fair trial before an impartial jury in March of 1951, and as a result, the purported trial was but

a legal gesture to register a verdict dictated by popular preception.

d. That evidence of "treachery and an evil intent to betray" was offered on the trial of petitioner in the guise of proof of specific intent to furnish secret military information, and hence the conviction based on an unconstitutional application of the Espionage Act, in conflict with the treason clause of the Constitution.

e. The prosecuting authorities knowingly used false testimony to bring about petitioner's conviction.

f. Petitioner is unjustly, unlawfully and illegally confined, in violation of his rights under the Fifth and Fourteenth Amendments to the Constitution of the United States and in violation of his immunities under the Treason Clause (Art. III, Section 3) of the Constitution.

Therefore, petitioner prays that an order be made and entered herein vacating and setting aside the judgment of conviction and discharging him from custody; pending the hearing and determination of this petition, he respectfully requests that he be retained within the jurisdiction of this court so that he may be free to consult with counsel, and free to testify, if need be, at the hearing.

Dated November 27, 1952

John M. Tolson
Petitioner

Frank P. Murphy

Attorneys for Petitioner
205 West 74th Street
New York City, New York

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

UNITED STATES OF AMERICA,

v.
LORTON ROBELL,

Defendant.

C.H.T. 134/346

STATE OF NEW YORK)
COUNTY OF NEW YORK)
vs.

HONORABLE W. V. P., being duly sworn, deposes and says:

1. I am counsel for the defendant, Lorton Robell, and make this affidavit in support of his petition under 28 U. S. C. section 2255, for an order vacating and setting aside a judgment of this Court of April 8, 1961, adjudging him guilty of conspiracy to commit espionage (former Title 50, Section 34, United States Code) and sentencing him to imprisonment for a term of thirty years. The purpose of this affidavit is to set forth in some detail the matters which the record which render the judgment herein subject to collateral attack.

2. The claim, as set forth in the petition, is made on five grounds, each of which is considered to be, independently and separately sufficient to justify the relief sought. While the first three grounds are presented separately, it is also requested that the first and second be deemed incorporated in the third; taken together, the essence of the three is that petitioner has been denied the substance of a fair trial by conduct of the prosecuting officials of the United States Depart-

ment of Justice both prior to and during petitioner's trial calculated to bring about a community prejudgment of guilt, and to make it inevitable that the jurors trying the cause would bring in a verdict based not on evidence presented at the trial, but on matter constantly brought to their attention, at the instigation of the prosecution, outside the courtroom.

If the allegations of this affidavit should be uncontested, or if the proof at the hearing should support them, the conclusion will be unavoidable that the trial herein was but a legal gesture to register a verdict already dictated by popular preconception; where such a reconciliation is produced by conduct of the prosecution in specific relation to this case, the result is as incompatible with "any civilized conception of due process of law" as the knowing use of perjured testimony (Kooney v. McLochan, 294 U. S. 103) or the overt domination of a trial by a vengeful mob (Moore v. Chapman, 251 U. S. 36).

Counsel is aware that his petition imposes on the Court a grave responsibility; a responsibility that will be discharged in the light of the proposition that it is more important to the security and liberty of our country that prosecuting officials be held to a course of conduct which will show due regard to the rights of an accused under the Fifth and Sixth Amendments, than that the government should be put to the "inconvenience" of seeing to it that defendants, no however serious the nature of the charge against them, are tried solely on evidence produced in a courtroom.

3. The petitioner Robell was charged with having conspired with certain named co-defendants to transmit information relating to the national defense of the United States, to the U.S.S.R., with intent and reason to believe that such information would be used to the advantage of that country.

Such an accusation, it is obvious, is of such a性质 (character) as to have required the most scrupulous and earnest performance by the United States Attorney of his admitted (P.1610)* "duty to refrain from improper methods calculated to produce a wrongful conviction". (U.S. Warren vs. United States, 295 U.S. 78) Not only was there an absence of such restraint in this case, but there was a course of conduct, in many months prior to the petitioner's trial, which was calculated to exacerbate an existing heated and disturbed public sentiment, topped off by an extraneous event during the trial--the arrest and indictment of one William Perl--the full significance of which did not become evident until many months after the trial itself was concluded.

THE PAPER IS DUE T

4. The prosecution's case against petitioner and his co-defendants rested solely on the dubious testimony of self-confessed spies (P.1343) and an admitted perjurer. (P.275, 369) The determination of the issues at stake involved decision by the jury as to the credibility of witnesses. (P.1343). The principal witnesses upon whose credibility the prosecution staked its case were Max Fleischer (a close mate of this petitioner and of Julius Rosenberg) and David and Ruth Frankel, the brother and sister-in-law of Mrs. Rosenberg. The trial had begun on March 1, 1941; the actual

*References (P.--) are to the printed record of proceedings as certified to and printed for the purpose of petition for certiorari in the Supreme Court.

taking of testimony, through the witness Blitchev, on March 8th. His examination was concluded on March 9th, and he was followed by David Greenglass, who continued on the stand through March 14th, 1951, when he concluded, to be followed by Ruth Greenglass, who remained on the stand until mid-morning of March 15th, when, after two minor witnesses, she was followed by Harry Gold. The testimony of Gold had a direct bearing on the guilt or innocence of any defendants on trial; only if the Greenglasses and Blitchev were to be believed would Gold's testimony have had valid circumstantial significance.

5. At this crucial moment there occurred the following events--not of record in the instant case--the full motivation and true character of which could not be apparent until many months after the conclusion of petitioner's trial. On Tuesday, March 13th, 1951, the Grand Jury which had indicted petitioner and his co-defendants returned an indictment for perjury against William Perl. (Crim. 145/43) The indictment was ordered sealed by Judge Goddard, then presiding in the principal criminal part of this Court. The indictment was nevertheless taken before Judge I.R. Kaufman, who was then actually engaged in presiding at the trial of the instant case, and ordered opened by him on March 14th. At the same time, Judge Kaufman signed the bench warrant for the arrest of Perl. The indictment against Perl charged him with having testified falsely over six months before, with respect to his acquaintanceship with (1) petitioner Sobell, (2) his co-defendant Julius Rosenberg, (3) Ethelene Blitchev (the wife of the perjurer-witness, Max Blitchev) and (4) two individuals, Ann and Michael Sidorovich--whose name figured prominently in the testimony of David Greenglass (e.g. P. 445-6).

6. The indictment and arrest of Perl--he was arrested on the evening of March 14th, 1951--had the effect which no event could only have been calculated to have. It resulted in sensational newspaper, radio and television publicity on March 15th,

of a character not ostensibly having to do with the trial of petitioner and his co-defendants--and hence not even within the purview of prior admissions by the trial judge (even if it be assumed that such admissions are ever taken seriously) against reading "a out this case" in the newspapers. (B.C. R. 114) The publicity appeared on the front page of every New York City morning newspaper on March 18th, 1951--including the tabloids, whose front page space is at a premium. It was prominently displayed in every afternoon newspaper. The sinister character of this publicity--not in the record on the trial--becomes apparent when compared with what is to be found in the record. The full quality and character appears in the photostate of the relevant newspaper, which, as annexed to the petition of the defendant Rosenberg of November 24, 1952, signed by Emanuel H. Bloch, Esq., I beg leave to have incorporated herein in their entirety and treated as an exhibit hereto. The New York Times, for example, carries a two-column page-one headline (sensational treatment, for that newspaper, of the story of an arrest of an otherwise unknown person) "Columbia Teacher Arrested; Linked to Two on Trial as Spies". Two separate stories appear in the parallel columns under the two-column head: the one, relating to the previous day's testimony as petitioner's trial--which the jurors might not have read; the other, concerning Perl, which the jurors could have felt entirely free to read, and headed "Physicist Called Perjuror in Denying that He Knew Rosenberg or Robespier". The text of the story that follows contains the following statements attributed to the United States Attorney, who has never denied making them:

"Mr. Sypol said also that Perl had been listed by the Government as a potential witness in the current atomic espionage trial. His intended role on the stand, Mr. Sypol added, was to corroborate certain statements made by David Greenglass and the latter's wife, who are key Government witnesses in the trial." (Emph. supp.)

It is difficult to believe that such a quotation was falsely attributed to Mr. Sypol. It is even more difficult to

understand how it has remained unchallenged.

The standard was laid down long ago, as to such conduct, when the court held, in United States v. Dugay, 106 F. 2d 271 (1930):

"I need hardly say that the publication of such comments during the course of the trial was a flagrant impertinency. If the printed words had been spoken to a juror, or if they had been contained in a letter addressed to him, an offense punishable by fine and imprisonment would have been committed, and it is little less blameworthy to take the not improbable chance of reaching the juror's mind by the method of publication in a widely-read journal."

Whatever the reason for the prosecutor's immunity in the present case, it is obvious, from the narrative of the events of the trial and the precise timing of the publication, how any doubt that any jurors might have had concerning the dubious accomplice testimony tendered by Mr. Maypol at the trial, could have been resolved, for the jury, before the record and contrary to law, by this type of "corroboration".

The prominence of the publication, and the fact that the jury dispersed each day in the present trial, make it inevitable that the remarks were seen and discussed by the jurors.

It is idle to say that there is no direct evidence to show that the jury read these articles. They appeared in daily issues of leading journals, and were scattered broadcast over the community. The jury separated at the close of each session of the court, and it is incredible that, going out into the community, they did not see and read these newspaper publications". (Kay v. Cawvalader, 49 Fed. 32, 36).

7. Mr. Maypol was not alone in using the occasion of the perl's rest to send extra-judicial information to the jury, via the press and radio. Mr. J. Edgar Hoover felt impelled to announce, according to the Times, that Perl's father "was a native of Russia" and that Perl "had been under investigation since shortly after the arrest of Harry Gold".

8. The files and records of this Court support the claim that the circumstances of the Perl indictment, the unswearing of the indictment, the arrest of Perl, and the press statements of the prosecution in connection with the arrest, must be scrutinized in a hearing under Section 2335 to determine whether the conviction in this case was not brought about in a manner in conflict with the Fifth and Sixth Amendments to the Constitution of the United States. As mentioned above, the indictment occurred over six months after Perl's allegedly false testimony was given. The crime of perjury is a serious one; yet eighteen months have elapsed since the indictment, and Perl has not only not been brought to trial; the United States Attorney's office has most vigorously opposed efforts of Perl's counsel to give that defendant a trial.

9. At the time of Perl's arraignment, March 16th, 1951, as reflected by stenographic minutes of proceedings before Judge Coyle to be found file in this Court (Crim. 130/43) John W. Foley, Assistant United States Attorney (who was also counsel of record for the government in the trial of petitioner) stated:

"The government is ready to proceed on April 2nd. However, counsel for the defendant has advised me that he is going to be engaged thru the 6th of April, and he would not be ready for trial until the 1st or 2nd of April. The government had no objection to the date defense counsel suggested."

The government did not, however, proceed on April 17, 1951. According to Perl's uncontradicted statements in an affidavit in support of a motion brought on my order to show cause signed June 3rd, 1952, in an effort to force a trial:

"On June 4, 1951, the trial date was set for June 18, 1951. At the point both myself and my counsel were actually ready for trial".

Thereafter, he says, trial was successively adjourned to October 4, 1951.

"Finally on that date, the case was marked off the calendar by the United States Attorney".

The United States Attorney's office, which, as noted above, declared during the pendency of petitioner's trial, that it was "ready to proceed on April 3rd", (1951) fought tooth and nail against going to trial in June of 1951. It went to the length of filing an affidavit incorporating an earlier affidavit of May 26th, 1951, by Robert Martin, Assistant United States Attorney, claiming:

"The reason that the case has not been brought to trial to date is because, among other reasons which may not properly be disclosed at this time, the United States Attorney believed it desirable to have all aspects of the Rosenberg and Robespierre prosecution completed before commencing prosecution in related cases. Further, Myles J. Lane, the United States Attorney is presently engaged in litigation of considerable importance in the case of U. S. v. Elizabeth F. Flynn, et al and has just completed prosecution in the case of U. S. v. Frank Coletto. Accordingly, no case cannot possibly be brought to trial until the fall of 1952."

and then stating, in the new affidavit of June 9, 1952:

"The offense charged in the indictment in this case is one of the most serious import. The defendant is a physicist and a leading specialist in aerodynamics. He has done work in fields of top military secret. He is charged with perjury in that he denied knowing before a Grand Jury investigating espionage, persons who have subsequently been convicted of espionage on behalf of the Soviet Union. The prosecution in the espionage case, that against Julius Rosenberg, has not been completed, and is presently awaiting possible application for review by the Supreme Court. The United States Attorney has decided it would be proper further and relevant to proof in this perjury case until the Rosenberg case was ruled upon before his own counsel died."

The implication that the trial of Perl's indictment would be a difficult one, and hence not readily triable by an Assistant United States Attorney, is belied by the statement of Assistant U. S. Attorney, Foley, on March 20th, 1951, in stenograph minutes on file in this court, in arguing a defendant's motion for a Bill of Particulars.

"If this were an unusually difficult case, if it was a complicated factual situation, if it required great pains in preparing for trial, then I could understand the defense counsel's contention. I would not agree with their contention, however. But this is such a simple case your Honor, I do not see why any unusual allowances should be made in a bill of particulars".
(mph. supp.)

10. The claim that the "processes of the court were abused" obtains additional support from the inference which can be drawn from the foregoing, that it was never seriously intended to bring Perl to trial, when the prosecution brought his indictment. That inference, serious as its implications may be, is supported by the timing of the indictment, and the circumstances set forth above. An alternative inference, at the present juncture, in view of the statements in the Martin affidavits, is that the prosecution is aware that a trial of Perl, if held while the Rosenbergs are alive, will necessarily bring out evidence or facts which have been hitherto suppressed, which will demonstrate the innocence of petitioner and his co-defendants. But, if that is the case, a right to relief under Section 2255 exists, since the knowing suppression of such facts is as much a violation of due process of law as the knowing use of perjured testimony.

11. Over and above the injury to all defendants, arising out of the Perl incident, is a particular injury to petitioner which may be stated as follows: there was a serious and substantial question on the trial of the indictment herein, as to whether the proof showed the single conspiracy charged by the indictment, or whether it showed two separate alleged conspiracies.

the one dealing with atomic espionage, allegedly between the Rosenbergs and others, in which the trial judge soon decided (S. 1029) that Sobell did not participate, and the other solely between Julius Rosenberg and Sobell, having to do with other, unidentified national defense information. This question was so serious and substantial, indeed, as to have evoked from Judge Frank of the United States Court of Appeals a dissent from the affirmance of the conviction of Sobell, on the ground that, if in fact two conspiracies were proved, "then prejudicial error has been committed, for Sobell was jointly tried with no or atomic energy spies whose acts and declarations were held binding upon him" (F. 1034-5; 1957 (2d) at p. 603). The majority of the Court of Appeals, in affirming, seem to have believed that "the jury could and did reasonably find" that there was a single conspiracy. And the Solicitor General, in opposition to certiorari, contended that the jury had so found, (Br. Opp. 47-50) and did not deny that it was a jury question.

But on this issue, so much in doubt that Judge Frank dissented from the affirmance of petitioner's conviction, the Perl incident and attendant prejudicial publicity invited by the prosecution, was calculated to bring improper pressure to bear on the jury. Through the indictment of Perl there was emphasized and through the publicity there was reemphasized the existence of a claimed nexus between Perl and Sobell, and between Perl and Ann and Michael Sidorovich, individuals never testified to as having had anything to do with Sobell, but whose alleged role in the evidence at the trial was confined to alleged dealings in atomic espionage between Julius Rosenberg and David Greenglass and Harry Gold. Thus there was thrown into the scales an entirely improper and extraneous instrument of persuasion, calculated to produce an unfair resolution of the question whether the testimony concerning Sobell

related to a separate agreement, or whether, (as Judge Frank states the issue) "he became a member of the Rosenberg-Creenglass-Col. conspiracy".

PRETRIAL PUBLICITY PARTICULARLY UNFAVORABLE TO SOBELL

12. Apart from the Perl incident, in the pre-trial period and during the period of the trial, defendant Sobell was subjected to a most prejudicial sort of prosecutor-incited hostile publicity, which he and his counsel were powerless to challenge before the trial because of concealment, by the prosecution of the particulars of the case against him. The nature and character of the prejudice is best demonstrated in the light of the fact that at the time petitioner was sentenced it was acknowledged by the trial judge that "The evidence in the case did not point to any activity on your part in connection with the atom bomb project." (R. 1820)

The indictment on which the trial of petitioner and his co-defendant was had did not reveal this fact; and the prosecution insistently opposed his trial counsel's efforts, by way of proceedings for a bill of particulars, to get some enlightenment as to the nature of the charge against him. As Judge Frank said for the Circuit Court:

"Sobell's counsel argued that on the basis of the indictment and information obtained from an unsuccessful attempt to get a more enlightening bill of particulars, it was impossible for Sobell to ask for a severance earlier on these grounds. Sobell's position seems well taken, although it is not necessary to decide any question of waiver involved in his failure to request a severance." (R. 1834)

The prosecution, however, must at all times have been aware of what the trial judge acknowledged, as quoted above; that petitioner had nothing to do with atomic espionage. Yet, persistently and pervasively, from the moment of petitioner's arrest, they sought to impress on the minds of the community from which the jurors were drawn the belief that petitioner was

an "atom spy". For example, the headlines, of sensational character, reporting announcements of the Director of the F.B.I. and the United States Attorney pertaining to Sobell's arrest--the first publicity which his name and personality received--were of the following nature: New York Journal American, August 1st, 1950, half banner, front page head "Arrest N.Y. Man as Reds' A-Spy", juxtaposed with a large photograph of petitioner captioned "Morton Sobell, Accused Spy". The New York Daily News (August 19, 1950) headlined the story, across three-fifths of a page, "Fleeing Radar Expert Nabbed as Atom Spy", with petitioner's name set forth in large type in the "lead" sentence of the story. The New York Times in its prominent page one story quoted C.S. Attorney Saypol as follows: "Mr. Saypol said that Sobell had many dealings with Rosenberg in the conspiracy to supply Russia with atomic secrets".

This accusation, which must have been known to the prosecution to be false, was repeated in various forms, both directly and indirectly, in characterization, prior to the trial, of Sobell as an alleged "atom spy". Ex.: New York Journal American, August 19th, 1950: "U.S. to Bring 8th Atom Spy Suspect Here" (p.1); Journal American August 20th, 1950, photo caption, "Mrs. Sobell ... visited her atom spy suspect husband"; New York Post, August 20th, 1950 "N.Y. Man Held as Eighth A-Spy, awaits Return"; New York Daily News August 25th, 1950 "8th Atom Spy Suspect held in 100 ft's ba'l"--juxtaposed with 4"x2" photo of Morton Sobell. *(Morton Sobell) was arrested in Laredo, Tex., by F.B.I. agents yesterday as a member of the Klaus Fuchs international atomic spy

* By this time it had become common knowledge among newspaper readers that "A-bomb" meant "atomic bomb" and "A-spy" meant "Atom spy".

ring" (Daily Mirror, August 19th, 1950, p. 2); "A Spy Suspect (Morton Sobell) to be Brought Here" (Daily Mirror August 22nd, 1950).

The prejudicial effect of the foregoing was refreshed and revivified in the immediate pre-trial period. On March 1st, 1951, the New York Times headlined "Spy Trial to Hear Three Atom Scientists" and referred to "three persons (i.e. the Rosenbergs and Sobell) accused of transmitting atomic secrets to Russia in wartime". The Daily News headlined on March 1st, 1951, "U.S. has 97 witnesses in A-trial stock pile" and declared that the Government would "attempt to convict Julius and Ethel Rosenberg and Morton Sobell on charges of conspiring to pass on atomic secrets to Soviet Russia during wartime". On March 6th, 1951, the Daily News, headlining "Hint U.S. Seeks Death for three on Trial Today" specifically named "Morton Sobell" as being charged with "actually plotting to feed atomic secrets to Russia". The New York Post on March 6th, 1951, published a photograph of petitioner captioned "Morton Sobell, accused of atomic espionage, enters Court", juxtaposed with a story referring to the "first atomic spy trial in history" and headlined "Three A-Spy Suspects to go on trial".

The day-by-day reportage of the trial was uniformly of this pattern. It would be cumulative to set that forth here in view of the fact that complete documentation may be found in the Rosenberg petition; but it is of interest as reflecting the prejudicial confusion produced by the pre-trial publicity, to examine the reference to the testimony of David Greenglass, self-described atomic spy, as reported in the New York Post for March 18th, 1951:

"The former Army sergeant whose testimony began Friday, gave a detailed "cloak-and-dagger account of his dealings with Julius Rosenberg, his wife Ethel, and Morton Sobell, electronics engineer... The three, Greenglass testified, conspired with him to steal top secrets from the government and transmit them to Moscow".

There is not a scintilla of such evidence, or any evidence in the case, by Greenglass, having to do directly or indirectly with Morton Sobell.

It is, of course, no answer to all this that the indictment charged a "single" conspiracy, and that an alleged co-conspirator has a constructive, albeit fictitious, responsibility for acts of his co-conspirators. The numerous condemnations of petitioner as an "atom spy"--in many instances alleging direct participation--were not accompanied by cautionary instructions, or addressed to an audience learned in the entangling niceties of the law of conspiracy.

Nor is it an answer that the jury was instructed not to convict unless they "believed" the testimony of Max Elitcher (R. 1560). The purpose of what has been set forth in this affidavit has been to show how the jury was brought, by unconstitutional means, not of record and hence not appealable, to believe a witness whose credibility was so suspect.

The prejudice created by such unjust denunciations as "actually plotting to feed atomic secrets to Russia", (supra) was compounded, at every stage, by the injection of the equally false accusation that Sobell had not only conspired concerning the atom bomb, but had done so as a co-conspirator of Dr. Klaus Fuchs, who has been referred to as the "most notorious spy in recent history" (341 U.S. 494 at p. 545). While the court may be sufficiently aware, so as to be able to take judicial notice, of the prejudicial character of an unjustified coupling of an individual with Klaus Fuchs, it may be well to recapitulate the following historical facts. During the entire post-war period --from 1946 to 1950--two most disturbing series of events, to every American, particularly urban residents, were the increasing general deterioration of relationships between the United States and the Soviet Union, and the parallel breakdown of efforts to establish international control of the use of the horrible atomic

for
bomb/military purposes. The tragic and devastating effects of the two military uses of the atomic bomb at Hiroshima and Nagasaki were common knowledge, and the sources of a constant "state of intense public alarm" (Blackett, Fear, War and The Bomb, 1949). Superimposed on this background, shortly after the revelation by President Truman of an atomic explosion on Soviet territory, came the fateful public controversy as to whether the United States should proceed to manufacture a weapon--the hydrogen bomb--(which came to be known as the "hell bomb")--which dwarfed the hideous atomic bomb in the same proportion as that weapon had overshadowed every military weapon previously invented. On January 31st, 1950, the President directed that work with the hydrogen bomb proceed--and the public was told that "the new bomb would fuse atoms, with a power 100 to 1000 times greater than the improved fission bombs that have been developed since the Japanese cities were struck" (N.Y.Times, Feb. 1, 1950).

Within three days after this decision was made, with all its attendant fanfare came the shocking revelation of the arrest, by the British authorities, of Dr. Klaus Emil Julius Fuchs, on charges of espionage. "British Jail Atom Scientist Was a Spy After Tip by P.B.I.; He Knew of Hydrogen Bomb" (N.Y.Times, Feb. 4, 1950). Dr. Fuchs, at the very least "had certain basic information dealing with the hydrogen bomb development and was thus in a position to pass it on to the Russians" (id), at the worst, if the Journal American's quotation attributed to Dr. H. H. Bethe be taken at face value "All H-Bomb Secrets Gone"; "America's closely guarded secrets on hydrogen bombs are now 'no longer secrets' one of this country's foremost physicists, Dr. H. H. Bethe of Cornell University declared yesterday" (Journal American February 5th, 1950). The themes of the vast destructiveness of the hydrogen bomb, and the asserted role of Fuchs in transmitting hydrogen bomb secrets to the Russians, were played over and over, with variations, in the following weeks.

13. In the context just set forth, an accusation of association with Fuchs was one that should hardly have been lightly made, even assuming it to be permissible for a prosecutor to make such accusation other than before a grand or petit jury. Yet this petitioner and his co-defendants were repeatedly so characterized --although the prosecution ultimately disclaimed (but outside of the hearing of the jury (R.838-7) any intention to have Sobell and his co-defendants characterized as co-conspirators of Mr. Fuchs. This, however, did not prevent the incitation* of such publicity as the following: "Morton Sobell, 33 year old radar expert and eighth American suspect nabbed in the Klaus Fuchs international atom spy ring" (Daily News, August 29th, 1950); "Radar Expert Indicted in Fuchs Ring" (Daily News, October 11th, 1950); "Sobell) was arrested as a member of the Klaus Fuchs atomic spy ring" (Journal American, August 19, 1950); "The F.B.I. today announced the arrest at Laredo, Texas, of Morton Sobell of New York ...the eighth accused spy to be apprehended as a result of the Klaus Fuchs-Harry Gold atomic espionage case" (Journal American August 18th, 1950); "A 33 year old radar expert was in Federal custody today awaiting his return to New York to face charges that link him with the Klaus Fuchs international spy ring... Sobell, the eighth American arrested in connection with the Fuchs spy apparatus... Sobell was the second alleged member of the Fuchs ring to face legal proceedings this week. Justice Department spokesman in Washington linked him with Julius Rosenberg..." (New York Times, August 20th, 1950). "N. b 4th Man (Rosenberg) in Atom Spy Ring Linked by F.B.I. to Gold-Fuchs Gang" (Daily Mirror, July 18th, 1950); "the spy ring which fed information to the Russians through Mr. Klaus Fuchs, top British atomic spy"

* I have no personal knowledge as to whether the accusations to Fuchs were prosecutor-inspired, but believe that on their face, and in view of their timing in relation to the arrest, the newspaper stories permit of no inference other than that the source of the characterization was the prosecutor.

(N.Y. Post, July 19th, 1950); "Morton Sobell, the latest suspect barged in the Klaus Fuchs atomic spy ring roundup" (Journal American, August 19th, 1950); "Sobell...seized as a member of the Dr. Klaus Fuchs atomic spy ring" (Daily News, August 19th, 1950); "Morton Sobell, accused of belonging to the Klaus Fuchs spy ring which fed atomic secrets to Russia", (Daily Mirror, August 25th, 1950, p. 10); "it was expected (Greenglass would turn Government witness at the trial of his co-conspirators in the Klaus Fuchs atomic spy ring..The Fuchs spy plotters have been described as those mainly responsible for the fact that Russia now has the atomic bomb" (Journal American, October 13th, 1950); "Hoover's announcement of Rosenberg's arrest declared that the suspect was part of the ring that included Fuchs, the British nuclear physicist and three other Americans--Gold, David Greenglass and Alfred Dean Slack" (Journal American July 13th, 1950); and finally "ATOM SPY TRIAL OPENS - CHARGE LINK TO FUCHS AND GOLD" "All were charged specifically with espionage and conspiracy as key figures in the notorious Klaus Fuchs-Harry Gold spy ring, whose success the Government claims cost the United States five years in armament advantage" (Journal American March 6, 1951).

All this, despite the fact that it was ultimately conceded (but in the absence of the jury) that there was no claim of conspiracy by Sobell, or Mr. or Mrs. Rosenberg, with Fuchs (R. 836-7).

The constant reference to Fuchs in the pre-trial publicity may not have been primarily motivated by a desire to prejudice the defendants. The motive may have been laudable or it may have not, for repeatedly and unjustly charging that the defendants were co-conspirators with Fuchs. The result is determinative. "The prejudicial effect...in being brought to trial in the hostile atmosphere engendered by all this pre-trial publicity, would obviously be as great, whether such publicity were generated by the prosecuting officials or by a congressional committee hearing".

(MAGRUDER, C.J., for the Court of Appeals, IRVING, BREWSTER, SELIGMAN
v. United States, No. 4459, October Term 1952, October 10, 1952).

PRINT-TRAIL INFLUENCY IN CRIMINAL

14. "Of course, it would have been a gross inequity on the part of the prosecuting officials if they had made available to the press all this damaging material respecting Glancy" (Glancy v. United States, *supra*). "Newspapers, in the enjoyment of their constitutional rights, may not deprive accused persons of their right to fair trial. These convictions, accompanied by such events, do not meet any civilized conception of due process of law" (Jackson and Frankfurter, J., concurring in Sheppard v. State of Florida, 341 U.S. 30, 52).

The grounds of collateral attack set forth above--the Perl incident, and the repeated unjust accusations of "atom spy" and "Fuchs ring" are independent of each other and of the ground set forth in the following claim; and yet they must also be incorporated into, and taken as part of the following, for it is the contention of petitioner that by the intermittent employment by prosecuting officials of the newspapers, radio and television, for the dissemination of their belief in the guilt of petitioner and his co-defendants, and the advance depiction of evidence both admissible and inadmissible against them, the prosecution made a fair trial before an impartial jury an impossibility.

"Trial by newspapers", like all catch phrases, may be loosely used but it summarizes an evil influence upon the administration of criminal justice in this country". (Frankfurter, J., concurring in Fennekamp v. Florida, 321 U.S. 331). The courts may still wrestle with the problem created by publicity for which the prosecution has no responsibility, but when prosecution officials are direct participants in the bringing to bear of the "evil influence", there is a violation of due process of law.

15. This issue is but tendered by these papers; the full scope of what is complained of can only be portrayed by the use of this Court's process to compel disclosure of the nature and extent of the pre-trial "press-feeding" that took place here on the part

of the prosecution, both by way of formal press release and by way of informal announcement.

13. As related above, the arrest of Mr. Klaus Fuchs was an event of a notorious and shocking character, both because of the nature of our relations with the Soviet Union, and the shock and horror attendant upon announcements relating to the atomic bomb and the hydrogen bomb. It seems to have been thought appropriate for the F.B.I. to announce "that the case involving Robert (sic) Fuchs was developed by British authorities on information furnished to them by the Federal Bureau of Investigation" (official F.B.I. release, e.g. Journal American February 3rd, 1950).

Immediately thereafter, it seemed appropriate to broadcast "U.S.A. LAUNCHES HUNT FOR R. KLAUS FUCHS" (Journal American, February 5th, 1950). The "hunt" was accompanied by a spate of publicity typified by a series of prominently published articles (Journal American, February 12, 13, 14, 15, 16, 1950) charging "Atomic spies shielded by U.S. official laxity", complaining "No American arrested yet" and inquiring "Who Protects Them?"

Whether because of this background, or for other reasons, not themselves of great significance, the series of arrests that preceded the present prosecution were accompanied not merely by the usual newspaper coverage of criminal apprehensions; they were announced by press release after press release, and heralded by off-the-record and on-the-record predictions and claims, all calculated to produce a pre-trial atmosphere of hostility and prejudgment of guilt. There was even an open appeal to prejudice in reference to the Eastern European parentage of one of the defendants--a reference that would never have been admissible at the trial--and editorialization which is in fact incompatible with the indictment on which the defendants were actually tried; for example, the Director of the Federal Bureau of Investigation was fit to state, in an official release:

"The gravity of Rosenberg's offense is accentuated by the fact that through his influence in the espionage ring as a native born American citizen, he has resolutely sought ways and means to secretly

coincide with the exist government to the detriment
of his own country". (Journal African July 1st, 1950).

17. The purpose of this affidavit is not to present more
than the highlights of petitioner's claim of pre-trial harassment
and exploitation by the prosecution agency. It has been physically
impossible to gather and prepare the materials separately, but the
documentation is to be found, in sufficient volume to demonstrate
the need for at least a hearing on the issue, in the exhibits
annexed to the petition of the defendants *op. cit.*, signed by
Samuel D. Koch, dated November 24th, 1952.

18. The conduct of the prosecution must be evaluated in
the light of the quality and character of the public opinion formed
by multiple press, radio and television references to the im-
pact of atomic warfare, and namely, atomic espionage and Communist
activity in 1950-51. Obviously the prosecution has no direct
responsibility for the pre-existing general public sentiment
(except, in a social way, where the law was formed, or nontri-
buted to by legislative committee and their supporting bills
in the interest of public welfare; for the source of such respon-
sibility, (cf. *Islands v. United States*, *supra*). But the
fact of the widespread opinion, prejudices and tendencies
brought about before and during the pre-trial period, must be
taken into account in measuring responsibility for what was then
done in specific relation to this case. A narrative record could
be made as to those other matters.

a. No proof need be tendered on the issue that there
existed in 1950-51 a "pervasive feeling against Communists"
that has been the object of judicial notice (*White v. v.
Johnson*, 193 U.S. (2d) 201, 22).

b. Reference has been made to the issue of the value
of atomic weapons testing with regard to the outcome or the threat
of atomic warfare—hydrogen or hydrogen. As stated previously
of 1950, it had not, up to date, in the subsequent period. Or
example: "Atom and Hydrogen Divisioned by Day" (U.S. Times, August
10, 1950); "Russia Planted in atomic bomb" (U.S. Times, August
18)

, 1950); "Atomic Arms Pose Big Problem Here" (N.Y. Times August 16, 1950); "Order Red Vessels Halted in Bay to Undergo Search for Explosives" (Daily Mirror, July 2, 1950); "Don't Play With Reds Atom Skill, Triton Warns" (Daily Mirror, August 5, 1950); "Don't Andover Escalate Atom Bomb Effect" (Daily Mirror August 13, 1950); "If Red A-bomb Come They'll Come A-Bombing; A-Han" (Daily Mirror, September 1, 1950); those are but a few representative headlines during the single month that petitioners were arrested, and unjustly labeled ~~as~~ ~~the~~ ~~were~~ ~~an~~ ~~"atom spy"~~.

c. The whole subject of espionage was ~~the~~ one that was dominantly featured in--with the more or less sensational treatment that this subject always received in press coverage. "Federal Jury Looks Tighter Not on Spies" (Journal American, June 15, 1950); "Red Spy Activities Put at New High" (Journal American, February 9, 1950); President Warns U.S. of "Spy Peril" (N.Y. Times July 26, 1950); "Senate Group Votes Death for Spies For Next Two Years" (Daily Mirror, August 1, 1950); "Reds Shift A-Spy Pattern" (Journal American, June 17, 1950) are but a few representative examples.

d. It may be appropriate to introduce the material that follows with an item appearing in the press of this period:

"Public media in Britain are in no position at this point in the Mucha case to match the scrutiny to which security incidents may be subjected in the United States. British law forbids the press to say anything which might prejudice the defendant's chances for a fair trial". (New York Times, Feb. 19, 1950, Sec. 2 p. 7)

Instead of the unusual precaution and self-restraint that should have been exercised by the prosecuting agencies, not only because of the grave passion-rousing character of the charge, but because of the existing inflamed state of public opinion, the arrests in the present case were accompanied by a succession of foul blows calculated to make dispassionate consideration and a fair trial utterly impossible.

The pattern was established at the time of the arrest of Harry Gold and David Greenglass. Each of these arrests was accompanied by a fanfare of publicity, not merely prosecution-inspired, but prosecution-announced.

Col. W. G. Farver, Director of the Central Bureau of Investigation and Attorney General, New York State, held in a joint statement at Washington that Mr. Fuchs had turned over secrets about the atomic bomb to "U.S.A." (Daily News, May 24, 1960). The Polarens are accused to have been a lengthy campaign carrying out a illusory role as a Soviet agent, and again reported sightings, detailing a series of contacts with Fuchs, claiming that the U.S.A. "had long been watching him", within days purporting statement of alleged motivations (i.e. "helping a nation whose final aims I approved"). It was considered proper and germane to include in the announcement: "He will be described as having been born in Switzerland of parents who were both natives of Russia.... Their family name of Golodnitsky was changed to Gold when the parents were naturalized, the document said".

Greenglass: Instead of a joint announcement, parallel announcements were made by U.S. Attorney Paul J. and New York Special Agent in Charge Edward Scheidt. (Daily News, June 17th, 1960). One of them made a point of making clear that Greenglass' father was Russian born and his mother English born (Daily News, June 17th, 1960). Mr. Neypol said that Greenglass "actually was engaged in constructing the atom bomb" at Los Alamos, a stretching of the truth for sensational purposes was compared to Greenglass' mutual tritium at the trial. Mr. Scheidt felt compelled to claim that Greenglass had disclosed his activities in being to help an "ally" deprived of information by "gross negligence". Mr. Neypol apparently called in the reporters twice; "Neypol later gave reporters a slightly amended version of Greenglass' statement about fleeing". (Daily News, June 17th, 1960).

In the previous day, a lengthy statement had been released, with details of all the evidence etc., by J. Edgar Hoover, pertaining to the arrest of Alfred Jean Black at Syracuse. (Daily News, June 16th, 1960; New York Times June 16, 1960).

20. The pattern thus established was exploited to the limit, in connection with the arrests of the defendants who were tried on their plea of "not guilty" in this case. The characterizations that were employed had a repeat value, for they were referred back to and noted on subsequent occasions with reference to the pre-trial proceedings, or in connection with the impending trial.

The treatment of the arrest of Julius Rosenberg was calculated to strip him of the presumption of innocence and preclude the possibility of a fair trial by an impartial jury. Such treatment obviously rebounded to the prejudice of all defendants. The press-clippings speak for themselves as to whether any jury could have been secured, which would have been free of preconceptions, even if "in answer to inquiry by the trial judge" they had affirmed "that they were prepared to determine (his) guilt or innocence solely on the basis of evidence produced at the trial". (Idem v. U.S., *supra*).

In evaluating the effect of the following, full significance must be accorded to the trust which most Americans place in the press. It is that trust that was being exploited by the use of its name as a badge of authenticity on pre-trial announcements.

"JEWISH AMERICAN SCIENTIST ATOMIC SPY".

"New Yorker (Julius Rosenberg) Seized Here for Los Alamos Bomb Data for Soviet Ring, F.B.I. Reports"

The foregoing was the headline treatment in the New York Times, July 16th, 1950. The source is made clear. "The announcement of the arrest was made jointly by J. Howard McGrath, the Attorney General and J. Edgar Hoover, Director of the Federal Bureau of Investigation". The release not only was lengthy, but full of detail, and incendiary characterization calculated to prejudice Rosenberg irretrievably. "Mr. Hoover described Mr. Rosenberg as another important link in the espionage network that included Mr. Klaus Fuchs," etc. "Mr. Hoover related that Rosenberg recruited reenlist... Mr. Hoover said that Rosenberg gave Green Glass specific information as to the type of atomic data the Russians

desired". A substantial part of the prosecution's case at the trial was outlined. There followed the editorialization, attributed to Mr. Hoover and not denied by him, that the "gravity of the Rosenberg offense was accentuated by the fact that he, an American born citizen aggressively sought means to secretly conspire with the Soviet Government to the detriment of his own country".

The pernicious effect of this particular statement, improper in itself, in advance of trial, is heightened by the fact that even its indictment did not charge that the defendants sought to bring about "injury to the United States" but only "advantage to a foreign nation". And it was only the latter of three alternative forms of statutory intent (former 50 U.S.C. Sec. 32) which the prosecution purported to have proved at the trial.

The characterization as "a grasseur" had a repeat value which permitted it to be driven in on other occasions. The Evening Journal American on July 18, 1950, picked up and employed it thus: "Brandied as one of the most 'aggressive' agents in the Klaus Fuchs atomic spying which turned over vital secrets to the Russians, A City college engineering graduate today was held on charges of wartime espionage. He is Julius Rosenberg..." It was picked up to serve triple duty a month later when it was reported, Journal American, August 17, 1950, that "Dr. and Mrs. Rosenberg "were indicted today as 'aggressive' members of the Klaus Fuchs atomic spying" - needless to say, the word "aggressive" does not appear in the indictment.

Likewise, the characterization of Rosenberg as "an other important link in the Soviet espionage operation", was picked up to be applied to him on other occasions, e.g. when the New York Times reported the first indictment against him, August 17, 1950, p. 7 col. 1; likewise, the New York Post, August 17, 1950 p. 1c, Col. 3.

The full text of the Hoover-Hughes press release would have to be reproduced at the hearing when it is sought to have on behalf of petitioner. Some of the changing statements were reported and displayed in all of the newspapers; some in one paper or another. In a apparently incident, for example, the information, obviously fit-

nificant in bringing about a pre-judgment by the community, that Rosenberg was fired by the War Secretary in 1945 on information that he was a card-carrying Communist" (New York Post, July 18, 1950, p. 14, col. 5; see also Daily News, July 18, 1950, p. 3). It was asserted in the Daily Mirror, July 18, 1950, "Hoover said his inquiry indicates that Rosenberg on his own initiative made himself available to Soviet agents so he could do the work he felt he was slated for" and thus "do somethin' directly to help Russia". On the next day, the same paper added, attributing the statement to the F.B.I., that Rosenberg "had pleaded with Weinglass to fire the United States" (p. 5, col. 5, July 19, 1950).

If the New York Post and Daily News are to be believed, the F.B.I. even went so far as to state:

"The F.B.I. quoted Rosenberg as saying 'I wanted to do something to directly help Russia'" (N.Y. Post July 18, 1950, p. 24, col. 1; see also Daily News July 18, 1950, p. 3 and 21).

Of course, no confession or purported confession to the F.B.I. was ever offered in the evidence at the trial; nor has any denial or repudiation of the above statement ever been published. (See Sheppard v. State of Florida, 341 U.S. 89, 83).

21. The arrest of Ethel Rosenberg was announced with the same type of treatment, albeit not as extensive. "Arrest of the hysterical Mrs. Ethel Rosenberg of 10 Konnor Street in the Knickerbocker Village development, was announced simultaneously by U.S. Attorney Tappol here and by F.B.I. Director Hoover in Washington" Daily Mirror, August 12, 1950, page 2. "Tappol said she and her husband and others recruited her brother to get secret atom data", (id), and, without the burdensome difficulty of awaiting a court ruling as to the admissibility of the evidence, or any accompanying caution, "we have ample evidence of the fact Mrs. Rosenberg and her husband have been affiliated with Communist activities for a long period of time" said Tappol (id; the same statement is quoted in the New York Times of August 12, 1950, p. 1, only there it is attributed to "Myles J. Lane, Chief Assistant United States Attorney". Accord Journal American, August 13, 1950, p. 4).

There was also the inevitable: "The FBI's report on Mr. Rosenberg's background showed that he was born in New York City, September 28, 1915, of a Russian father and an Austrian mother".

72. The pattern was repeated at the time of the arrest of this petitioner. The formal announcement was made, it appears, by F.B.I. Director J. Edgar Hoover (c.c., Daily News, August 18, 1950, p. 2; Journal American August 1, 1950, p. 1) but United States Attorney Saypol was not far behind, in making a series of claims and innuendos (c.c., New York Times August 19, 1950, p. 1; Daily News, August 19, 1950, p. 2). There was no delay in stating: "His parents, both born in Russia, are naturalized Americans". (Daily News, August 17, 1950.)

"U.S. Attorney Saypol said that the arrest of Sobell was made under his direction. "We have been investigating Sobell for some time", he added, " (Daily News, August 18, 1950). By the next day this had grown to "U.S. Attorney Saypol said he had been investigating 'for a long time'". (N.Y. Post August 20th, 1950, p. 23).

The references to Sobell as an "atom spy" collaborator of Pugs, all wholly unjust, even on the interpretation of the testimony on the trial most favorable to the government, are sufficiently set forth above. In an additional area, at the time of the arrest, there was mortal harm done to Sobell's possibility of receiving a fair trial. At the time the prosecution decided to question him, they learned he was on a trip to Mexico, and by their strategy he was caused to be brought back, as more fully set forth in the record of the trial. A question was presented for the jury as to whether or not his presence in Mexico constituted "flight" and hence some evidence of consciousness of guilt. The prosecution's brief in the Circuit Court of Appeals (p.2), concedes that this was a jury question. The prosecution even insisted that evidence of alleged "deportation" from Mexico was admissible, claiming:

"Had it not been for that evidence the jury might have inferred that Sobell returned to the United States

voluntarily (perhaps from a vacation in Mexico) and that he had always intended to do so" (Br. C.C.A., p.65-66)

But the fact is that no juror who had read about the case in the newspapers - and the record shows that most of them had (R.68) could have had an open mind in view of the publicity which was calculated to have the question whether or not his absence was "flight", prejudged and decided against Sobell, even before he had a chance to plead to the indictment. "F.B.I. Director Hoover said Sobell, who is accused of having spied for Russia...fled from New York to Mexico City by plane after the arrest of David Greenglass, June 18" (Journal American, August 18, 1950 p. 1). "The family fled to Mexico City" (Journal American, August 24, 1950 p. 4); "Leaving Radar Expert Nabbed as Atom Spy" (Daily News, three column headline, August 19, p.2); "Norton Sobell, 33 year old radar expert...caught on the lam in Texas....was indicted with four other asserted members of the Klaus Fuchs - Harry Gold atomic spy ring yesterday" (Daily News, October 11, '48, p.4) "In Washington, F.B.I. Director Hoover said Sobell fled the U.S. in June to avoid arrest the day after the arrest of David Greenglass...The F.B.I. said that Sobell was so alarmed by the arrest of Greenglass that he took a plane for Mexico City" (N.Y. Post, August 18, 1950 p.8)

Most extensive was the treatment of the subject by the New York Times, which added material never offered in evidence at the trial, and hence never subject to the rules of evidence or the test of cross-examination. It is not possible that the following was the work of an industrious reporter; the report is too soon after the event that it must have been "fed" by the prosecution:

Subheadline: "Believed to have gone to get passage to Soviet".

Subheadline: "Left country on June 21".

Text: "It is believed they were awaiting Russian visas for a third Asian country from which they would proceed to the Soviet Union or one of its satellites".

Text: "In addition, the engineer never lost touch with his employer, The Reeves Instrument Corporation".

IN THE UNITED STATES DISTRICT COURT FOR THE
SOUTHERN DISTRICT OF NEW YORK

26. As reason of proof to be tendered in the Rosenberg petition under section 2253, it will be jointly claimed in behalf of all petitioners that the conviction herein was secured by employment of perjured testimony, knowingly, by the prosecution. While this witness did not name this petitioner, the case was tried on a theory of a single conspiracy, and hence, if the point be established, it should inure to the benefit of all defendants.

APPLICANT'S REQUEST FOR STAY OR TRANSFER

26. Petitioner's attorney has prepared this affidavit and petition under great time handicap and pressures as reflected in his earlier affidavit of November 19, 1952, in support of an application for a temporary stay of the transfer of petitioner from detention at New York, to the federal penitentiary at Alcatraz. I, therefore, beg leave to re-urge the right to amend and supplement this petition and affidavit (a) by reference to any other or additional claim or ground that may be made on behalf of the Rosenbergs and which will be of a character that should inure to the benefit of Sobell; (b) by such additional claim or ground as may be fit or proper, pending final decision of this application.

27. By order to show cause, signed November 19, 1952, on the showing made on my affidavit of November 19, 1952, the Attorney General was stayed from transferring Sobell from the Federal Detention Headquarters on West Street, pending hearing on a motion to restrain such transfer. At a hearing at 3:30 P.M. November 19, 1952, the United States Attorney moved to vacate the stay before the Judge who signed the order (Weinfeld, D.J.) and the motion to vacate was denied. On the return date of the motion brought on for hearing by the order to show cause, the Court (Weinfeld, S.J.) directed that the stay be continued until midnight, Tuesday, November 20, 1952. This relief was granted without prejudice, as I construe the Court's remarks, to a renewal of the application for a stay, at the time that this petition shall be presented.

28. On behalf of the petitioner, and with his express authorization, I do now hereby request that a further stay of his transfer be granted as provided for in the order to show cause presented with these papers. In paragraph 27 above, I have described the only previous application for this relief, and the extent to which it was granted. By its favorable disposition of the earlier application, the Court has held, after having heard the United States Attorney twice, that it had power to grant such relief. The question once more presented is as to whether the Court should exercise its power. As bearing on this question, in addition to the facts stated in my affidavits of November 13th and 18th, I desire to add: the petitioner is a scientist, and holder of a Master's degree. He is clear-thinking, articulate and at all stages, since I was retained to assist in his appeal to the Court of Appeals, has been concerned with the content of the legal arguments to be made on his behalf, and the briefs to be submitted. Not only has his desire to participate been keen, but his ability to do so has been noteworthy, in connection with preparation of briefs, and the consultations concerning the preparation of this petition. The question presented at this stage, and on this application, is whether he may continue, pending such orders as this Court may make "on the merits" of this petition, to have the benefit of the advice of counsel charged with responsibility of prosecuting his petition, and the right to continue to contribute, in consultation, in the manner in which he heretofore has. In this connection, it is not without significance that he risked loss of many months' time by requesting that the Supreme Court stay the mandate of the Circuit Court, after affirmance; it is also significant that the Supreme Court granted the motion for stay of mandate (No. 1715) upon the filing of a motion in which it was stated on petitioner's behalf: "Unless a stay of mandate as sought herein be granted, petitioner will be irreparably injured in that he will be transferred to a Federal Penitentiary outside of New York City and unable to consult with counsel during a vital period".

29. There can be no injury to the Government if the further stay sought herein be granted. Such a statement was made in my affidavit of November 19th, in support of a request for a temporary stay; no denial was made of the facts stated therein, nor even any affidavit tendered in opposition. The facts stated orally by the United States Attorney, in his application to vacate the stay, were found, on independent inquiry by the Court, to be inaccurate. It might seem reasonable, in view of this, to inquire, to the extent that the Court's discretion is involved here, into the motivation for the Government's opposition. In this connection, I think it proper to state that after petitioner's conviction, the penological judgment of the Bureau of Prisons impelled its Director to direct "Obell's transfer to Atlanta penitentiary. It was stated to me by Mr. Bennett on October 21, 1962, that it was not planned, as of that date, to change that destination. While there is not presented by this application any question as to the reviewability of Mr. Bennett's more recent decision, the Court, in exercising its discretion, should take into account the fact that petitioner is a young, responsible individual, a first offender, with parents and a wife and two children residing in the New York area. In the light of these facts, and the judicially known character of Alcatraz as a place of confinement of unusually dangerous criminals, the decision to transfer him there seems wholly arbitrary, and to be the result of a judgment in no way affected by the proper administrative concern of the Bureau of Prisons.

30. Apart from those considerations, which bear on whether or not the presence of the prisoner is necessary, whether or not he is to testify, is the fact that it cannot now be stated with certainty whether it will be necessary for him to testify. In the event a factual hearing were required on the claims set forth in this and the Governor's petition, it would seem most proper, if not required, that he be present; the scope of his

right, as declared by the Court of Appeals for this Circuit is that he be present and "free to testify" (U.S. v. Phillips, 180 F.2d) 445, 448)--a formulation making it unnecessary to make a definitive determination that he will do so.

E. Howard G. Miller

sworn to before me this
24^a day of November, 1952.

Given under my hand and seal
of the Commonwealth of Massachusetts
at Boston this 24th day of November, 1952.

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

UNITED STATES OF AMERICA,

vs.

NORTON COBELL,

Crim. 134/245

defendant.

Upon the annexed petition of NORTON COBELL, dated the 24th day of November, 1952, and the affidavits of HOWARD H. MEYER, sworn to the 19th, 20th and 24th days of November, 1952, and upon the files and records of this case, let the United States Attorney show cause before this Court, at a Criminal Term thereof to be held at the Court House, Foley Square, on the _____ day of _____, 1952, at 10:30 A.M. on the forenoon of that

day, or as soon thereafter as counsel can be heard, why an order should not be made, pursuant to 28 U.S.C. 2255 vacating and setting aside the judgment of conviction of Norton Cobell, defendant and petitioner herein, or in the alternative, granting a prompt hearing on this motion; and, sufficient cause appearing for this order, it is

ORDERED that service of a copy of this order and copies of the papers on which it was made, on the United States Attorney, on or before November _____, 1952, shall constitute sufficient service thereof, and it is further

ORDERED that pending the hearing and determination of this motion, the Attorney General or his representatives be, and they are hereby stayed from transferring defendant and petitioner from the Federal Detention Headquarters, New York City, to any Federal Penitentiary.

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

UNITED STATES OF AMERICA,

-against-

JOSEPH ROSENBERG, ETHEL ROSENBERG,
et al.,

C 134-245

Defendants.

On the annexed petition of Julius Rosenberg and Ethel Rosenberg, by Emanuel V. Bloch, their attorney, duly verified on the 24th day of November, 1952, and upon the indictment herein, and upon all the other papers and proceedings herein, LET the United States of America, or its attorneys, show cause before the Criminal Part of this Court, to be held in the Courthouse thereof, at Foley Square, in the Borough of Manhattan, City and State of New York, on the day of November, 1952, at o'clock in the noon of that day, or as soon thereafter as counsel can be heard, why an order should not be made and entered herein:

(1) vacating and setting aside the respective sentences of the petitioners and discharging them from detention and imprisonment; or

(2) in the alternative, granting a hearing on the petition herein to determine the issues and make findings of fact and conclusions of law, and upon such findings and conclusions, vacating and setting aside the respective sentences of the petitioners and discharging them from detention and imprisonment; and

(3) pending the determination of these proceedings, staying the United States of America, and any agency or agent thereof, from executing these petitioners, pursuant to the judgment herein, dated April 6, 1951, and the order of this Court, dated November 21, 1952; and from proceeding in any manner, or from taking any steps to, or tending to,

the execution of the aforesaid order; and
for such other and further relief as to this Court may seem
proper;

AND in the meantime, it is

ORDERED that pending the hearing and determination
of this action, the United States of America, and any
agency or agent thereof, be, and it is hereby stayed from
executing these petitioners, pursuant to the judgment and
order above stated, and from proceeding in any manner or
from taking any steps to, or tending to, execute the afore-
said judgment or order; SUFFICIENT reason appearing there-
for from the petition above recited. LET service of a copy of
this order and the papers upon which it is based, upon the
United States of America on or before the day of November,
1952, be deemed sufficient.

Dated: New York, New York

 FROM : SAC, PHILADELPHIA (65-4350)
 SUBJECT: ETHEL ROSENBERG,
 JULIUS ROSENBERG
 ESPIONAGE - R
 (Origin, New York)

DATE: 12/10/52

R.9-1
 On 12/4/52, Warden G. W. HUMPHREY, U. S. Penitentiary, Lewisburg, Pa., confidentially furnished SA W. JAMES WOOD a letter directed to him, which reads as follows:

"11/26/52
 Chicago, Ill.

"Kindly forward address of the Rosenberg's lawyer. I have a few facts for him concerning his case.

"Respectfully yours,

ALL INFORMATION CONTAINED
 HEREIN IS UNCLASSIFIED
 DATE 7-22-86 BY 3042 put-to/c
 /s/ M. MENDELSON
 c/o General Delivery
 Chicago, Ill. P.O."

Warden HUMPHREY advised that neither of the ROSENBERGS has ever been incarcerated at Lewisburg, and that no reply would be given to the above letter. The above letter was transmitted in an envelope postmarked at Chicago, 11/26/52, and bearing the above return address.

Warden HUMPHREY furnished the above letter to SA WOOD and it is being transmitted to the Chicago Office for the information of that office.

Supervisor McAndrews of the New York Office advised telephonically today that it has been ascertained strictly confidentially that Judge Ryan will hand down a decision tomorrow on the motions pending relating to the case of Julius and Ethel Rosenberg and Morton Sobell. The decision will deny the motions completely and will not call for the taking of any oral testimony.

Mr. McAndrews advised that they would get a copy of the decision, which is supposed to be about 50 pages long, and will furnish it to the Bureau as soon as possible.

JULIUS ROSENBERG, ET AL, ESPIONAGE DASH R. HEARING BEFORE JUDGE RYAN WAS RESUMED AT ONE THIRTY PM TODAY. ORAL ARGUMENTS ON POINTS TAKEN UP BY BLOCH AND MEYER WERE MADE AT LENGTH. DURING THESE ARGUMENTS JUDGE RYAN INDICATED THAT HE SAW NO MERIT TO THEIR ARGUMENTS CONCERNING NEWSPAPER PUBLICITY OR THROUGH THE RETURN OF THE INDICTMENT AGAINST WILLIAM PEARL. RYAN STATED THAT DEFENDANTS AND THEIR COUNSEL WERE MEMBERS OF THE COMMUNITY OF NYC AND IN THE NORMAL COURSE OF EVENTS, WOULD HAVE BEEN AWARE OF THE EFFECTS OF THE NEWSPAPER PUBLICITY ON THE CASES AND THAT COUNSEL SHOULD HAVE ASKED FOR A CONTINUANCE OR OTHER RELIEF DURING THE TRIAL. JUDGE RYAN AGAIN INDICATED THAT HE PLACED NO WEIGHT IN THE AFFIDAVIT OF THE FOREIGN SCIENTISTS ON THE CREDITABILITY OF DAVID GREENGLASS OR ON HIS ABILITY TO REMEMBER THE TECHNICAL DATA THAT WAS TRANSFERRED TO THE ROSENBERGS. HOWARD MEYER MADE A REQUEST TO HAVE MORTON SOBELL BROUGHT BACK FROM ALCATRAZ TO NY. THIS REQUEST WAS DENIED BY JUDGE RYAN ON THE GROUNDS THAT HE SAW NO NECESSITY FOR SOBELL'S PRESENCE TO TESTIFY. HE ADDED THAT IF PAPERS TO BE FILED INDICATED THAT IT WAS NECESSARY FOR SOBELL TO TESTIFY, HE COULD BE BROUGHT BACK BUT UP TO THE CURRENT TIME HE SAW NO NECESSITY FOR HIS

PRESENCE. BLOCH ASKED FOR A STAY OF THE EXECUTION OF THE ROSENBERGS. JUDGE RYAN DENIED THIS APPLICATION, STATING THAT HE INTENDED TO RENDER HIS DECISION BY MONDAY, DECEMBER EIGHT NEXT. JUDGE RYAN FURTHER STATED THAT ALL ADDITIONAL AFFIDAVITS MUST BE SUBMITTED BY NOON OF FRIDAY, DECEMBER FIVE AND THAT IF NO ADDITIONAL INFO APPEARED IN THESE AFFIDAVITS, THERE WOULD BE NO ORAL HEARING ON ANY OF THE POINTS RAISED. BUREAU WILL BE ADVISED OF DEVELOPMENT.

JULIUS ROSENBERG, ETAL; ESP DASH R. HEARING ON PROCEEDING UNDER SECTION TWO TWO FIVE FIVE RESUMED AT ELEVEN TEN AM BEFORE JUDGE RYAN. *BLOCH* ADVISED THE COURT THAT IT WOULD BE NECESSARY FOR HIM TO CALL ORAL WITNESSES IN SUPPORT OF HIS POINT ONE. HE STATED ALL NY, WASHINGTON, DC, UP AND AP REPORTERS WOULD BE CALLED TO DEMONSTRATE THAT DIRECTOR HOOVER AND AG MC GRATH ISSUED JOINT STATEMENTS FROM WASHINGTON AND SAYPOL AND AUSA'S MADE STATEMENTS IN NYC TO INFLAME PUBLIC ATMOSPHERE. RYAN RULED IT WAS UNNECESSARY TO CALL THESE PEOPLE. HE GRANTED BLOCH PERMISSION TO SUBMIT AFFIDAVITS OF ANY REPORTERS AND AFTER READING SUCH AFFIDAVIT HE WOULD DETERMINE WHETHER IT WOULD BE NECESSARY FOR THEM TO GIVE FULL TESTIMONY. RYAN ADVISED BLOCH THAT THIS PROCEEDING COULD NOT BE USED TO BEGIN AN EXPLORATORY JOURNEY AND THAT NO ORAL TESTIMONY WOULD BE NEEDED UNLESS THE AFFIDAVITS SHOWED A BASIS. HE ADVISED THAT THIS PROCEEDING COULD NOT UNDULY DELAY THE PROCESSES OF COURT AND GAVE HIM UNTIL FRIDAY NOON TO SUBMIT ADDITIONAL AFFIDAVIT. HE ALSO STATED THAT NO SUBPOENA WOULD BE ISSUED FOR ANY WITNESS WITHOUT THE AUTHORITY OF THE COURT.

BLOCH ASKED TO OFFER AS A WITNESS AN EXPERT IN MASS PSYCHOLOGY. RYAN

Transmit the following Teletype message to:

ASKED IF HE WAS REFERRING TO THE SO CALLED POLL EXPERT AND FINALLY RULED THAT HE WOULD NOT HEAR ANY TESTIMONY FROM SUCH AN INDIVIDUAL. ON POINT TWO ON THE PERJURED TESTIMONY OF DAVID GREENGLASS, BLOCH WISHED TO SUBPOENA SUPREME COURT JUSTICE IRVING SAYPOL AND JUDGE IRVING H. KAUFFMAN. BLOCH STATED THAT THIS WAS NECESSARY ON THE BASIS OF AN OFF THE RECORD COLLOQUY. BLOCH STATED THAT ON THE BASIS OF THIS COLLOQUY, HE DID NOT MOVE FOR A MISTRIAL ON THE TIMING OF THE PERL INDICTMENT. RYAN REFUSED TO CALL SAYPOL AND KAUFFMAN. BLOCH STATED HE WISHED TO CALL SAYPOL TO PROVE THERE WAS SUPPRESSION OF ON MATERIAL EVIDENCE DURING TRIAL. RYAN ASKED HIM WHAT EVIDENCE WAS SUPPRESSED. BLOCH ANSWERED THAT GREENGLASS WAS PERMITTED TO TESTIFY THAT HE COOPERATED WITH AUTHORITIES FROM THE BEGINNING, AND AFTER THE TRIAL SAYPOL GAVE A STATEMENT TO THE PRESS THAT THIS WAS NOT SO. RYAN ASKED WAS GREENGLASS A WITNESS AND CROSS DASH EXAMINED. WHEN BLOCH ANSWERED YES, RYAN REFUSED TO SUBPOENA SAYPOL. BLOCH THEN ASKED TO SUBPOENA O. JOHN ROGGE, MR. FABRICANT, MR. GORDON AND RUTH GREENGLASS TO PROVE THAT A DEAL WAS MADE BETWEEN USA AND THE GREENGLASSES TO PROCURE A LENIENT SENTENCE FOR DAVID AND TO LET RUTH OFF FREE. RYAN ASKED WHAT INFORMATION DO YOU HAVE BEYOND THE SUSPICION THAT IT WAS A DEAL. HE ASKED IF BLOCH HAD STATED HIS GROUNDS FOR THIS SUSPICION. BLOCH ANSWERED YES AND RYAN GRANTED HIM UNTIL FRIDAY NOON TO AMPLIFY BY AFFIDAVIT HIS CHARGES. RYAN STATED THAT THE ALLEGATION

PAGE THREE

Transmit the following Teletype message to:

OF BLOCH WAS VERY SERIOUS AND SHOULD BE MADE ON BASIS OF FACT AND THE FACTS SHOULD BE PRESENTED TO THE COURT IN AFFIDAVITS. BLOCH ASKED IF HE WOULD HAVE TO SUPPLY ALL OF HIS SOURCES INCLUDING CONFIDENTIAL INFORMANTS. RYAN TOLD HIM QUOTE "YOU SHOULD SET FORTH FACTS AND SOURCES INCLUDING CONFIDENTIAL INFORMANTS" UNQUOTE. BLOCH THEN STATED HE DESIRED TO SUBPOENA SCIENTISTS WHO RESIDE OUTSIDE THE COUNTRY TO TESTIFY TO THE EFFECT THAT DAVID GREENGLASS WAS COACHED IN CONNECTION WITH THE TRIAL PREPARATION OF SKETCHES OF THE LENS MOLD AND CROSS SECTION OF THE ATOM BOMB. THEY ARGUED THAT IT WAS INCREDIBLE THAT DAVID GREENGLASS FIVE OR SIX YEARS AFTER RECEIVING THE INFORMATION WAS CAPABLE OF DRAWING REPLICAS WITHOUT OUTSIDE HELP, BOOKS OR SCIENTIFIC JOURNALS. RYAN STATED THAT THE AFFIDAVITS OF THE SCIENTISTS CONTAINED EXPRESSIONS OF THEIR OPINION THAT DAVID GREENGLASS TESTIFIED FALSELY AND UNTRUELY. HE STATED THAT THE TRUTH OF DAVID'S STATEMENTS WAS TO BE TRIED BY THE TRIAL JURY AND DECLINED TO TAKE ANY TESTIMONY FROM THESE EXPERTS THAT DAVID HAD COMMITTED PERJURY. ON POINT THREE BLOCH ALLEGED THAT THE TRANSFER OF MATERIAL FROM DAVID GREENGLASS TO JULIUS ROSENBERG WERE PUBLIC PROPERTY AND WERE NOT SECRET. HE STATED THAT HE WOULD SHOW ALL OF THE PROCESSES THAT WENT INTO THE CONSTRUCTION OF THE ATOM BOMB WHEN KNOWN ALL OVER THE WORLD AND THAT THE CLASSIFICATION OF THEM BY THE MILITARY WAS ARBITRARY AND CAPRICIOUS. RYAN STATED THAT THE CHARGE

Approved: _____

PAGE FOUR

Transmit the following Teletype message to:

WAS CONSPIRACY TO COMMIT ESPIONAGE. BLOCH STATED THAT HE HAD NO OPPORTUNITY DURING THE TRIAL TO SEND THROUGHOUT THE COUNTRY PEOPLE TO DETERMINE THE FACT THAT THE MATERIAL WAS NOT SECRET. RYAN ASKED HIM IF HE MADE AN APPLICATION TO THE COURT FOR ASSISTANCE IN THIS REGARD. HE SAID NO. BLOCH THEN ASKED THE COURT TO DIRECT THE GOVERNMENT TO SUBMIT ALL PRESS RELEASES ISSUED BY THE DEPARTMENT OF JUSTICE PROSECUTING OFFICIALS IN RESPECT TO THE CASE. IN ANSWER TO THIS HE ASKED FOR THE JUDGE TO PERMIT HIM TO SUBPOENA MINUTES OF THE GRAND JURY SITTING FROM AUGUST, NINETEEN FIFTY TO MARCH FIFTEENTH, FIFTYONE, PARTICULARLY IN CONNECTION WITH THE PERL INDICTMENT, AND THE FACT THAT THE GOVERNMENT HAD KNOWLEDGE OF PERL'S PERJURY LONG BEFORE THE ROSENBERG TRIAL AND HIS ARREST WAS TIMED TO TAKE PLACE DURING THE TRIAL. RYAN DENIED THE APPLICATION. BLOCH THEN ASKED THAT ON THE SCHNEIDER TESTIMONY HE WOULD OFFER NO PROOF BECAUSE THE GOVERNMENT HAD ADMITTED THAT IT USED PERJURED TESTIMONY DURING THE TRIAL AS WAS SET FORTH IN THE AFFIDAVIT OF SA JOHN A. HARRINGTON. RYAN RULED THAT IT WAS NOT NECESSARY TO TAKE ANY ORAL TESTIMONY ON ANY OF BLOCH'S POINTS AND INDICATED THAT HE WOULD MAKE A RULING ON FRIDAY NEXT. HOWARD MEYER ARGUED FOR SOBELL AND JOINED WITH THE APPLICATIONS MADE BY BLOCH. AFTER ARGUMENT RYAN STATED ["] WHERE THERE IS AN ISSUE OF FACT THE COURT MUST TAKE TESTIMONY, BUT WHERE NO ISSUES OF FACT ARE RAISED, THIS PROCEEDING WILL NOT BE USED TO

PAGE FIVE

Transmit the following Teletype message to:

AGRAIN TRY THE FACTS THAT HAVE ALREADY BEEN TRIED IN THE DISTRICT COURT "UNQUOTE. AUSA KILSHEIMER THEN STATED THAT THE GOVERNMENT DID NOT DISPUTE THE FACT THAT PRESS RELEASES HAD BEEN PRINTED AND HAD BEEN OBTAINED FROM GOVERNMENT SOURCES, BUT HE ARGUED THERE WAS NO NEED THAT THESE PRESS RELEASES OF THE FBI OR DEPARTMENT SHOULD BE SUBMITTED TO THE COURT. RYAN RULED THAT BLOCH'S APPLICATION TO FILE ALL PRESS RELEASES WAS DENIED. BLOCH THEN MENTIONED THE DULANEY CASE IN BOSTON AND RYAN STATED THAT IN THAT CASE THE DEFENDANT OBJECTED TO PROCEEDING WITH THE TRIAL ON THE BASIS OF PRE DASH TRIAL PUBLICITY. HE NOTED THAT BLOCH AT NO TIME DURING THE TRIAL MADE AN APPLICATION FOR A CONTINUANCE. RYAN THEN CAUTIONED ALL COUNSEL THAT THERE WERE STATEMENTS IN THE PAPERS FILED WITH HIM THAT DO NOT PERTAIN TO LEGAL DRAFTSMANSHIP AND CAUTIONED ALL COUNSEL TO REMAIN WITHIN THE LEGAL QUESTIONS IN THEIR ORAL ARGUMENTS. COURT THEN RECESSED AND ORAL ARGUMENT WILL RESUME AT ONE THIRTY PM. RYAN EXPECTS ARGUMENTS TO BE COMPLETED THIS PM OR AT THE EARLIEST TOMORROW AM. BUREAU WILL BE ADVISED OF DEVELOPMENTS.

DIRECTOR, FBI (100-258)

JULIUS ROSENBERG

MORTON SOBELL, KEP DASH R. WARDEN SWOPE, ALCATRAZ PRISON, ADVISED THAT AN INDIVIDUAL WHO IDENTIFIED HIMSELF AS ERNIE SCHERIN, ADAMS HOTEL, OAKLAND, CALIF. AND STATED HE WAS FROM THE EAST, TELEPHONICALLY REQUESTED AT FOUR TWENTY P.M., DEC. NINE, TO BE ALLOWED TO SEE SUBJECT AS HE HAD INFORMATION OF VITAL IMPORTANCE TO THE LIVES OF THE ROSENBERGS. SWOPE REFUSED THE REQUEST AND ADVISED HE WOULD HAVE TO CHECK ON SCHERIN. SCHERIN REFUSED TO STATE FULL NAME AND ADVISED HE DID NOT WANT TO TALK TO THE FBI. MANAGER, CLAUDE WOOD, ADAMS HOTEL, ADVISED THAT ONE ~~SCHERIN~~ REGISTERED ON MAY TWENTYTWO, LAST, FROM ~~STREIA~~, NO STATE SPECIFIED. SCHERIN, ACCORDING TO WOOD, IS ALONE, HAS NO APPARENT ASSOCIATES AND COMES AND GOES FROM THE HOTEL EACH DAY, BUT HIS OCCUPATION OR EMPLOYMENT IS UNKNOWN. NO FURTHER ACTION BEING TAKEN HERE. NO RECORD SCHERIN SR FILES.

At 11:45 a.m., December 10, 1952, Supervisor Tom McAndrews of the NYO telephonically advised that at 11:30 a.m., December 10, in the presence of members of the press, Judge Ryan handed down a decision in connection with the motions in captioned case.

Judge Ryan denied in all respects the motions of the above-named defendants. He refused to grant a stay of execution and likewise refused to take oral testimony. McAndrews advised that Judge Ryan's opinion is 28 pages in length and that the NYO is presently attempting to obtain a copy of the opinion and will forward it to the Bureau as soon as obtainable.

REPORT MADE AT NEW YORK	DATE WHEN MADE 12/10/52	PERIOD FOR WHICH MADE 8/5;-11/14/52	REPORT MADE BY JOHN A. HARRINGTON
TITLE JULIUS ROSENBERG; ET AL		CHARACTER OF CASE ESPIONAGE - R	

SYNOPSIS OF FACTS:

*See R.F.F.
12/10/52
A.F.J.*

Petition for a writ of certiorari denied by Supreme Court on 10/13/52 with only JUSTICE BLACK voting that petition should be granted. Motion for leave to file a brief by National Lawyers Guild as amicus curiae was denied 10/13/52. On 10/15/52, the Supreme Court granted a stay which permitted EMANUEL H. BLOCH 15 days to file a petition for a rehearing. The Government did not file any brief in opposition to this petition. On 11/17/52, the Supreme Court denied the petition of subjects for a rehearing. Again JUSTICE BLACK voted to grant the petition. Supreme Court denied application of National Committee To Secure Justice In The Rosenberg Case to file brief containing 50,000 names. DAVID GREENGLASS re-interviewed concerning unknown consultant friend of JULIUS ROSENBERG. Interview set forth in brief. RUTH and BERNARD GREENGLASS have no further information concerning this individual. BERNARD GREENGLASS has contacted DAVID ROSENBERG and together have examined the trial record in the office of EMANUEL H. BLOCH. The latter is attempting to persuade BERNARD to visit DAVID at Lewisburg and secure from DAVID a statement that he did not recall the technical data about the atom bomb, but was coached by some officer in the Government.

U. S. SUPREME COURT

A. Denial of Petition for Certiorari

On October 13, 1952, SA HOWARD FLETCHER, JR., of the Washington Field Office, examined the records of the Clerk of the United States Supreme Court and reported that case number 111, petition for writ of certiorari of JULIUS and ETHEL ROSENBERG were denied on that date. Mr. JUSTICE BLACK alone was of the opinion that the petition should be granted. The motion of the National Lawyers Guild for leave to file a brief as amicus curiae was denied by the Supreme Court on October 13, 1952.

B. Stay Granted By Supreme Court

On October 15, 1952, SA HOWARD FLETCHER, JR., of the Washington Field Office, examined the records of the Clerk of the United States Supreme Court and reported that the stay was granted by the Supreme Court on that day permitting JULIUS and ETHEL ROSENBERG, through their attorney, 15 days to file a petition requesting a rehearing of their appeal.

C. Petition of JULIUS and ETHEL ROSENBERG for Rehearing in the
U. S. Supreme Court

On October 28, 1952, EMANUEL H. BLOCH, Attorney for JULIUS and ETHEL ROSENBERG, filed a petition for a rehearing on behalf of JULIUS and ETHEL ROSENBERG. Assistant United States Attorney JAMES B. NILSHEIMER III made available a copy of the petition that he had received from BLOCH. This petition recites five reasons why a rehearing should be granted and a writ of certiorari issued.

NY 65-15348

Point One

BLOCH, in point one, again discusses the Espionage Act as construed by the courts and contends as applied to instant case violates Article 3, Section 3 of the Constitution of the United States which states "Treason against the United States shall consist only in levying war against them or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or on confession in open court". BLOCH states that the petitioners were subjected to a treason prosecution under color of a charge of conspiracy to commit espionage. This was a point he raised on his petition for rehearing in the Circuit Court of Appeals.

Point Two

In this point BLOCH continues his argument regarding the espionage statute and treason, and claims that the trial court read the espionage act to permit its intent to be proven by evidence demonstrative of a "general intent to betray" thereby transformed that law by judicial fiat into a "treason" statute and the trial of the petitioners into a "treason" trial.

Point Three

In this point BLOCH contends that the admission of the Communist affiliations of the petitioners was error and that this evidence was "highly inflammatory" and prejudicial to the defendants.

Point Four

In this point BLOCH in substance charged that the sentences of death were based on untrue assumptions and referred to the remarks of Judge IRVING R. KAUFMAN at the time of the sentence of the ROSENBERGS.

Point Five

In this point BLOCH refers to the excessiveness of the sentences imposed on the ROSENBERGS. BLOCH refers to Section 2106 of Title 28, U.S.C.A. which impowers the Supreme Court to modify, affirm, vacate, set aside or review any judgement.

NY 65-15348

BLOCH contends that the sentence "was a product of the abandonment of rational standards". Judicial balance gave way to unjudicial surrender to the political clamor that invaded this case. This court, the ultimate protector of the accused, helpless against the forces of *passim* and prejudice, has the responsibility to remedy the irreparable and imminently irrevocable harm suffered by these petitioners.

Assistant United States Attorney JAMES B. KILSHIMER III advised that the Government did not file any brief in opposition to the petition for a rehearing.

D. Denial of Petition for Rehearing in Supreme Court

On November 17, 1952, the United States Supreme Court denied the petition of subjects for a rehearing by a vote of eight to one. JUSTICE BLACK alone voted to give them a hearing.

JUSTICE FRANKFURT~~R~~ filed a memorandum opinion in which he stated that the Supreme Court of the United States had no power to change a sentence imposed by a justice in the United States District Court. He further stated that it was primarily the responsibility of the Circuit Court of Appeals to review the record of a trial in a district court. He stated that in the case of the ROSENBERGS the Circuit Court of Appeals had carefully analyzed the trial record and found no error. He stated that there was no reason why the Supreme Court should review the decisions of the lower court.

II. RE-INTERVIEW OF DAVID GREENGLASS REGARDING UNKNOWN CONSULTANT CONTACT OF JULIUS ROSENBERG

4/13

DAVID GREENGLASS was re-interviewed at the United States Penitentiary at Lewisburg, Pennsylvania, by SA W. JAMES COD, concerning his recollection of the unknown consultant friend of JULIUS ROSENBERG and the receipt of \$300.00 from JULIUS ROSENBERG, with particular reference to the visit of NINE SIDOROVICH. Information received from RUTH and BENJAMIN GREENGLASS was made known to DAVID GREENGLASS as an aid in refreshing his recollection of pertinent events.

NY 65-15348

He stated that his original statement to the effect that he had first heard of the unknown consultant in March 1949, was in error, and that it is his recollection, with information now furnished by RUTH GREENGLASS, that he first heard of this individual in the latter part of 1948 or early 1949. He recalled that it was shortly before his wife, JULIA GREENGLASS, had an accident in which she cut her leg, and now recalls that this incident occurred in February, 1949 as stated by RUTH GREENGLASS. He also recalled that at that time he had secured \$60.00 from JULIUS, which JULIUS had apparently obtained from the unknown consultant.

DAVID GREENGLASS also agreed with RUTH GREENGLASS' statements as to the death of his father in March, 1949 and JULIUS ROSENBERG'S having paid money for their share of the burial plot. He also remembered that JULIUS had indicated that the money he paid for the burial plot was not a loan, since JULIUS had a friend who was staking him and would not demand the repayment of the money.

DAVID GREENGLASS also stated that he does not now specifically recall that JULIUS ROSENBERG told him that the unknown consultant made \$200.00 per day, but he does definitely recall that JULIUS told him that the man was a consultant on a dam in Egypt, that JULIUS specifically stated that this man had just recently come back to the United States from a trip to Egypt, and that he, DAVID, got the impression that this individual had flown back from Egypt, although he now states that he cannot recall anything specific in this regard, and that he may have been mistaken in the impression that the man had flown back to the United States from Egypt. He reiterated his certainty that JULIUS had specifically commented on this consultant's having recently returned from a trip to Egypt.

DAVID GREENGLASS agreed with RUTH GREENGLASS' impression that the man was a contact of JULIUS' and not a Russian, and DAVID GREENGLASS recalled that JULIUS had specifically stated that this man was a contact. DAVID GREENGLASS also said that it was his impression that the man was not a Russian, and was either a native-born or naturalized citizen of the United States. He also recalled that when JULIUS spoke of his Russian friends he specifically referred to them as "Russian friends" and that he did not so refer to this consultant.

NY 65-15348

DAVID GREENGLASS stated that his impression or recollection that this consultant had reportedly been paid \$200.00 a day may have been in error, that if JULIUS had told him that the man made \$200.00 per day he is certain he would have advised RUTH GREENGLASS of same, and that RUTH GREENGLASS has a better recollection of past events than he, DAVID GREENGLASS, does.

DAVID GREENGLASS stated that he now recalls a cold, dry day in New York City when he and JULIUS were at Pitt Machine Products, Inc. He recalled that there was no snow on the ground, but that it was bitter cold, and the windows in the plant were all steamed up. He remembered that JULIUS had received a telephone call at the plant from some man asking JULIUS to meet him, that he mentioned he was going to meet someone and DAVID GREENGLASS followed him to the door, curious to see who he was going to meet and where he was going. He stated, however, that at the door JULIUS specifically told him to go back into the building and stay inside. DAVID GREENGLASS was curious as to the identity of this person JULIUS was going to meet and recalls seeing JULIUS walk toward the luncheonette on the corner of Houston Street and Avenue C. He said that he was afraid that JULIUS would turn around and see him watching, and that he accordingly went back into the plant without seeing the person JULIUS was apparently going to meet.

He said that about ten minutes after JULIUS left the plant on that occasion he, DAVID, walked from the plant to the luncheonette, hoping to get a glimpse of the person JULIUS apparently planned to meet there, but that neither JULIUS nor the man he was to meet was at the luncheonette or on the corner at that time. He stated that JULIUS had apparently gone off with this man as he did not return to the plant on that day. He recalled asking JULIUS about the man when JULIUS returned to work on the following day, but said that JULIUS gave him an evasive answer and gave him no indication as to who the man might have been. DAVID said that he does not know whether this man might have been identical with the unknown consultant. He was unable to advise as to the date of this occurrence, but said it is his present recollection that this occurred about two weeks prior to the time he obtained money from JULIUS which had presumably come from the unknown consultant, and probably at about the same time or possibly shortly after RUTH hurt her leg.

NY 65-15348

Concerning JULIUS ROSENBERG'S meeting with RUTH SIDOROVICH, he stated that the date of this occurrence was, as stated by RUTH GREENGLASS, July 2, 1948. He recalls that SIDOROVICH drove his car up to the front of Pitt Products, Inc., and got out, coming into the place. He stated he was on vacation and DAVID asked him whether his wife was with him. SIDOROVICH replied that she was with him, but was then with her mother. He asked for JULIUS ROSENBERG and DAVID told him that JULIUS was not around. DAVID showed SIDOROVICH around the shop and remembers introducing RUTH GREENGLASS to SIDOROVICH, and that the three of them went to the luncheonette on the corner for a drink. SIDOROVICH told DAVID that he was working for some steam boiler company in Cleveland, Ohio, and DAVID said that it is his recollection that the name of this place was Wilcox and Gibbs, or something similar.

DAVID said that RUTH is mistaken in her belief that SIDOROVICH was then living at Chappaqua in that he specifically recalls SIDOROVICH mentioning his employment in Ohio. He said that he does not recall having told RUTH about SIDOROVICH'S work or the place he was then residing at.

DAVID said that SIDOROVICH did not meet JULIUS at the plant on that day, but that a few days later he mentioned to JULIUS that SIDOROVICH had been in, and JULIUS told him that he had seen SIDOROVICH.

Concerning the statement that RUTH advised that on February 21, 1948, her father fell and broke his hip, DAVID GREENGLASS stated that this was his, DAVID'S, father and not RUTH'S, but that RUTH refers to him as "Pop". He also agreed with RUTH'S statement that on or about June 6, 1948, and shortly before his death, JULIUS LEWIS had given DAVID \$200.00. He recalled that it was at about the same time, i.e. June 1948, not June 1949, and not later in the summer, when he got the \$800.00 from JULIUS ROSENBERG. He recalled that he had been feeling well satisfied with the world, having approximately \$1000.00 and that he had bought himself some new clothing. He recalled planning on going to a movie and then seeing JULIUS LEWIS, who looked at the time as if he were about to die. He recalled that this depressed him considerably and dampened his elation at having \$1000.00. He is certain that he received

NY 65-15348

the \$200.00 and the \$800.00 at about the same time, and had the entire \$1000.00 shortly prior to JULIUS LEWIS' death. He also recalls that all during the summer of 1948, when RUTH was in Monticello on vacation, he kept taking \$20.00 to \$40.00 from their safe deposit box to give to RUTH to use while on vacation and feels certain that he did not obtain the \$800.00 after JULIUS LEWIS' death.

Concerning BERNARD GREENGLASS' statement that JULIUS ROSENBERG had stated that the money he borrowed from his friend had to be repaid, DAVID said that JULIUS would tell BERNARD this, whether or not it was true, inasmuch as he would never mention any "contact" to BERNARD and would not admit to BERNARD that he had a source for funds which he would not have to repay. He also said that if the consultant or contact were a widely known engineer or prominent person, JULIUS would not make this fact known to BERNARD and because the money had been received from a contact, which fact he would not want known to BERNARD, JULIUS would "play down" the source of the money and treat it in an off-hand manner.

GREENGLASS was questioned at length for other information which might be of assistance in identifying the unknown subject, but could furnish no additional information.

RUTH and BERNARD GREENGLASS were recontacted, but could offer no further information concerning the identity of the unknown consultant.

III. CONTACTS OF BERNARD GREENGLASS WITH DAVID ROSENBERG AND MANUEL H. BLOCH

RUTH GREENGLASS advised that her brother-in-law, BERNARD GREENGLASS, had been in contact on several occasions with DAVID ROSENBERG, brother of JULIUS. It is noted that BERNARD GREENGLASS had previously reported that DAVID ROSENBERG had requested his assistance in determining the truth of the charges against JULIUS and STEL, and to this end both had agreed to examine the trial record.

NY 65-15348

RUTH advised that she was concerned with the fact that BERNARD GREENGLASS told her that BLOCH wanted him to visit DAVID GREENGLASS at Lewisburg and elicit from him a statement to the effect that DAVID GREENGLASS had been unable to recall the scientific data of the atom bomb that he had turned over to JULIUS ROSENBERG, and that he had been coached by someone in the Government.

BERNARD GREENGLASS was contacted and advised that he had been to BLOCH'S office on two or three occasions and together with DAVID ROSENBERG had examined the trial record. BERNARD stated that because of his recent marriage he did not spend too much time with DAVID ROSENBERG in reading the record. He stated that about November 8 DAVID ROSENBERG told him that it was important that he see MANULL H. BLOCH. He stated that he went to BLOCH'S office with ROSENBERG, and that BLOCH had advised him that several scientists told him that in their opinion it was not scientifically feasible for DAVID GREENGLASS to remember the technical data concerning the atom bomb that he had turned over to JULIUS ROSENBERG. It was the opinion of these undisclosed scientists that DAVID could not recall such data after a period of five or six years from the time that he had obtained it. BLOCH argued that since this was scientifically impossible, he believed that DAVID GREENBERG had been coached by some scientist or other individual in the Government. He asked BERNARD GREENGLASS to go to Lewisburg Penitentiary and to advise DAVID GREENGLASS of the opinion of the scientists and endeavor to secure from DAVID in writing a statement that he, DAVID, had been coached by some representative of the Government.

BERNARD stated "Bloch is crazy. He's trying to win me over to his way of thinking, but he can't". BERNARD stated that he did not do as BLOCH requested.

Mrs. TESSIE GREENGLASS advised that she has been talking with BERNARD and she is sure that he will not be won over by BLOCH. She advised that BERNARD is going to visit ETHEL at Sing Sing on November 15, 1952. She stated that she hoped that JULIUS and ETHEL ROSENBERG would come to their senses and cooperate with the Government and attempt to undo some of the harm that they have done to their country. She stated she is certain that if they were represented by someone other than BLOCH they would have done the right thing a long time ago. She advised that on her last visit to ETHEL in the Women's House of Detention in September, 1950 she told the same thing to ETHEL, and that

NY 65-15348

ETHEL held her throat so as she would not break down. She advised that she told ETHEL "you are a dirty Communist, but you should never have harmed your own country". Mrs. GREENGLASS advised that ETHEL refused to see her from that day until the present time.

7AB5
 An order to show cause was signed by Judge Weinfeld in the Southern District of New York on November 26, 1952, and this motion is to be argued on December 1, 1952. A petition in connection with this order aims at vacating the sentences of the Rosenbergs and Sobell and staying the execution of the Rosenbergs. In the defendants' petition, the following claims are made:

1. The pre-trial publicity, including FBI press releases, precluded the defendants' ability to secure a fair trial.
2. The arrest of William Perl and the publicity therefrom which occurred during the trial of the Rosenbergs and Sobell prejudiced their case.
3. It is alleged that false testimony from David Greenglass was used in that he testified that from his arrest on, he fully cooperated with the Government, which the petition alleges is not true.
4. It is alleged that Greenglass perjured himself. It is also alleged that Greenglass must have been coached by the Government in order to remember the scientific facts to which he testified concerning the atom bomb.
5. It is alleged that another Government witness, Ben Schneider, had perjured himself in stating that he had not seen the Rosenbergs from the time he took their pictures until the date of his appearance as a witness. It is alleged that the day before he testified, he had been brought into court by the Government in order that he might identify the Rosenbergs.

70 DEC 29 1952

8. It is also alleged that the Government falsely classified atomic data as being Secret.

An analysis is being submitted hereinafter covering the various points raised by the defendants as they affect the Bureau. ASAC Whelan of the New York Office has pointed out the United States Attorney's Office expects the defendants' motion to be turned down.

PURPOSE:

To analyze the various points raised by the defendants' petition where they relate to the FBI and to point out misleading statements made therein.

BACKGROUND:

You will recall that Julius and Ethel Rosenberg and Morton Sobell twice made appeals to the Supreme Court for Writs of Certiorari, and both times, the Supreme Court denied these writs. Thereafter, Judge Kaufman of the Southern District of New York ordered that the execution of the Rosenbergs should occur during the week of January 12, 1953. Morton Sobell has also been transferred to Alcatraz. The attorneys for the Rosenbergs and Sobell are now engaged in a last effort to vacate the sentences and to forestall the execution of the Rosenbergs.

On November 26, 1952, Judge Weinfeld in the Southern District of New York executed an order to show cause which is to be argued on December 1, 1952. This order was based upon a petition filed in the names of the Rosenbergs and Morton Sobell asking that the sentences against the Rosenbergs and Sobell be vacated and that the execution of the Rosenbergs be delayed.

In connection with the foregoing, Assistant Special Agent in Charge Whelan of the New York Office was telephonically contacted by Supervisor Sterling B. Donahoe at 3:00 P.M., November 30, 1952, to ascertain if the petition filed by the defense had been carefully analyzed by the New York Office and fully discussed with the Assistant United States Attorney's Office handling the matter. Whelan said this had been done. He said

the United States Attorney's Office feels that the court will turn down the motion promptly when it is heard on argument on Monday morning, December 1, 1952. He said that no evidence will be taken nor are witnesses to be present for this hearing. Whelan stated that if the court decides that a further hearing is necessary, then an agreement will have to be made on the issues to be heard.

It is to be noted that in connection with the Government's answer to the petition made by the defendants, it is contemplated that affidavits will be submitted in the names of several of our Special Agents. A separate memorandum is being submitted which sets forth our position with respect to these affidavits.

PRE-TRIAL PUBLICITY ADVERSELY AFFECTED THE DEFENDANTS' RIGHT TO A FAIR TRIAL:

The petition, in a lengthy 50 pages, undertakes to show that the defendants' right to a fair trial was prejudiced because the public mind had been pre-conditioned to an acceptance of their guilt. It is alleged that information indicating the guilt of the defendants was "fed to" the press by the Federal Bureau of Investigation, the Department of Justice, and the Office of the United States Attorney.

The petition traces the publicity in the Fuchs, Gold, Slack, Brothman, Moskowitz, Vago, Greenglass and Rosenberg cases, quoting at length from various newspaper accounts in an effort to show the Government attempted to create fear and hysteria in the minds of the public, which precluded any rational treatment of the defendants. It is alleged that the Government had already tried their cases in the newspapers by making ex parte announcements of each of the essential issues which later arose in the trial.

The petition quotes from the press release put out by the Director on Julius Rosenberg as it appeared in the New York Times on July 18, 1950. Statements made by United States Attorney Saypol are also quoted.

The petition ends the section dealing with publicity with this statement: "This pre-trial publicity was prosecution without defense. In effect, it was not only testimony without cross-examination, but a special public sponsorship by the FBI-- weighted by its prestige and reputation for infallibility--of the credibility of the prosecution witnesses. It was a presentation of

evidence untempered, unchallenged or minimized by evidence offered by the accused. It was, in short, the kind of circumstance, which the court in the Delaney case, stated was conducive to public 'preconceptions as to probable guilt,' which must vitiate the conviction."

Comment:

Press releases were made jointly by the Director and the Attorney General in the following cases directly related to the prosecution of the Rosenbergs:

1. A brief one-page release was made on June 16, 1950, announcing the arrest of David Greenglass. No mention was made of the Rosenbergs.
2. A release was made on Julius Rosenberg on July 17, 1950, which announced his arrest and briefly set forth his background and the essential available facts linking him to Greenglass and others. This release was three pages long, double-spaced, and included a copy of the complaint which had been filed.
3. A release was put out on August 11, 1950, on the arrest of Ethel Rosenberg merely recounting what she was charged with and her background. This release was $1\frac{1}{2}$ pages in length, double-spaced.
4. A $2\frac{1}{2}$ page release, double-spaced, was put out on the arrest of Morton Sobell.

It would not appear on the basis of the foregoing that any weight can be given to the charge that the FBI endeavored to whip up public hysteria. The press releases made in this case were in keeping with the general policy of the Bureau, and the amount of publicity which resulted was brought about by the seriousness of the espionage charges against the Rosenbergs and by the damage done to this country by the theft of the secrets of the atom bomb.

PERL INDICTMENT ALLEGED TO HAVE PREJUDICED THE DEFENDANTS
BECAUSE IT OCCURRED DURING THEIR TRIAL:

It is alleged that the news story announcing the indictment of William Perl broke in the papers on March 15, 1951, during the trial

of the Rosenbergs and thereby prejudiced the Rosenbergs' case.

Comment:

You may recall that it was hoped that Perl would become a Government witness against the Rosenbergs, and when it was found that he would not do so, the decision was made by the Department to arrest him. This was brought about in part by the belief that he might attempt to flee from the country. You may recall that he had been propositioned to do just that at an earlier date.

PROSECUTION USED FALSE TESTIMONY TO BRING ABOUT THE CONVICTION:

The petition charges that David Greenglass perjured himself when he testified at the trial that he did not withhold conscientiously information from the FBI when first questioned and that he did not tell his attorney, at first, to fight the case but only confessed after a deal was effected not to prosecute his wife.

Comment:

Greenglass, when arrested on June 15, 1950, admitted committing espionage while stationed at Los Alamos and in a signed statement, he involved Julius and Ethel Rosenberg. He was reinterviewed on numerous occasions after he had consulted with his attorney, Mr. O. John Rogge, and his wife, and during these later interviews, he further implemented his original admissions. It is our understanding that Mr. Rogge attempted to make a deal with the then United States Attorney, Irving Saypol, and that Saypol refused.

The petition also charges that David Greenglass did not possess the educational and vocational background to prepare sketches of the lens mold and cross-section of the atomic bomb which he delivered to Rosenberg and reproduced at the time of the trial.

Comment:

On the occasion of the interview of David Greenglass on June 15, 1950, he prepared a sketch of a lens mold showing a high explosive implosion device. This was prepared with no assistance or reference books whatsoever. In answering the defendants' petition, the United States Attorney's Office desires

to use affidavits to this effect which have been prepared by Special Agents Leo H. Frutkin and John W. Lewis who were the interviewing Agents of Greenglass. As noted hereinbefore, a separate memorandum is being prepared with respect to these affidavits.

It is also alleged that Ben Schneider, a photographer, perjured himself when he testified on March 27, 1951, that he had not seen Rosenberg since May or June, 1950, when Schneider took passport photographs of the Rosenbergs. It is alleged that Schneider actually saw Julius Rosenberg in the courtroom on March 26, 1951.

Comment:

Schneider, when interviewed on March 26, 1951, identified photographs of the Rosenberg family. On the specific instructions of the United States Attorney, Southern District of New York, Irving H. Saypol, Schneider was brought to the courtroom in order to determine if he could identify the Rosenbergs in person, at which time he did so. The United States Attorney's Office desires an affidavit from Special Agent Walter E. Roetting relative to his interview of Schneider and a separate memorandum is being submitted with respect to this affidavit.

The petition also alleges that the information which Greenglass gave to Harry Gold was actually a principle of physics which had been known to scientists and physicists of all nations prior to World War II and therefore, this information should not have been classified as Secret.

Comment:

The information furnished to Gold by Greenglass related to the Manhattan Engineering District's work on the atomic bomb and was classified as Secret because it dealt with the manufacture and production of the atomic bomb. As you know, efforts to protect the secrecy of this operation were expended probably to a greater degree than on any other scientific achievement of this country. Witnesses were produced at the trial of the Rosenbergs who testified relative to the security standards and secrecy in effect relative to the Manhattan Engineering District's work at Los Alamos. It is hard to see how the defendants can expect the District Court to give this point much consideration.

PETITION OF MORTON SOBELL:

A petition was also filed by Morton Sobell in which he generally alleges the same material as in the Rosenberg petition. He also alleges he was prejudiced by naming him as an atom spy when no proof to this effect was adduced at his trial. He also alleges that he, in effect, was charged with treason while tried for espionage.

Comment:

There is nothing in Sobell's petition which relates to the FBI which has not already been covered previously relative to the Rosenberg charges.

RECOMMENDATION:

The foregoing has been prepared in order to analyze fully the allegations made by the defendants in this case. It is to be noted that the United States Attorney's Office for the Southern District of New York does not feel that the defendants' motion will get them anywhere. You will be promptly advised of any developments in connection with this matter and the various press releases made by us in connection with this case are attached.

Office Memorandum • UNITED STATES GOVERNMENT

TO : MR. A. H. BELMONT

FROM : MR. L. L. LAUGHLIN

SUBJECT: JULIUS ROSENBERG
ETHEL ROSENBERG
ESPIONAGE - R

DATE: December 1, 1952

[Redacted]

S-71

ASAC Whelan of New York advised at 3:20 P.M.
 today that the hearing on the motion filed by counsel for
 the Rosenbergs to vacate the judgment and set aside the
 verdict, which was scheduled to take place at 2:00 P.M.
 today, has been postponed until 11:00 A.M. tomorrow,
 December 2.

The postponement was agreed to by Judge Sylvester
 Ryan, Southern District of New York, to permit attorneys
 an opportunity to study further the motions in question.

CIVIL RIGHTS CONGRESS

November 24, 1953

Dear Friends:

The Civil Rights Congress will very shortly have ready a pamphlet on the case of Ethel and Julius Rosenberg, now under sentence of death in Sing Sing.

The author is Richard Boyer, who wrote "The Dark Ship," and other works which may be known to you. He is writing the pamphlet in 54 pages, giving a definitive history of the case, and yet presenting it in popular style so that it will be easily readable by the hundreds of thousands of persons who must be reached in this decisive period of the struggle to save the Rosenbergs' lives.

The pamphlet tells a succinct story of the frame-up in all its stages; it contains the statements and analyses of legal experts all over the world who have examined the transcript and who agree that the case is one of the flimsiest on record; it shows how the entire trial revolved about the testimony of a man who would himself have faced death had he not falsely accused others; it tells of the long-standing private quarrel between this man, David Greenglass, and his brother-in-law, Julius Rosenberg.

The pamphlet also includes much of the moving and eloquent correspondence between Ethel and Julius Rosenberg in the death house.

We urge you to do the following without delay:

- 1) Send for at least one copy of the pamphlet. The price of a single copy is 25 cents.
- 2) If at all possible, send for a bundle order of 10 or more, at the discount rate of 15 cents per copy, or 12½ cents for 200 copies or more. Constitute yourself a committee of one to place this pamphlet in the hands of your friends, neighbors, shopmates, and union brothers.
- 3) Send us, if you can, a contribution of any size, which will be used to place this important pamphlet in the hands of more people.

This activity on your part can be an important contribution to saving the Rosenbergs from the electric chair. We are counting on you as one who has been active in the struggle for civil liberties.

Please mark your communication plainly, stating whether you are sending for a bundle order, or making a contribution, or both. All checks and money orders must be made out to Elizabeth Lippman at this address:

Yours sincerely,

Elizabeth Lippman
